About us

At Klipboard, we believe modern rental software should be simple, intuitive, and built for the pace of your business.

OnRent Go is our cloud-first platform, designed for small to medium sized hire firms that want to grow.

It gives you powerful software without the complexity of solutions aimed at large or enterprise grade organisations.

It's also accessible from anywhere, and it digitises previously manual, paper-based activities such as quoting, order taking, equipment tracking, and invoicing into one central, easy-to-use system.

So whether you're on-site, in the yard, or handling calls from home, your operations stay connected and under control.

www.klipboard.com

We understand the rental industry. It's fast-moving, high-pressure and there's zero margin for error.

Manual service tracking wastes uptime

Using paper or basic spreadsheets to record service dates and certifications is risky. With OnRent Go's digital scheduling and reminders, you keep equipment compliant and avoid costly downtime.

You've got no time to untangle admin

As a growing hire firm, you're juggle too many tasks with too few hours. OnRent Go simplifies quoting, invoicing, servicing, and returns, so you spend more time serving customers and less time buried in paperwork.

Growing pains shouldn't slow you down

As orders and assets grow, makeshift systems start to crack. OnRent Go scales with your business, no tangled workflows, no upgrade headaches, just a system that adapts as you do.

You need accurate availability, always

When you're tracking availability on spreadsheets and manual systems equipment gets miscounted, is out for repair, or incorrectly logged, availability becomes guesswork. OnRent Go gives you real-time visibility, so you know what's truly available and can book jobs confidently.

You just want to get paid, sooner

Lost paperwork, billing delays and rekeying quotes slow your cash flow. OnRent Go streamlines invoicing, payments and integration with accounting software, so you spend less time chasing money and more time growing.

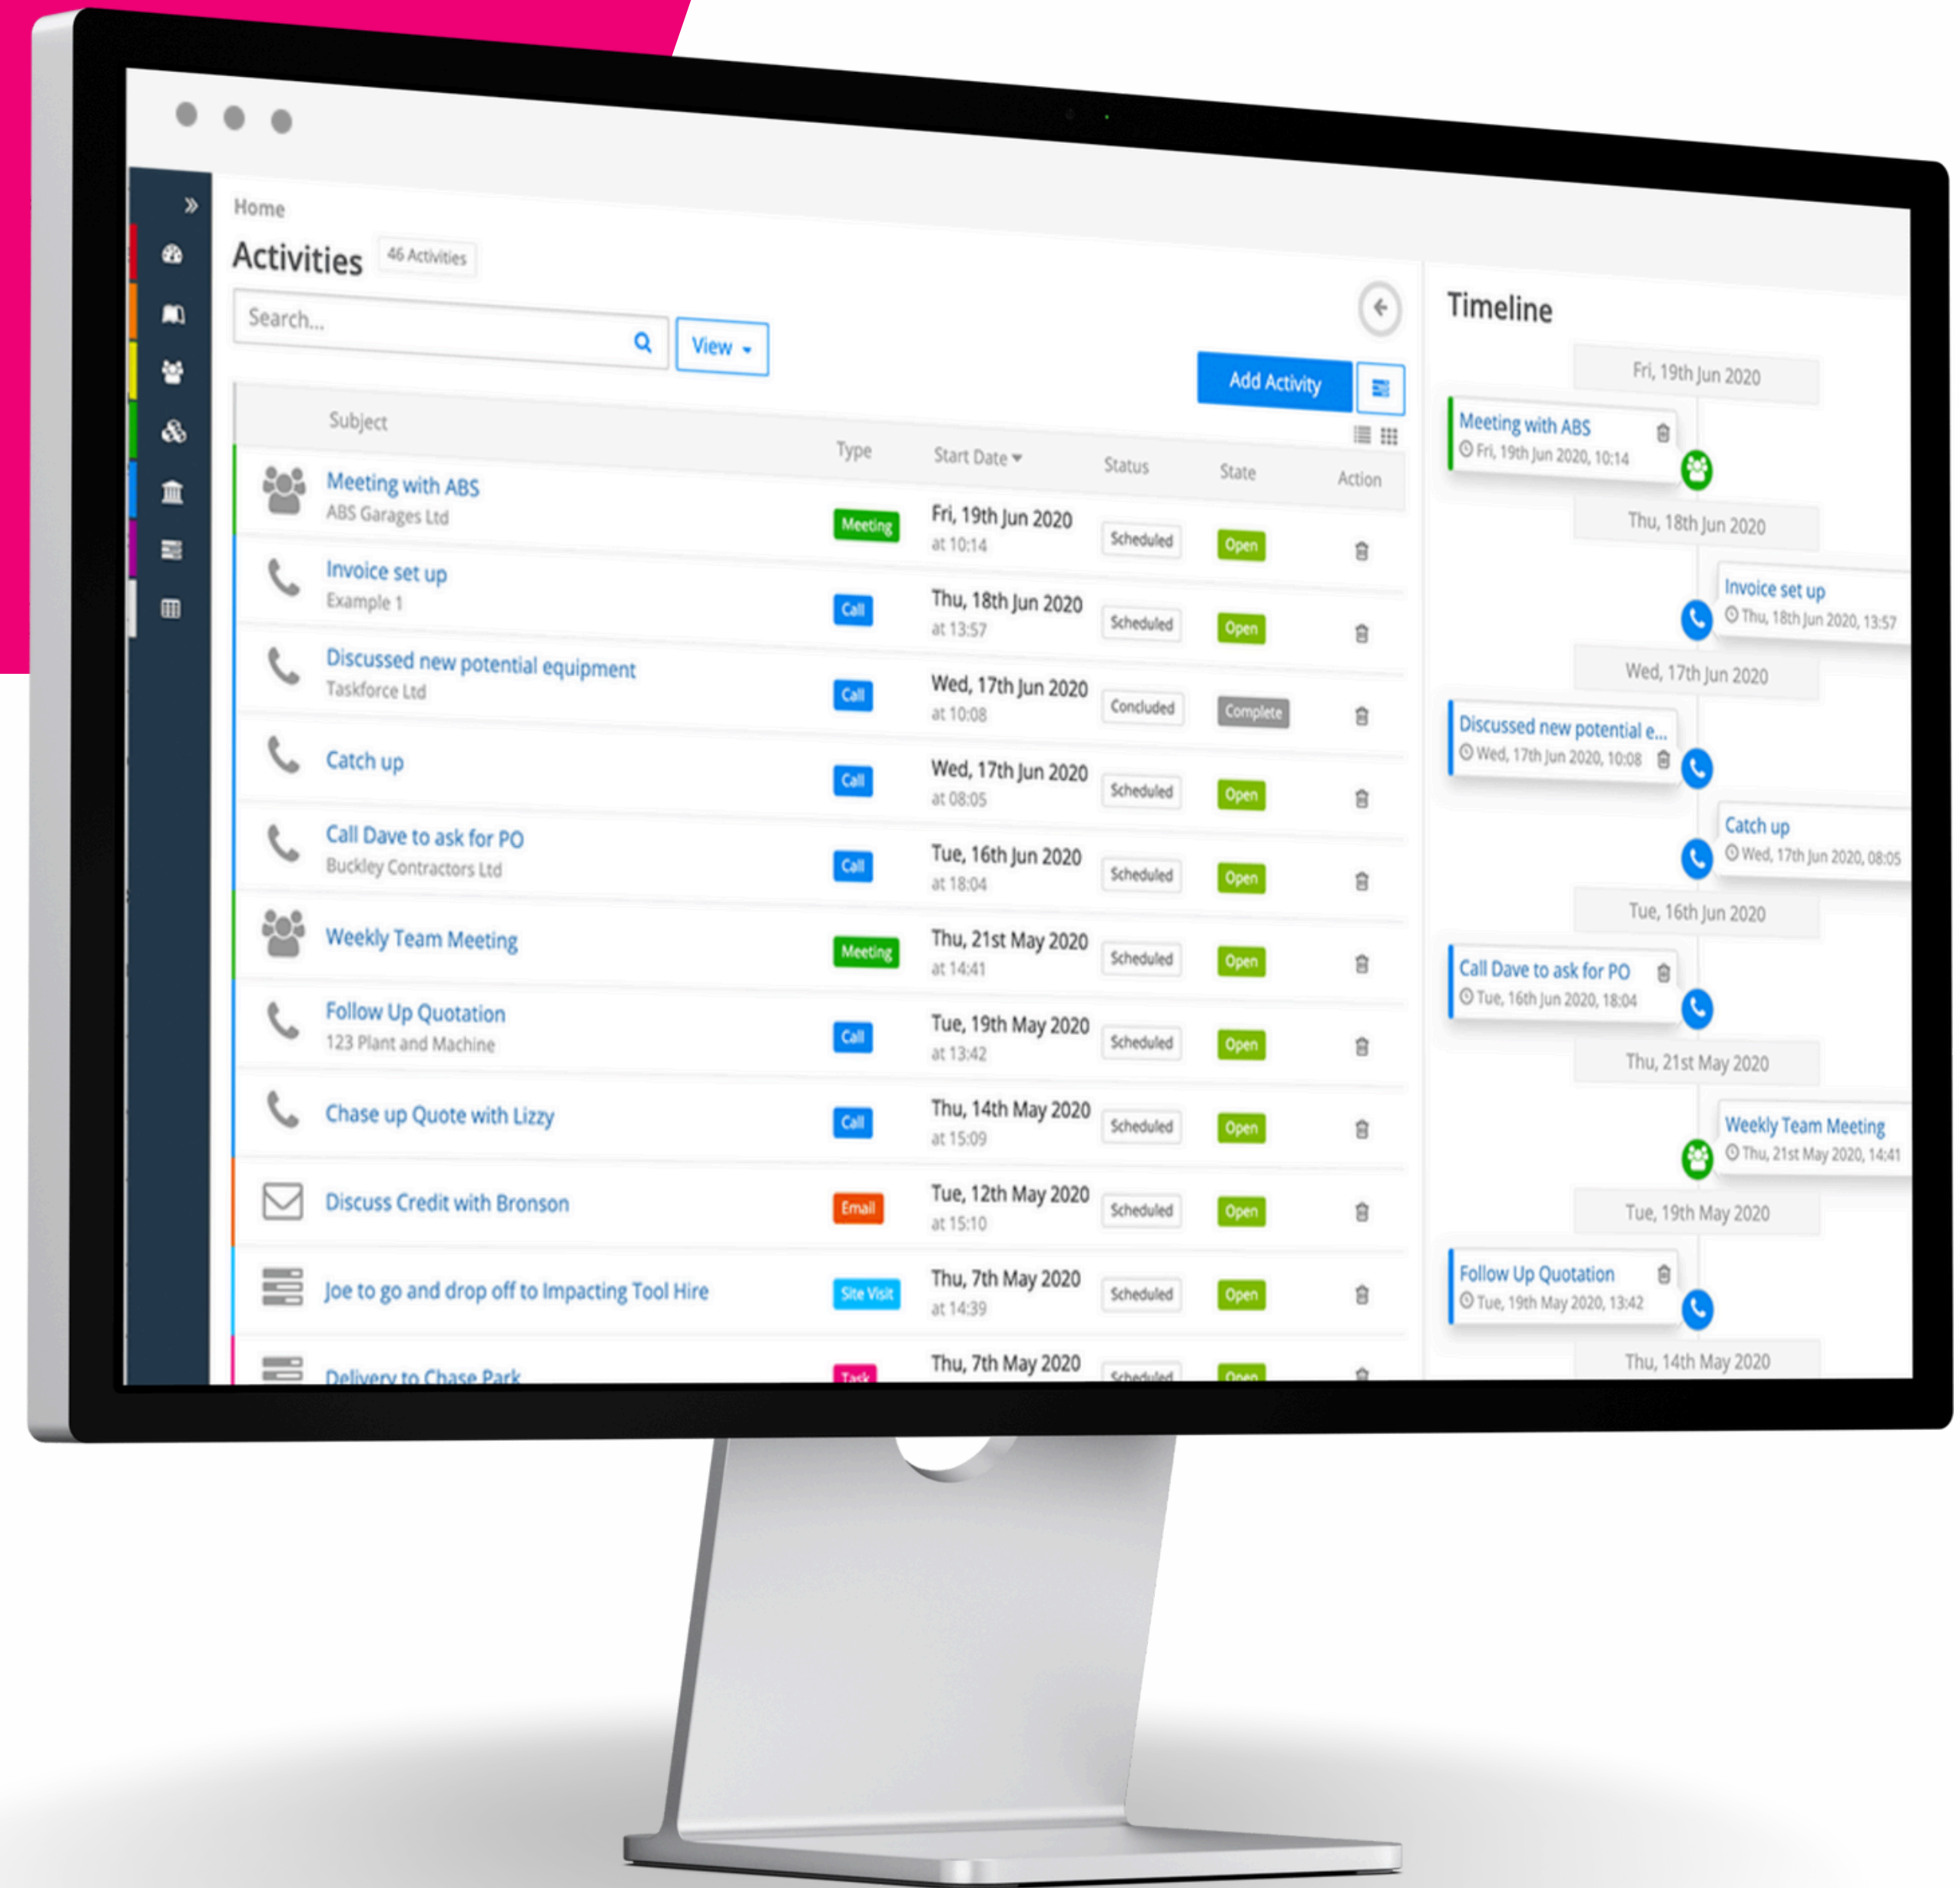

Introducing OnRent Go[®]

by Klipboard.

