

# Garage Management Software

Built for Tyre Workshops and Busy Garages.

Team2

Manage bookings, stock, job cards, invoicing, reminders and customer communications from one practical system built for tyre workshops and busy garages.

## Designed for the Way Your Workshop Works

Garage and tyre businesses need to move quickly while keeping control of stock, pricing, customers and workshop capacity. Team2 helps bring these everyday processes together, giving your team the tools to work more efficiently and deliver a smoother customer experience.

Designed for tyre depots, garages and workshop teams, Team2 supports the daily tasks that keep your business moving – from booking jobs and checking stock through to creating quick quotes, invoices, reminders and performance reporting.

### Key outcomes

**+ Keep stock under control**

Track tyre, parts and consumable stock, including quantities, buying prices, selling prices, locations, stock reports and suggested ordering levels.

**+ Plan workshop activity clearly**

Use calendar tools to organise ramps, technicians, MOTs, services, tyre work and wheel alignment bookings.

**+ Reduce admin at the counter**

Create quick quotes, job cards and invoices more efficiently, with fewer manual steps between booking, work and payment.

**+ Support repeat business**

Send MOT and service reminders by SMS or email and keep customer information connected through VRM lookup, vehicle history and purchase records.

**+ Improve visibility**

Use reporting tools to review sales, stock, suppliers, customers, labour recovery, technician efficiency and profitability.

---

**The training and aftercare we receive are second to none, and as our business and stock levels expand, it would be impossible to keep on top of stock levels and pricing without it."**

**AWS Tyres**

# Practical Tools for the Way Your Workshop Works

Team2 is built around the everyday realities of garage and tyre operations. It helps teams serve customers quickly, manage stock accurately, reduce paper-based processes and stay in control as the business grows.

Whether you operate from one depot or manage activity across multiple locations, Team2 gives you a clearer way to manage workshop tasks and customer activity from one connected system.

## Features

### + Stock Management

Manage tyres, parts and consumables with clear visibility over stock levels, pricing, margins, availability and suggested ordering levels.

### + Calendar and Job Management

Plan work by ramp, technician and job type, with colour coded booking slots, deferred work tracking and held invoices created from calendar activity.

### Invoicing and Payments

Create professional invoices quickly and support a smoother payment process with integrated card payment options.

### + Customer Communications

Send reminders, manage customer records and support a better customer journey from first enquiry to repeat booking.

### + Webshop Integration

Connect online tyre sales with Team2, helping customers search, order and book fitting appointments online.

### + Reporting and Control

Access practical reports that help you understand stock, sales, suppliers, customers and workshop performance.

## Connected tools

- + Webshop solutions for online tyre sales.
- + Integrated Dojo payment terminals.
- + PriceManager and stock data tools.
- + InfoRoute for truck tyre and fleet-focused businesses.
- + Support and hardware services.

## Our promise

### Team2 is designed to be:

- + Practical.
- + Easy to use day to day.
- + Focused on real workshop operations.
- + Built to support busy tyre and garage teams.

## See Team2 in Action