A smarter way to grow your hire business.

OnRent Go is the cloud rental management solution built for smaller hire companies that want to grow, without the weight of complex systems. It brings your quotes, orders, equipment, servicing, invoicing, and customer records into one easy-to-use platform.

From checking availability and sending quotes to capturing signatures, booking maintenance, and raising invoices, OnRent Go gives you the tools to run a smarter, more connected operation — from anywhere. And because it's cloud-based, there's nothing to install, patch, or maintain.

If you're still relying on paper, spreadsheets or outdated tools, OnRent Go helps you take the next step — with simple, powerful software that grows with your business.

Key Features at a glance:

- ✓ Create rental or sales quotes in seconds
- ✓ See live availability with suggested accessories
- ✓ Schedule servicing and track certifications
- ✓ Manage equipment with visual category browsing
- ✓ Capture proof of delivery with digital signatures
- ✓ Invoicing on the go, standalone or linked
- ✓ Maintain customer activity calendar and reminders
- ✓ View live dashboards and export business data
- ✓ **And much more...**

Joined up rental workflows, from hire desk to invoice

OnRent Go gives you everything you need to manage the rental journey from start to finish. Whether you're quoting new jobs, tracking availability, handling servicing or sending invoices, you'll find every step connected, without switching systems or rekeying information.

Built for growing rental businesses, it simplifies the day-to-day and helps you focus on delivering great service, not chasing paperwork.

It works across your organisation to:

1. Speed up quoting and order entries

Give your hire desk and sales teams the tools to create quotes and convert them to hires in seconds.

3. Plan and track deliveries and collections easily

Assign vehicles, drivers and deliveries using drag-and-drop tools that factor in location, job type, vehicle weight and route planning.

5. Invoice customers faster, with more accuracy

Raise accurate invoices, fast, directly from jobs logged in the OnRent Go platform - no rekeying of data required.

2. Get real-time visibility of equipment and inventory status

Understand what out on hire, what's in the workshop being serviced, and what's ready to go - without having to pick up the phone.

4. Manage your workshop to keep equipment available

Log faults, assign servicing and track the costs and downtime of each asset - all in one place.

6. Track performance and make data-backed decisions

Get actionable insights into your businesses performance, including assets, people and jobs, to see where there's room for growth.

Solutions for every step of the rental cycle.

Discover Klipboard's layered applications and additional modules that can further improve how you run rental business.

Orders and quotes

Create view, manage and update all your orders and quotes in on single screen.

Equipment management

Manage all your equipment from a single screen with live status updates.

Maintenance

Keep your equipment safe and compliant with scheduled maintenance and certification.

Invoicing and Finance

Flexible invoicing allows you to create invoices on the go - from an order or a batch routine.

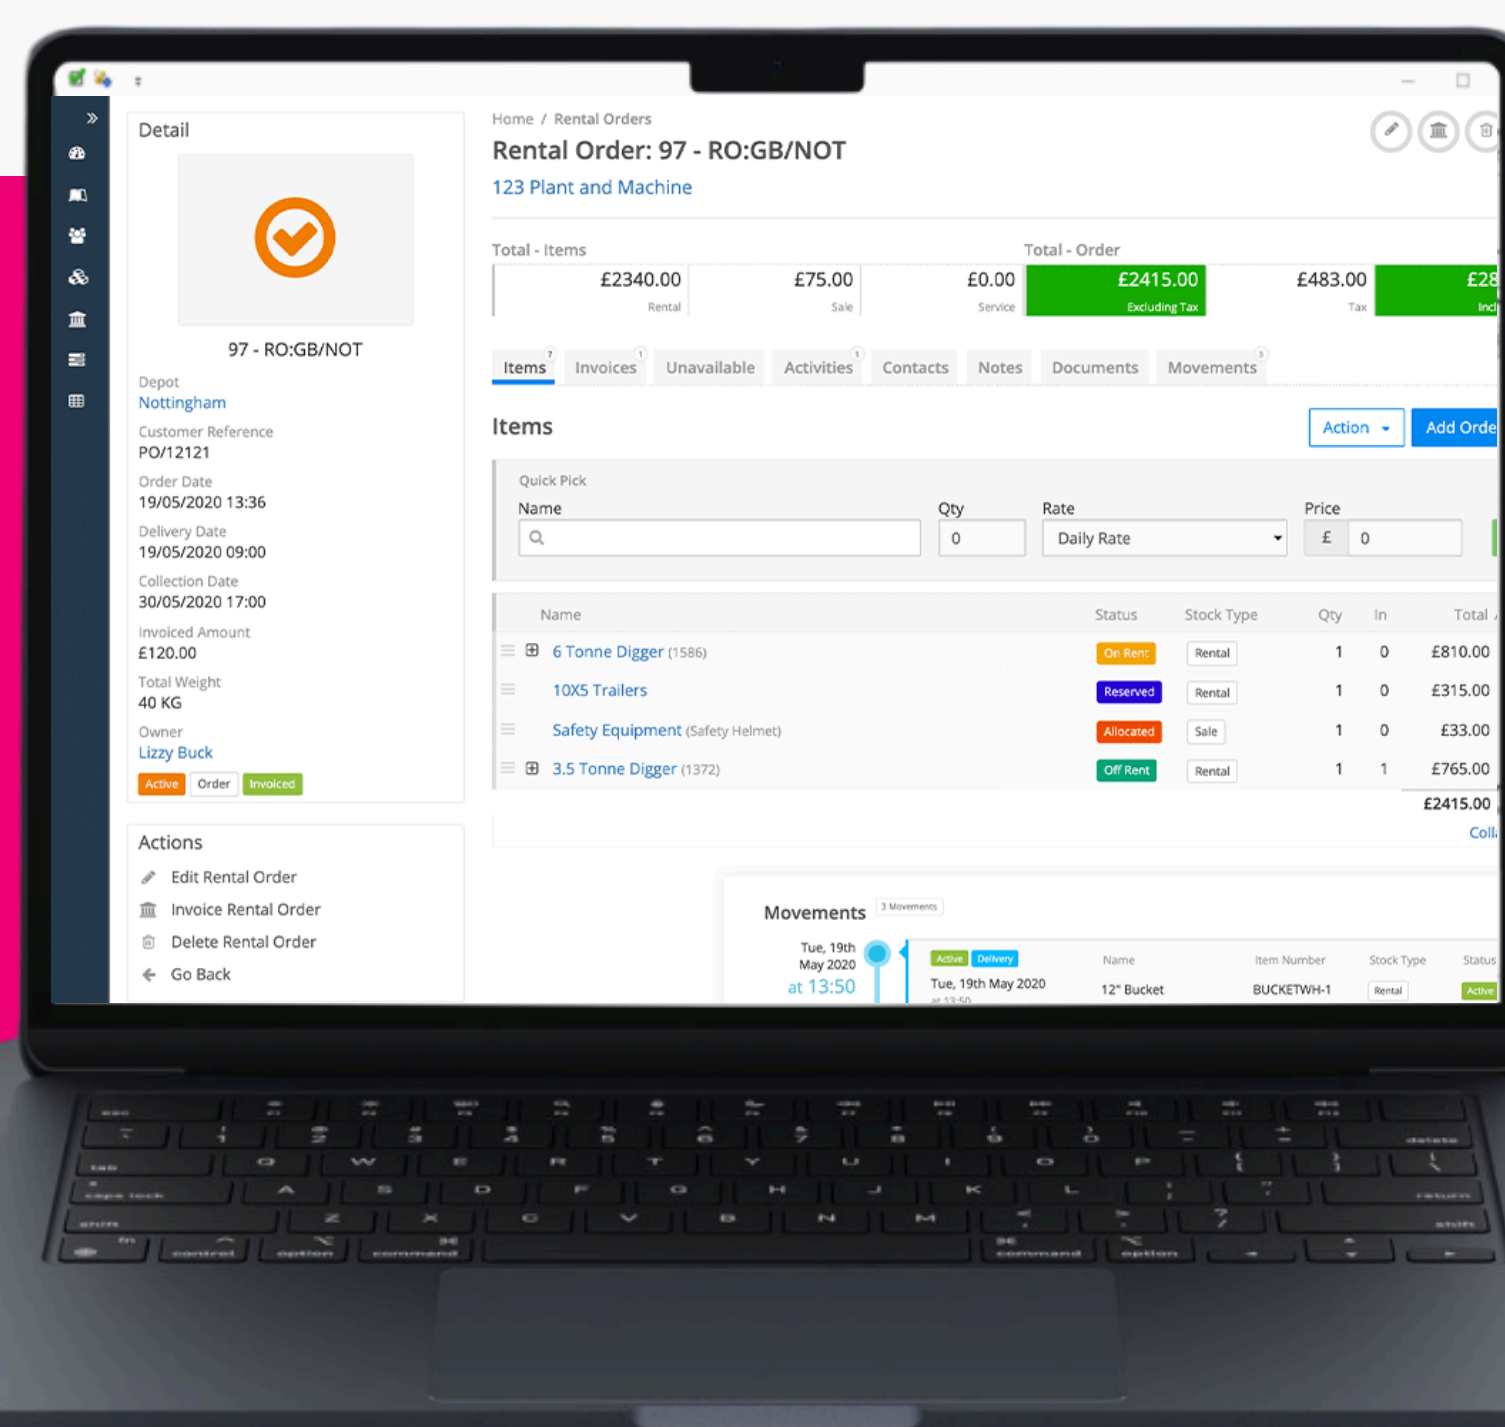

Customers

Organise customers and associated orders, invoices and activities.

Reports and BI

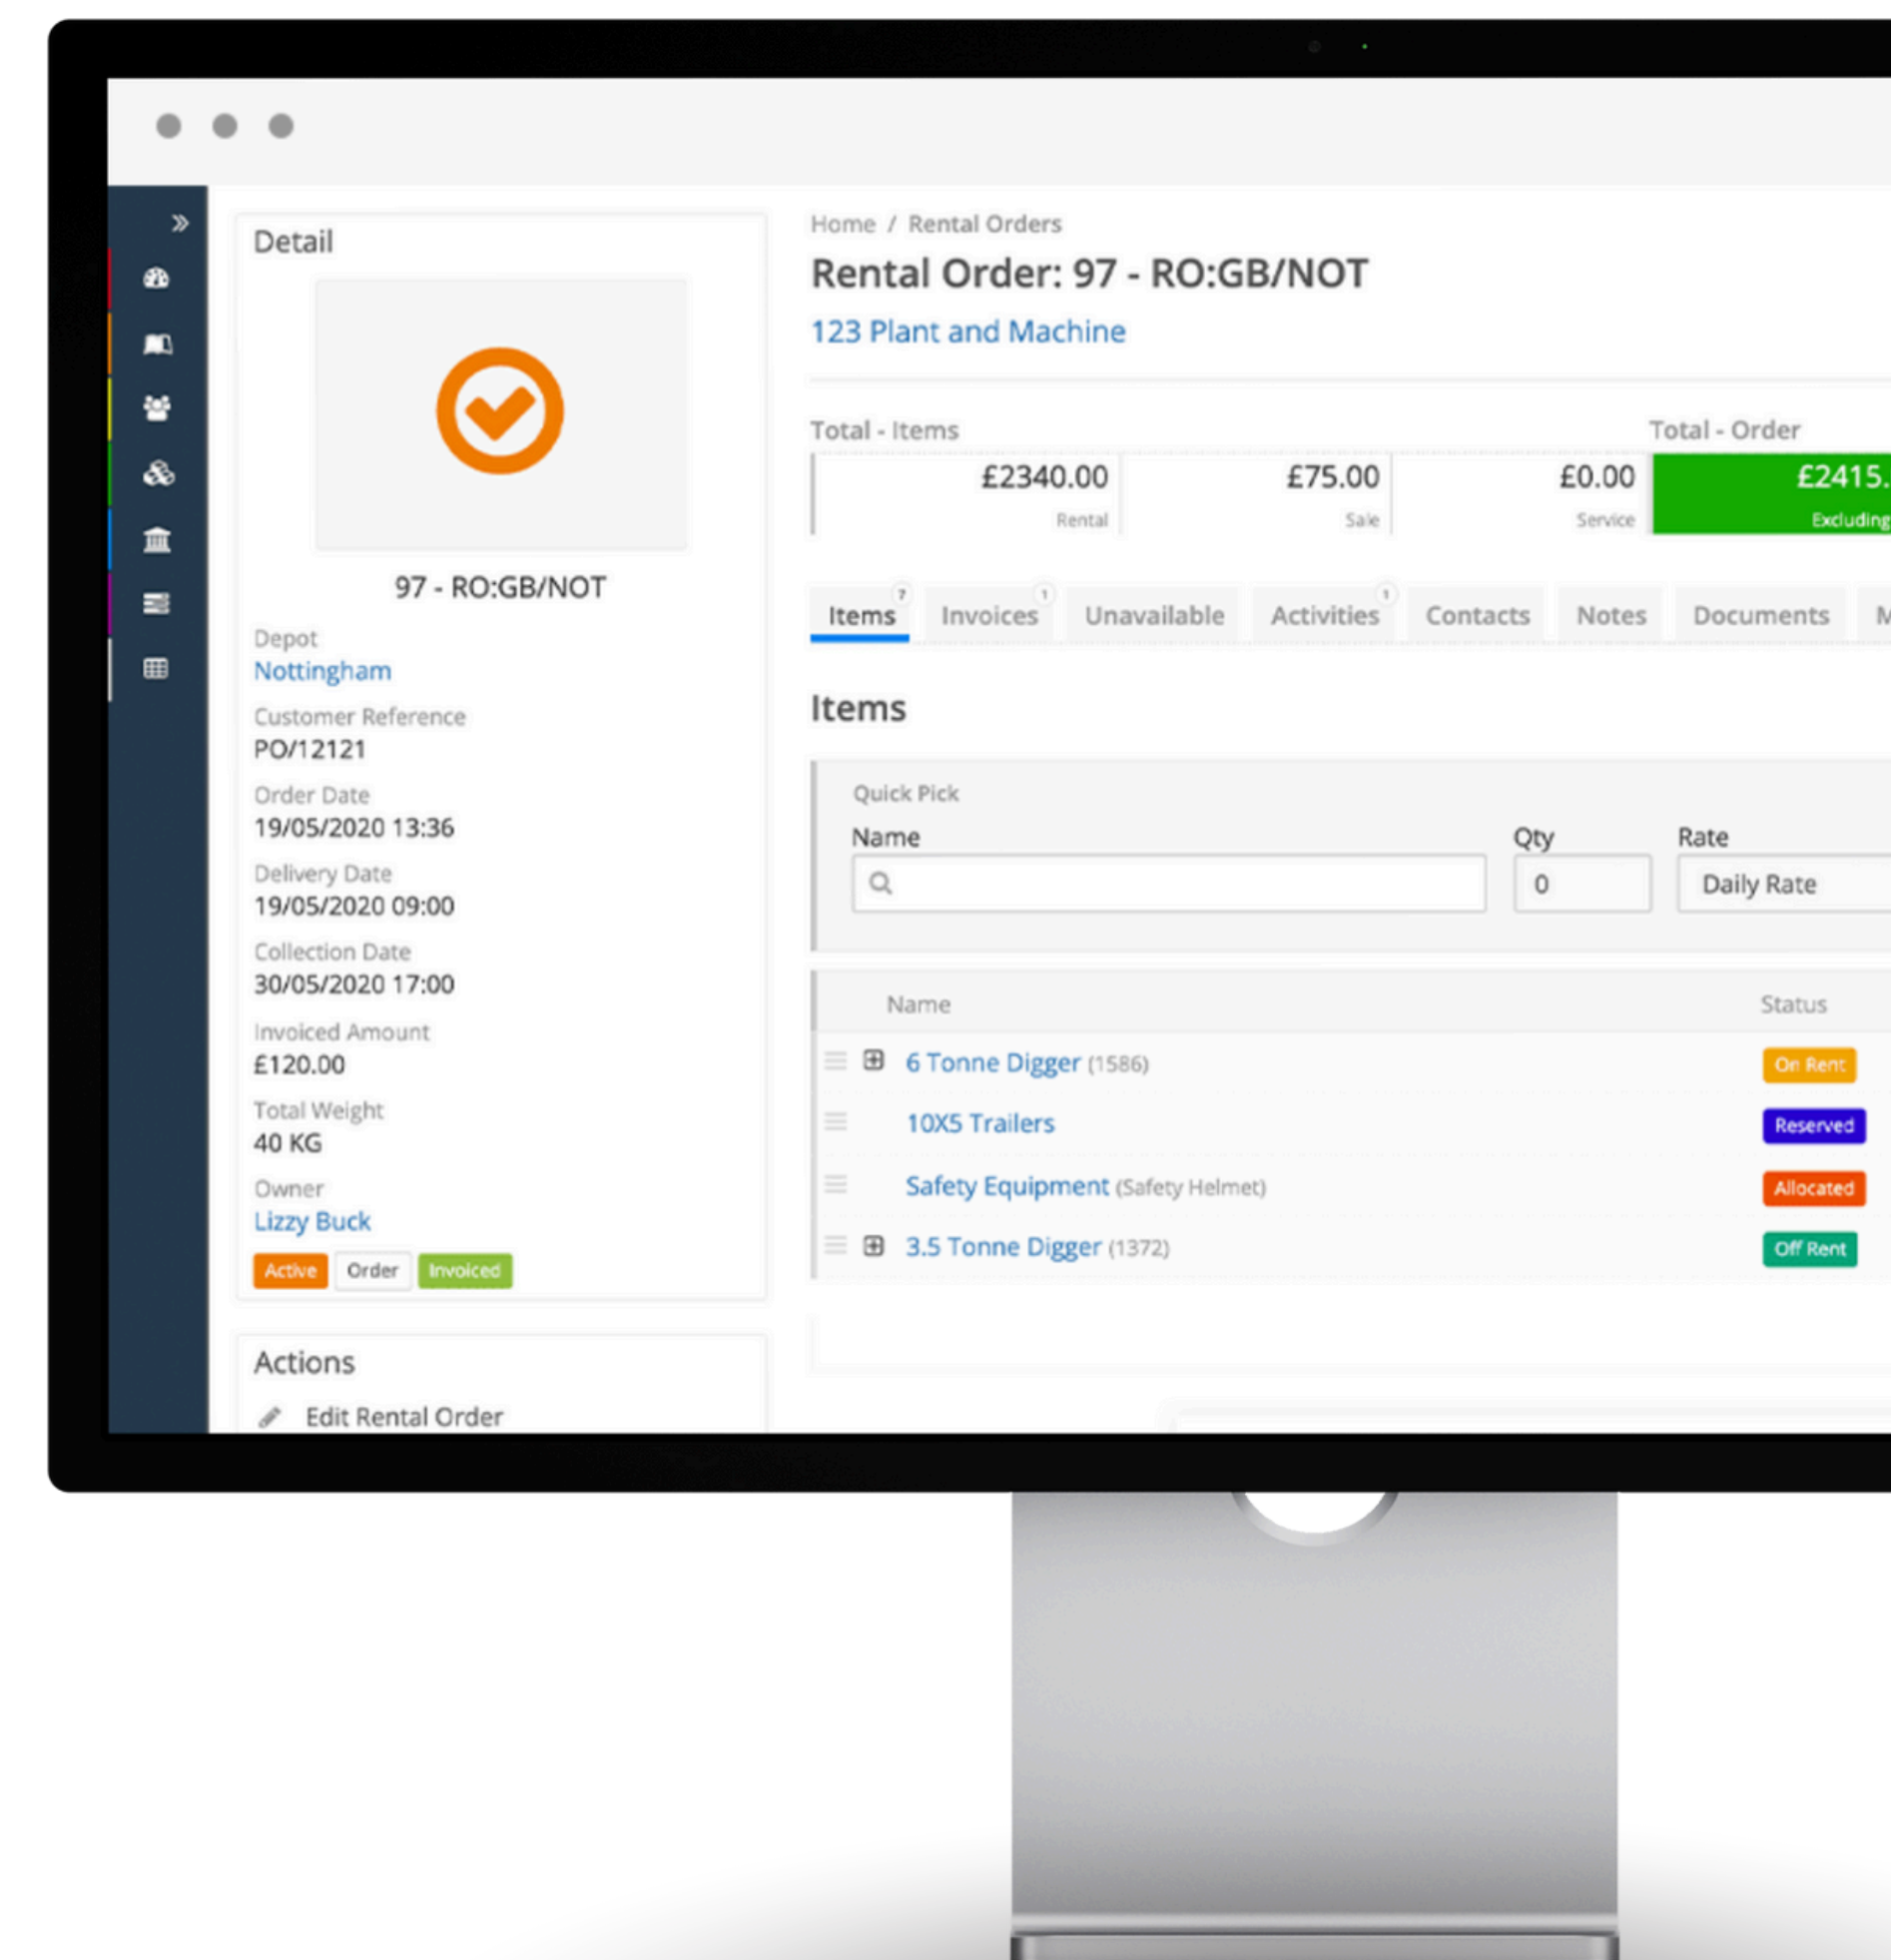

Keep up to date with your business with live BI dashboard reporting.

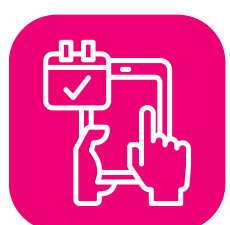

Create professional quotes and orders in seconds

OnRent Go helps you get quotes out quickly and process orders with confidence. Create detailed rental or sales orders from a single screen, check availability in real time, and include suggested accessories or consumables to maximise revenue.

Documents are branded, professional and ready to send by email. And with mobile POD capture, your team can record signatures and complete jobs from anywhere.

Features that streamline your sales team's order processing workflows:

Create rental and sales orders in seconds

Capture proof of delivery with digital signatures

View live availability with suggested accessories

Manage order changes with full audit trail

Send branded quotes and order confirmations by email

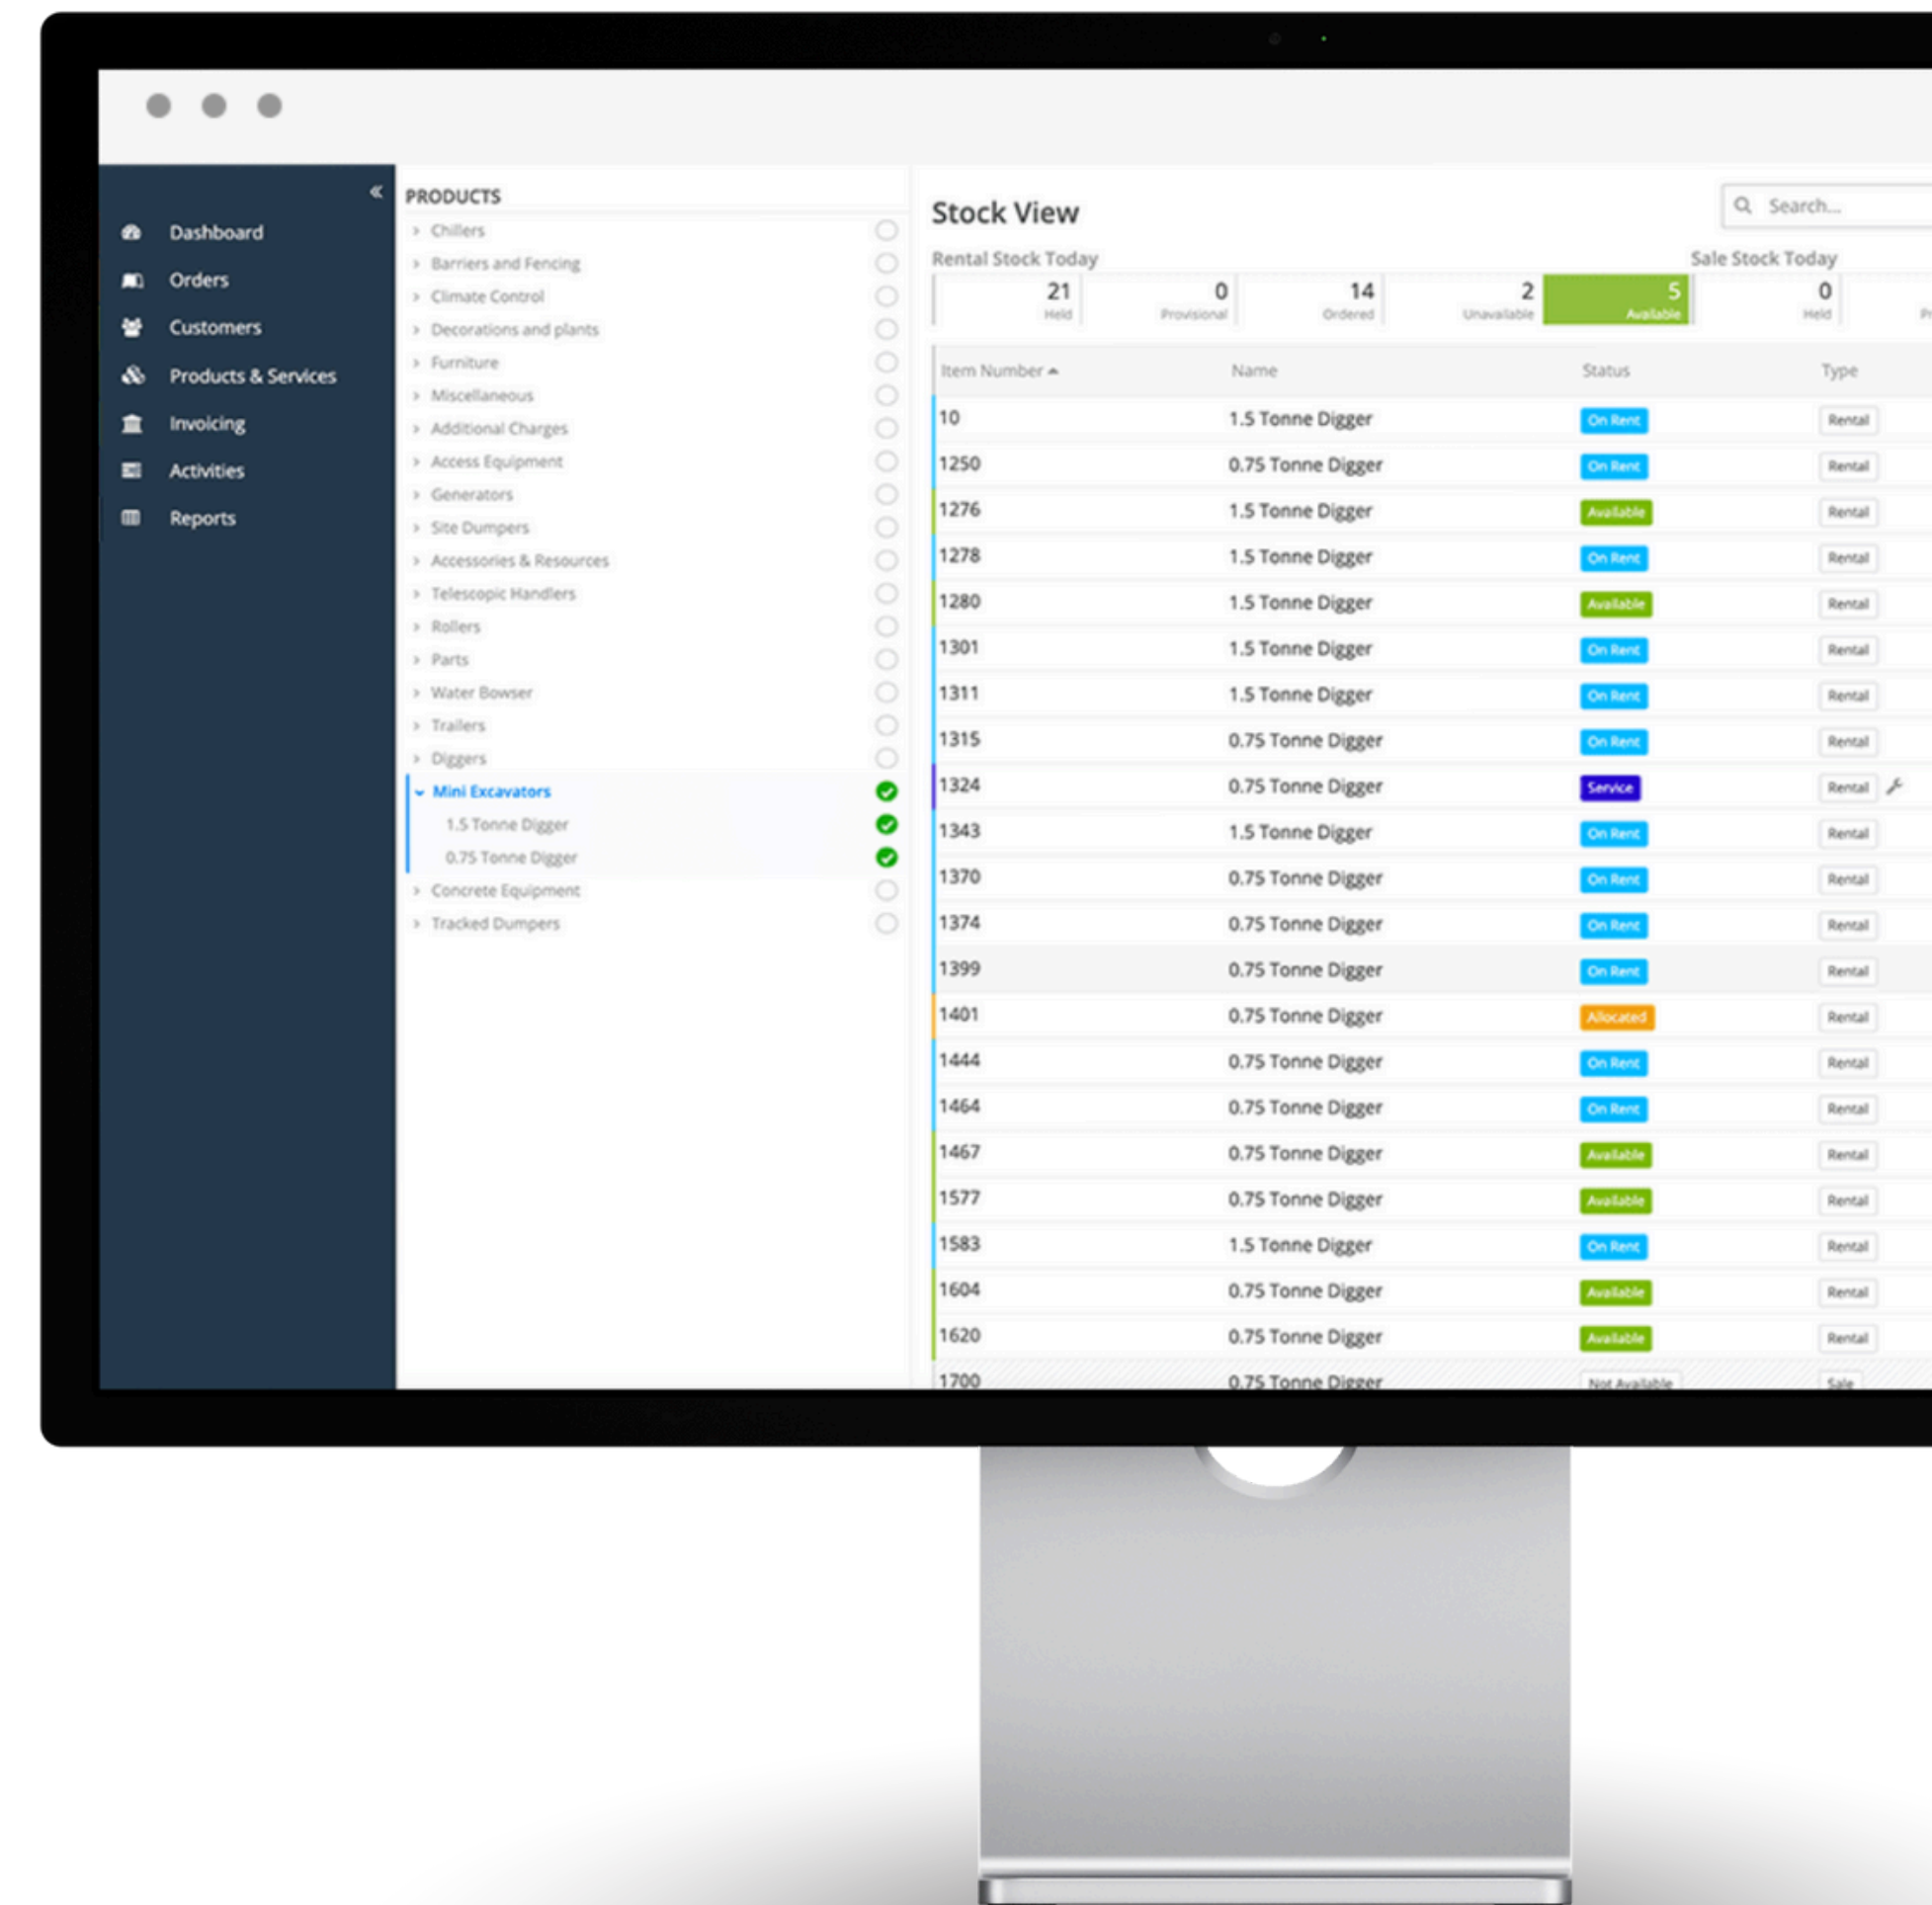

Link orders to customers, contacts and sites

Manage your equipment with **confidence, speed and accuracy**

Manage your hire and sales equipment with live status updates and full visibility from a single screen. Whether it's in use, prepped, out for service or ready to rent, OnRent Go keeps your stock accurate and easy to access.

Easily group items, add documentation or images, and browse your catalogue visually, so you can find and manage stock without wasting time.

Features that power smarter resource management:

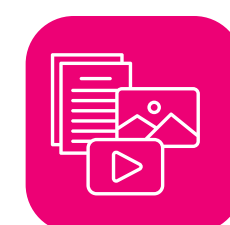

Track real-time availability and shortages

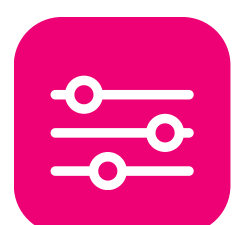

Categorise equipment visually and flexibly

Manage serialised, bulk and sales stock

Upload images, spec sheets and documents

Quickly search and filter items by type or status

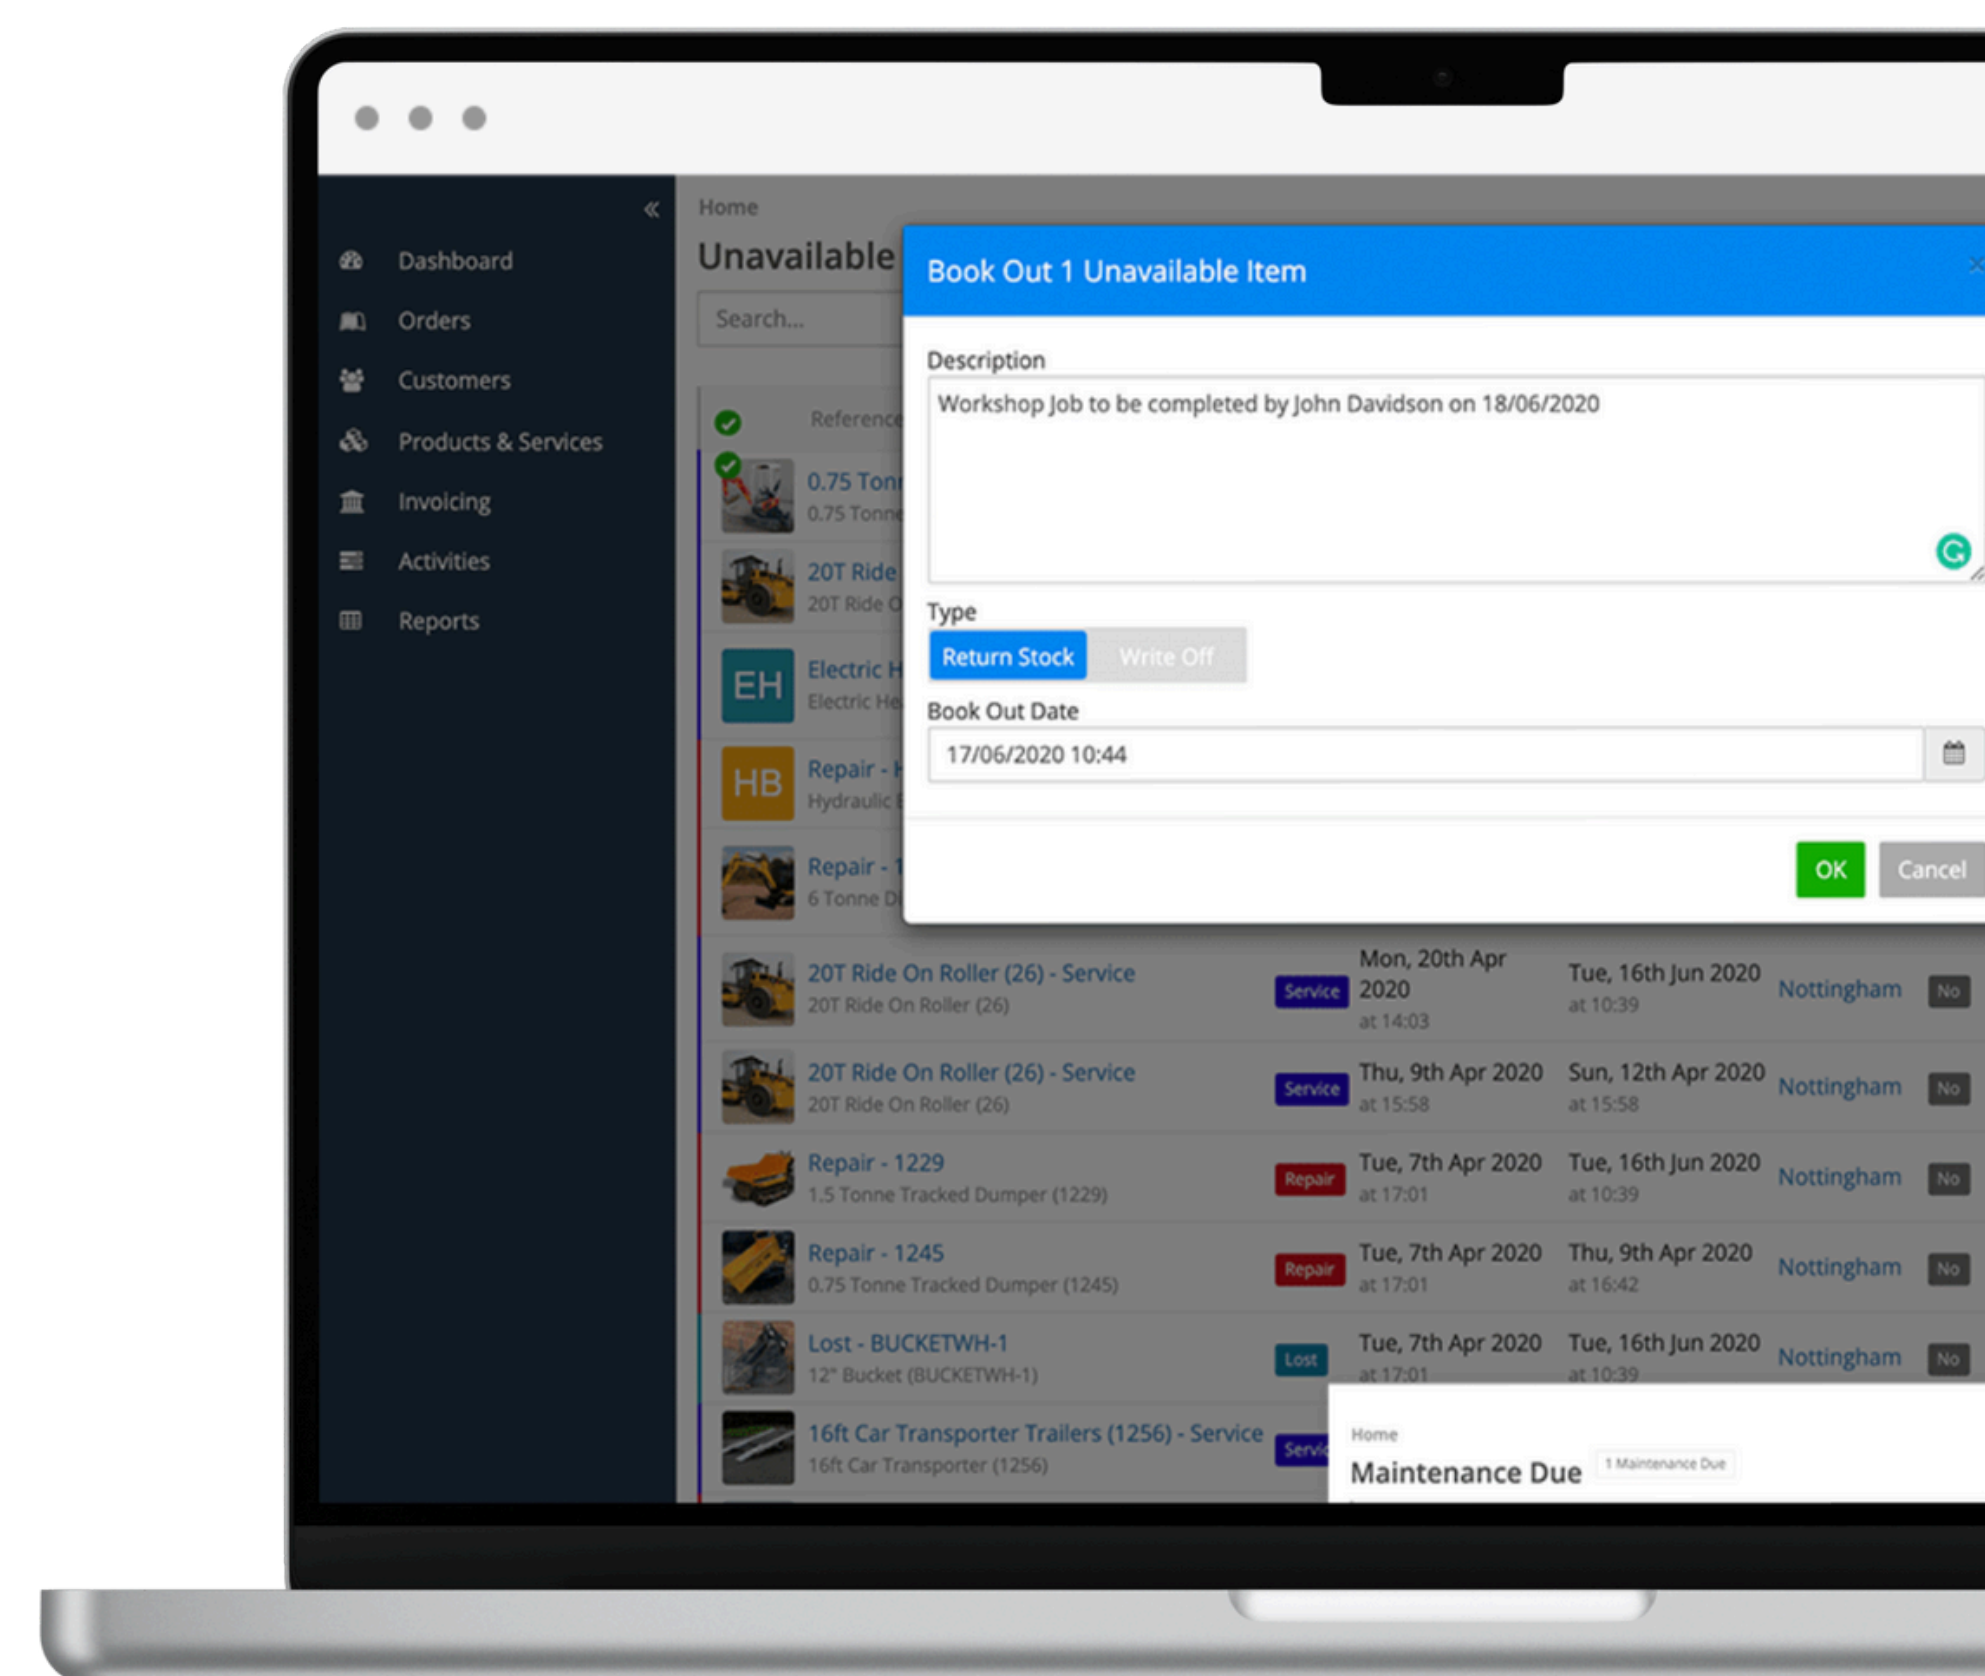

Book equipment into service directly from its profile

Ensure your equipment and assets are safe and ready to hire at all times with integrated workshop management

OnRent Go helps you stay on top of servicing and maintenance without relying on paper or guesswork. Create schedules, book repairs, and track due dates, all with clear visibility and simple reminders.

You can attach test certificates and log service history against each item, so you're always inspection-ready and never renting out unprepared equipment.

Features that optimise your equipment availability:

Schedule and customise maintenance plans

Book equipment into service directly from reminders

Track and store legal test certificates

Spot asset issues and high-risk customers with historical job insight.

Receive alerts for upcoming servicing

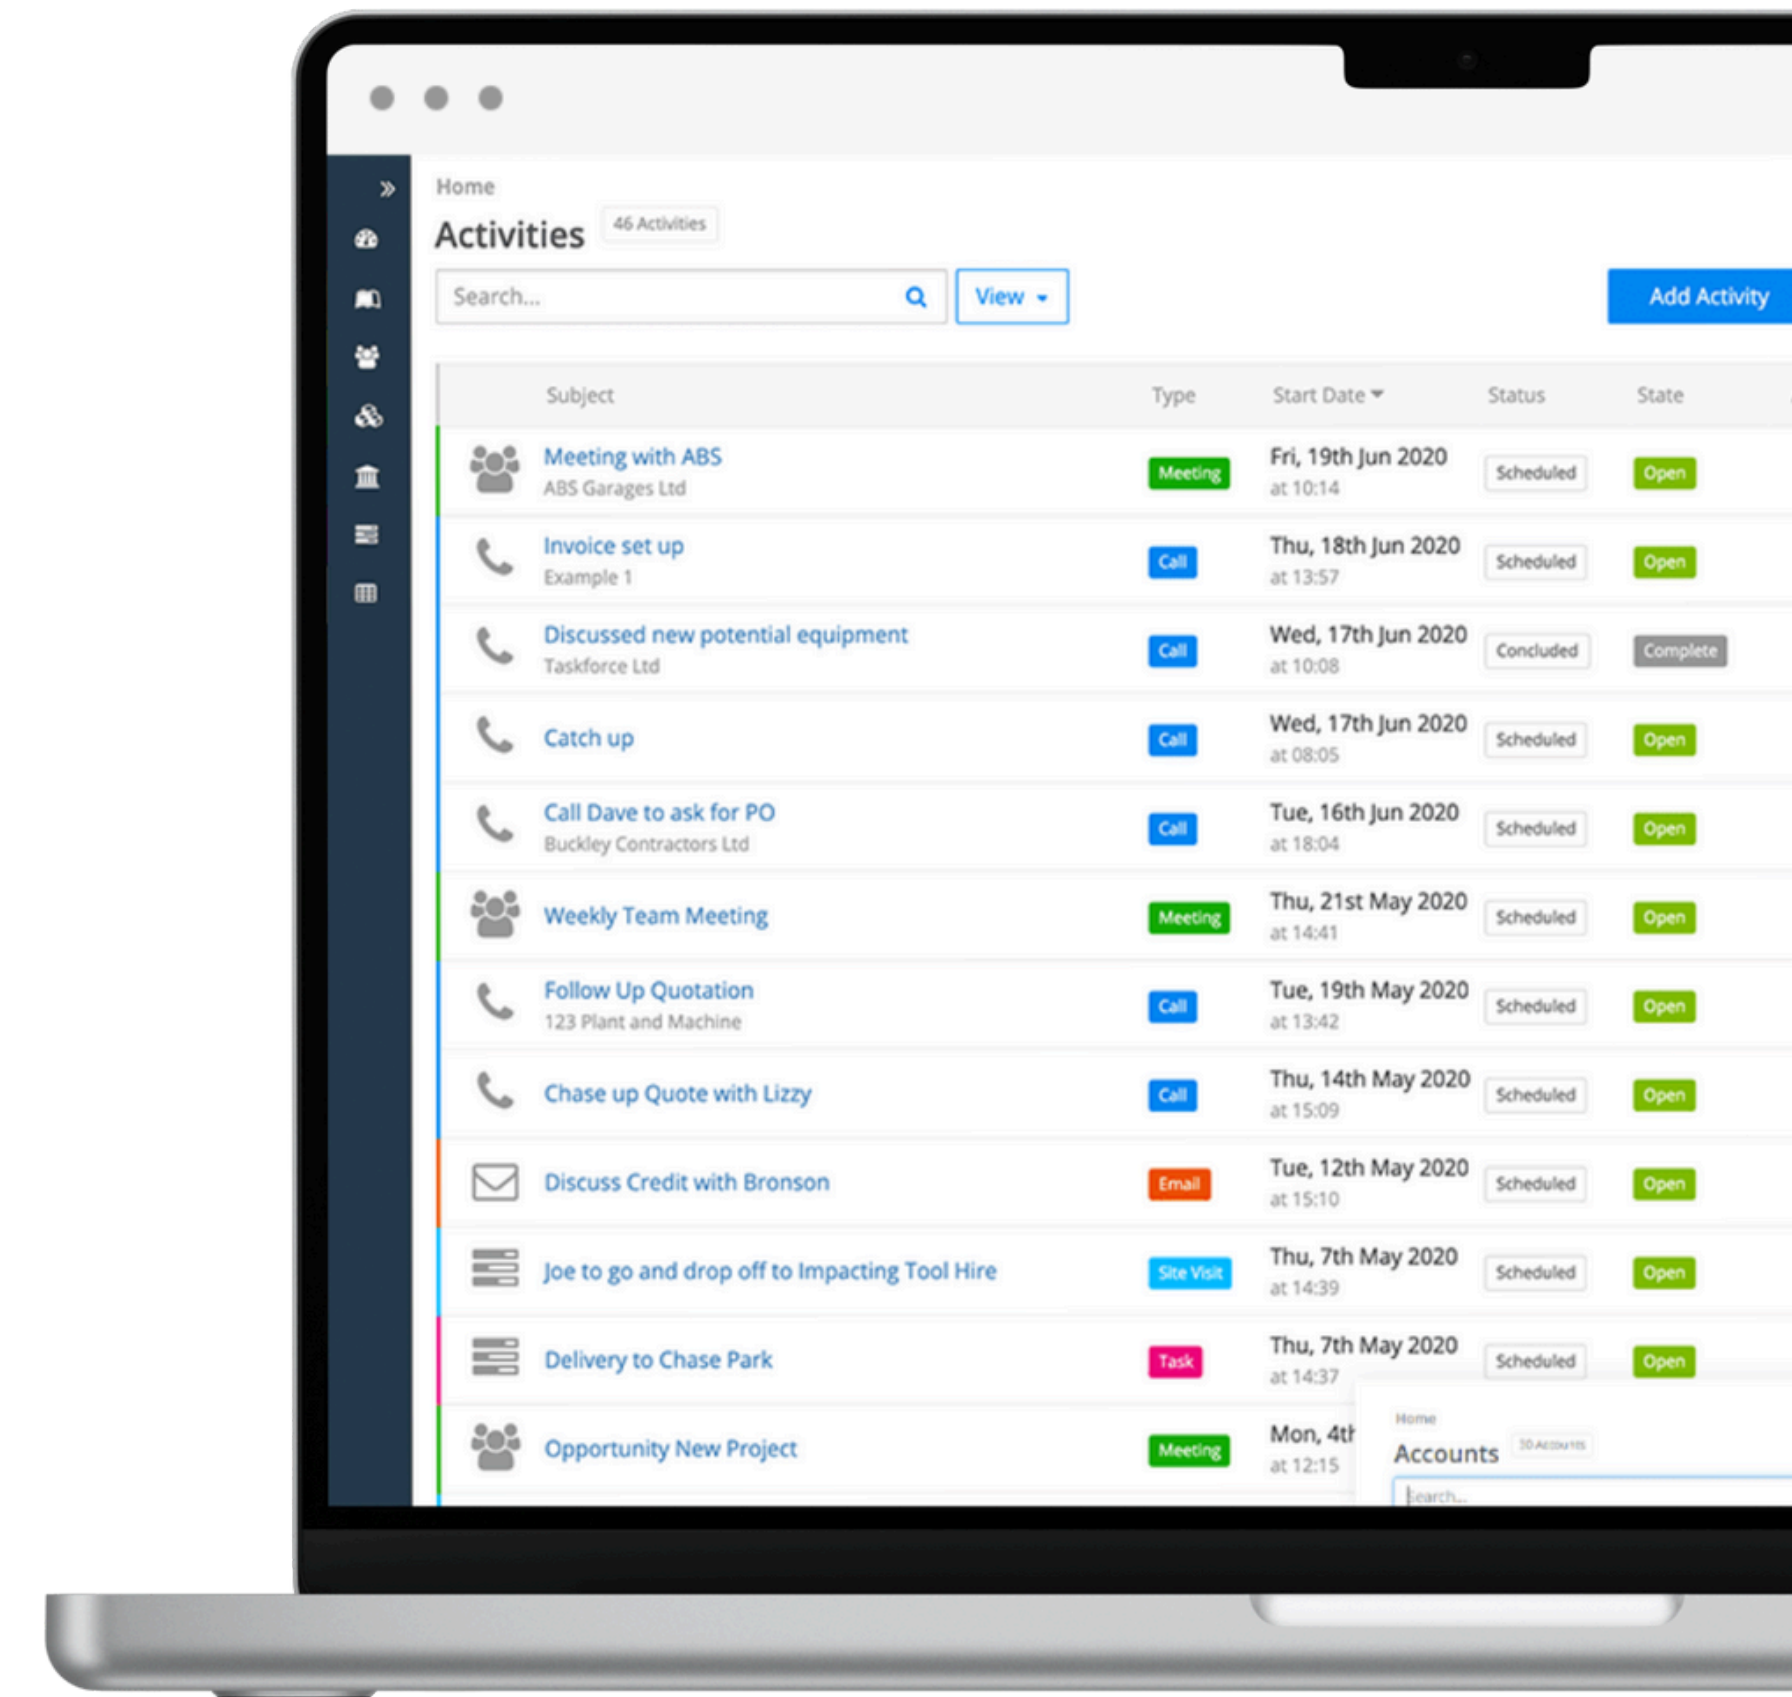

Raise POs and analyse workshop costs directly from each job.

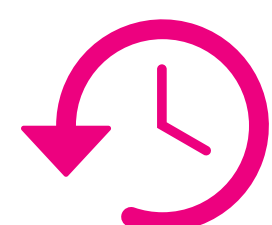

Every customer detail at your fingertips

With OnRent Go, managing customer relationships is simple. Track orders, activities, contacts and invoices from one central screen, with reminders to follow up on tasks or meetings.

From new enquiries to long-term accounts, everything's logged and searchable — so you can deliver better service and stay organised as your customer base grows.

Features that power smarter customer relationship management:

View customer history, orders, documents and invoices.

Use the calendar and timeline to track tasks and meetings.

Create reminders for follow-ups or daily admin.

Store contact details and track communication and outreach.

Segment customers, prospects and contacts into lists.

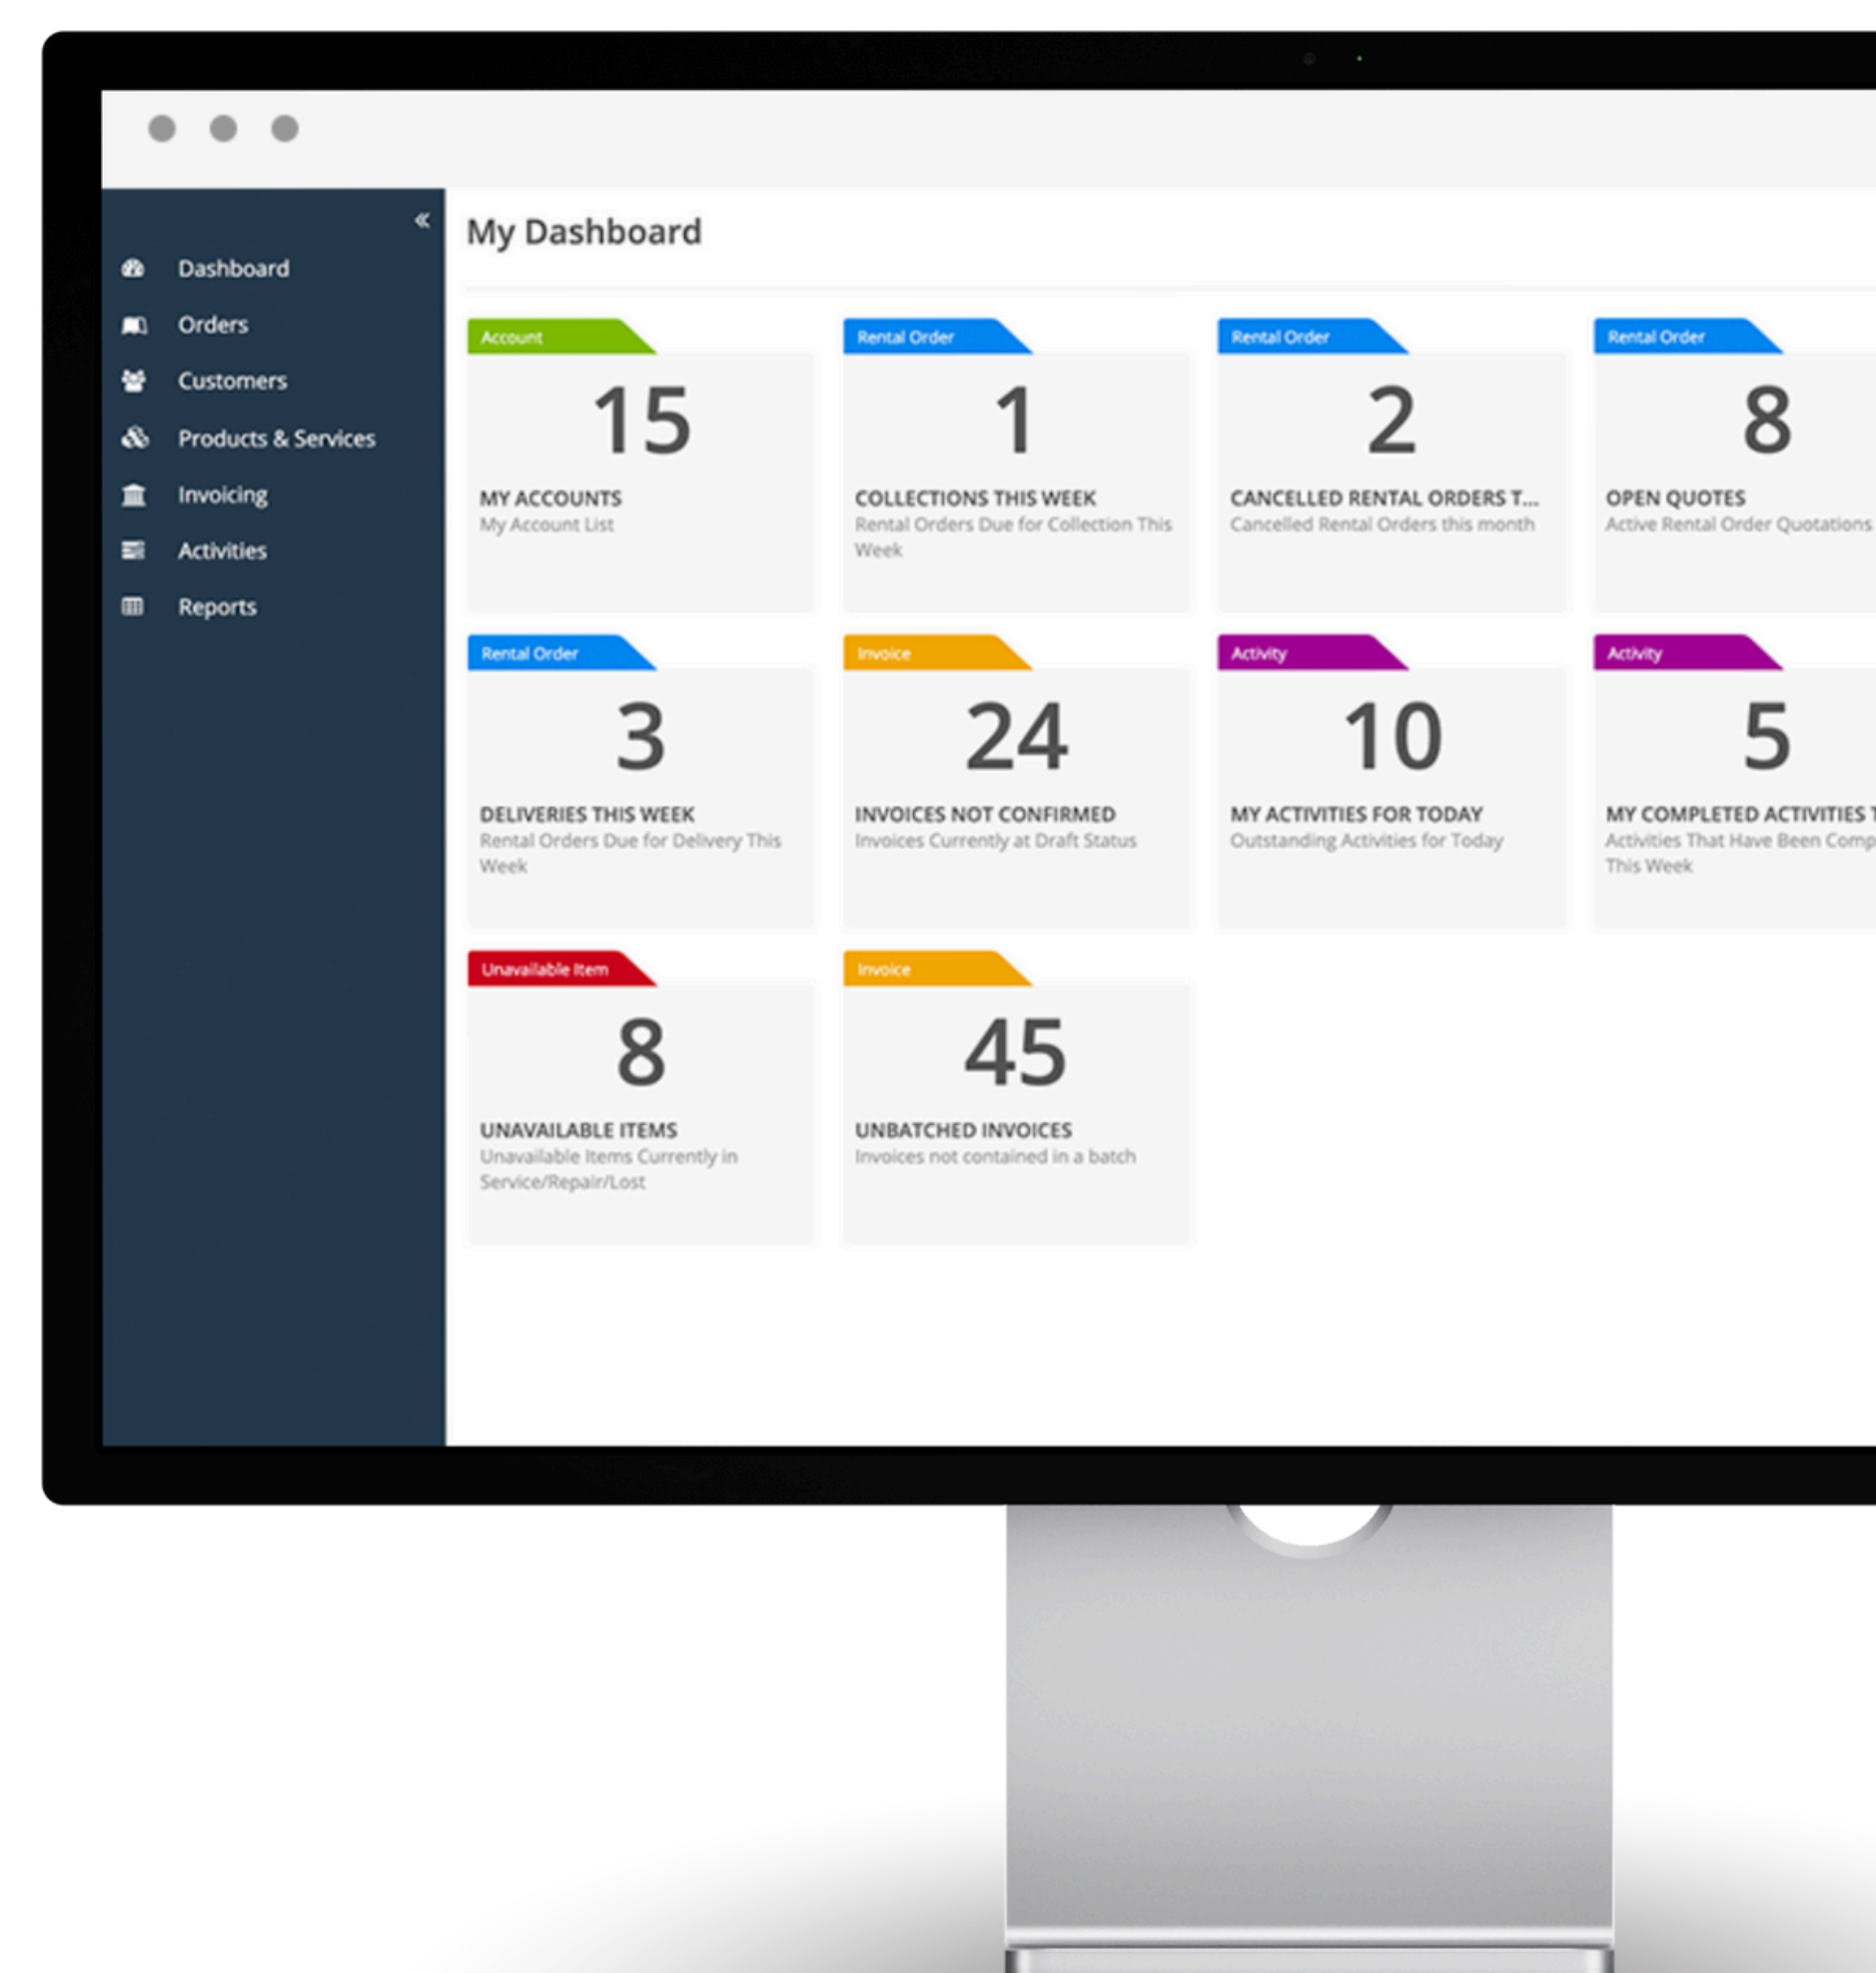

See a full 360° view of each customer account.

Connected finance and real-time reporting, without the admin burden

OnRent Go simplifies invoicing and finance, making it easy to bill accurately and get paid faster. Whether you're creating quick credits, sending professional invoices, or reviewing aged debt, it all happens in one connected system - standalone or fully integrated with your accounting platform.

Built-in dashboards and custom views give you real-time visibility of how your business is performing, from revenue and utilisation to outstanding invoices. And with rental-specific reports and daily email updates, you'll always know what's happening, without digging through spreadsheets.

Features for optimised financial management and business reporting:

Flexible invoicing, including drafts, batches and quick credits

Live dashboards and custom views with drill-down

Clear, branded invoice layouts

Specific reports on ROI, utilisation and financials

Accounting integrations with Xero, QuickBooks, Sage and Exact

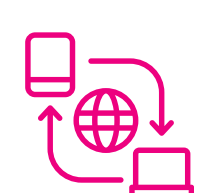

Track deposits, charges and customer balances with ease

OnRent in the Cloud: a fast, flexible and future-proof way of protecting your business, **at-all-times**

Whether we realise it or not, we all use the cloud to manage vital parts of our everyday lives. Online banking, sending emails and browsing social media are all examples of this. But why should you use the cloud for your business?

Simple, server attacks are on the rise and Klipboard can help you prevent it. The last few years have proven we need to be equipped with agile, secure and future-proof systems, and the cloud provides just that. As well as other benefits...

As well as providing increased security it will allow you to focus on strengthening your rental operations, providing a better customer experience and increasing your ROI - from any device, anytime, anywhere.

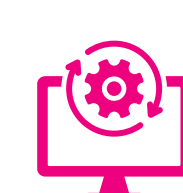

Access your system anytime, anywhere

Whether you're at home, in the yard or out on-site, OnRent Office keeps you connected. View availability, check job status, respond to customer enquiries and access quotes from any device, wherever you are - no delays, no downtime.

Cut overheads, delays and admin waste

Cloud hosting eliminates manual updates, reduces infrastructure costs and streamlines every part of your rental operation. Spend less time fixing and more time spent delivering value to your customers.

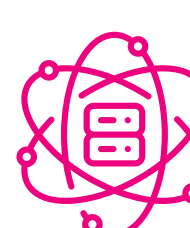

Get the latest features automatically

New tools, improvements and security updates are rolled out automatically, without downtime or disruption. No manual installs, no version mismatches, just instant access to the latest functionality for every user, across every device.

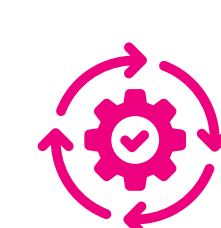

Scale fast without outgrowing your system

As your business grows, the platform grows with you. Add users, depots or integrations without IT bottlenecks or hardware limits. Whether you're opening new branches or expanding into new regions, OnRent Office stays ready.

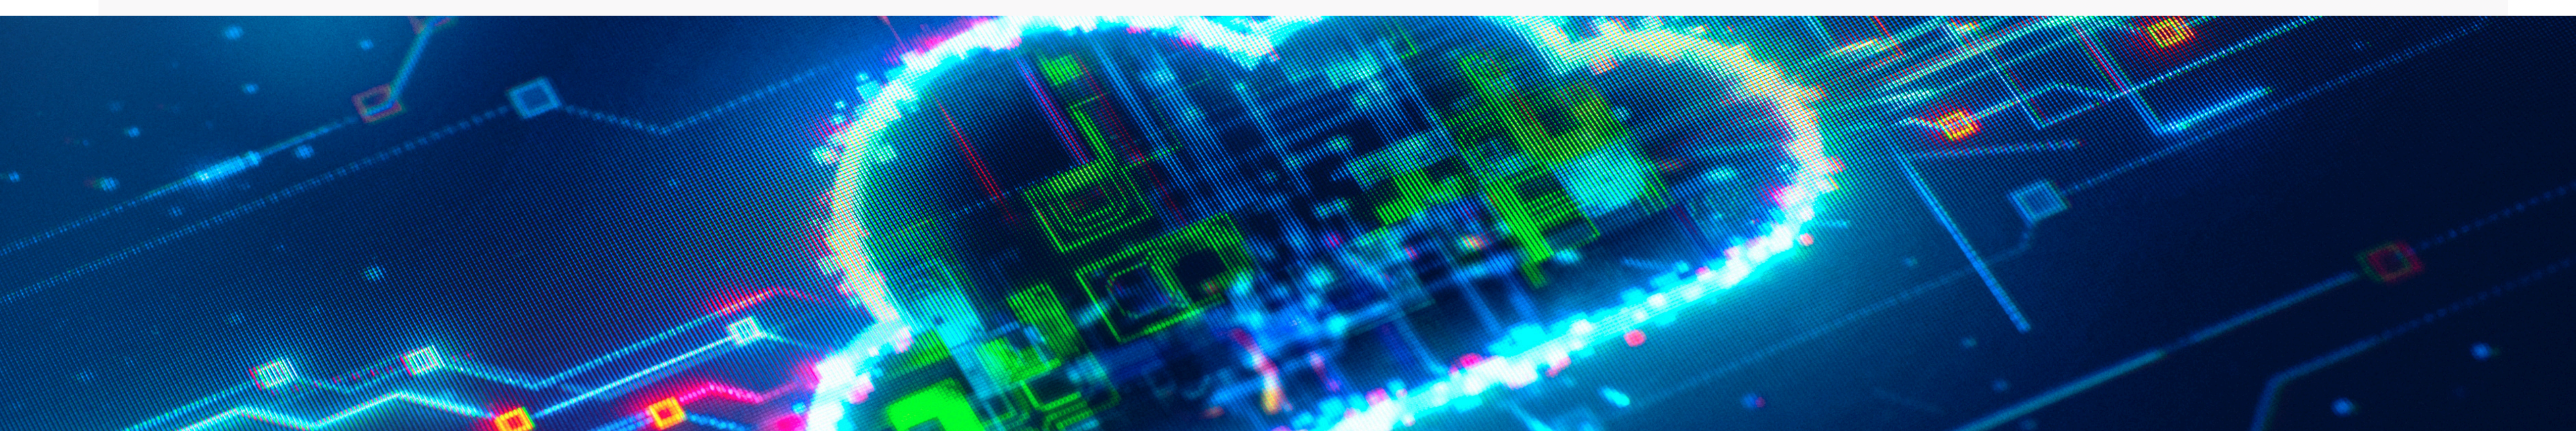

Protect your data, no matter where you are

Data stays safe even if devices are lost, stolen or damaged. Secure cloud storage and user access controls mean you stay in control, with remote wipe capability and built-in disaster recovery as standard.

Run smarter without replacing infrastructure

Unlock the full power of OnRent Office without major IT investment. The cloud delivers enterprise-grade performance, scalability and reliability, without the cost, maintenance or constraints of legacy hardware.

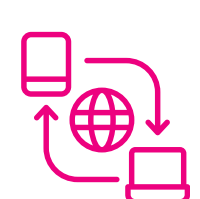

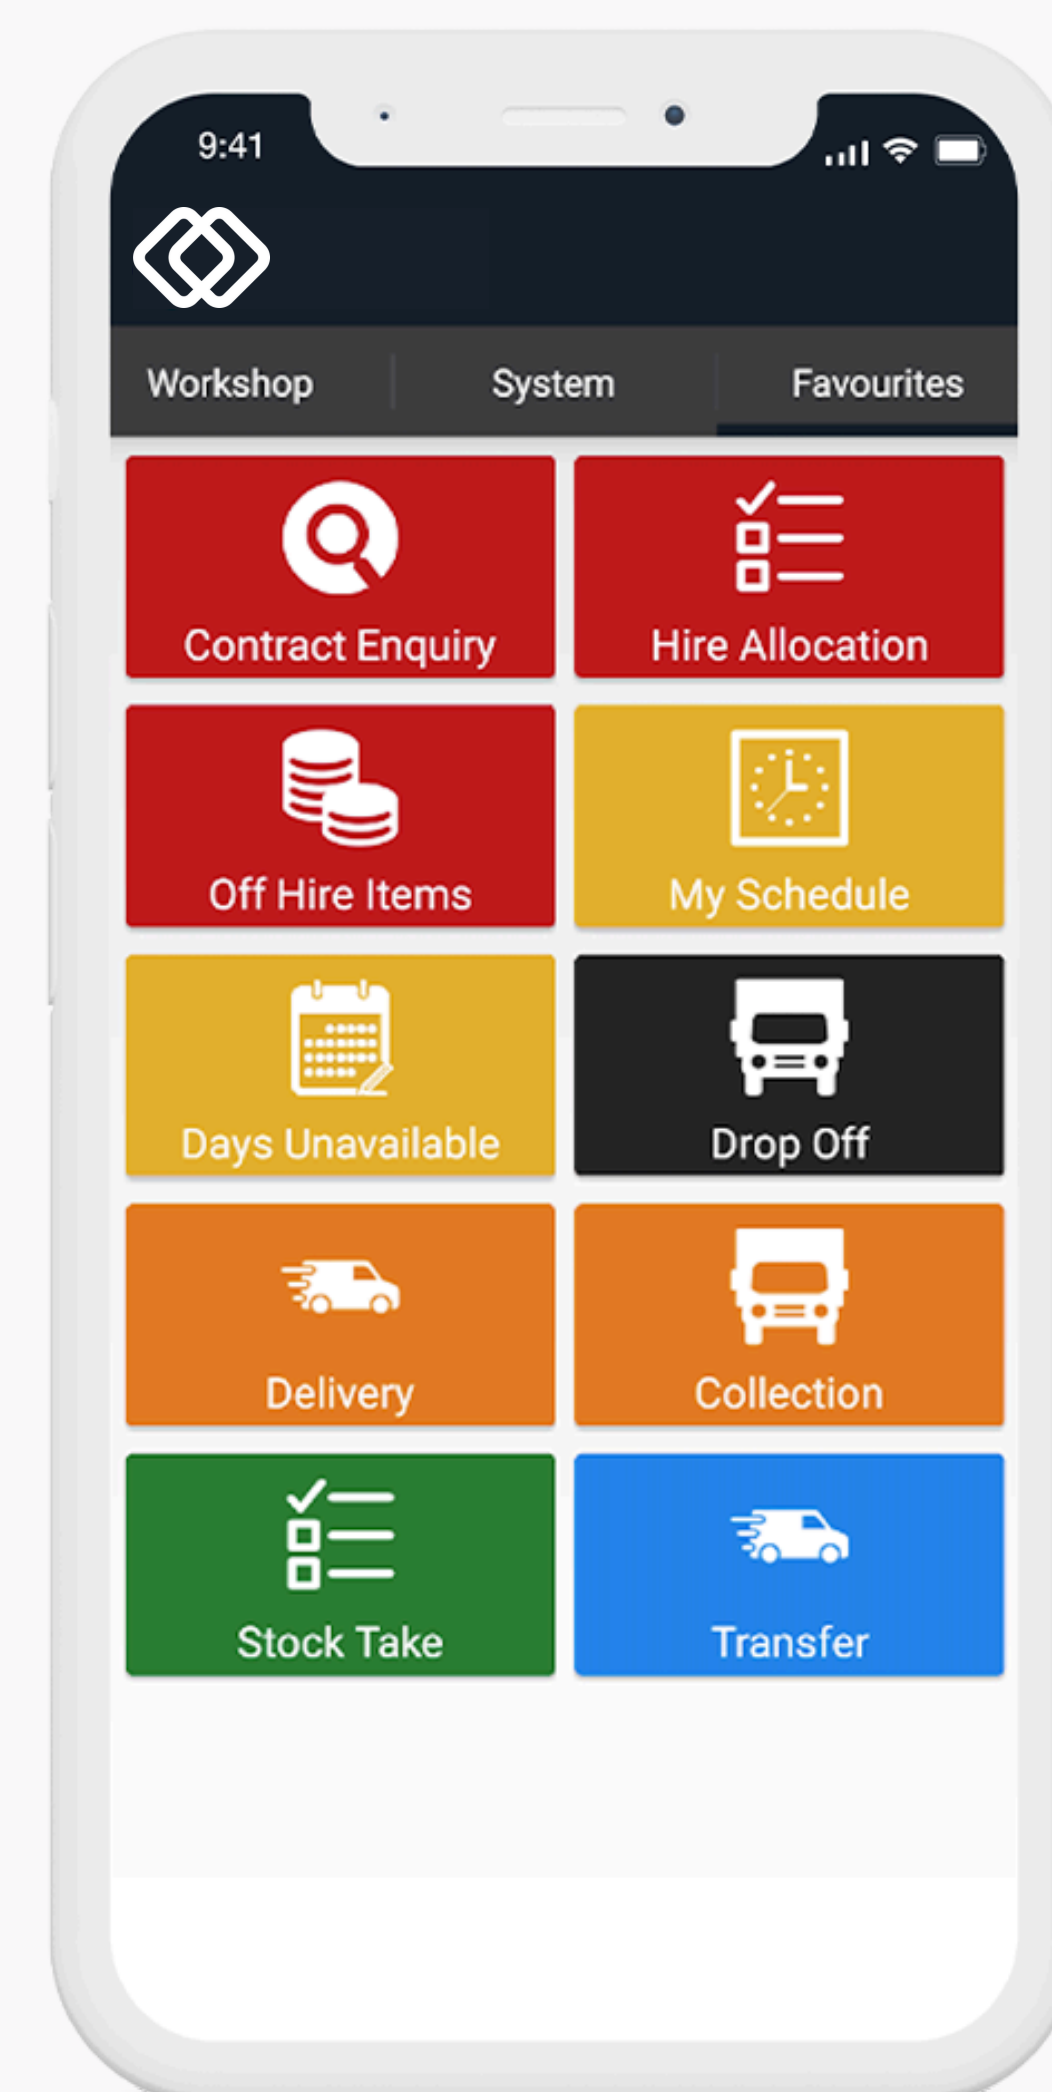

OnRent mobile

With OnRent Mobile your team can manage equipment, servicing and delivery tasks without being tied to a desk.

From allocating equipment and scanning items, to capturing photos, e-signatures and completing digital forms - everything happens in real time, from any location.

Whether you're offloading at a customer site, inspecting equipment in the yard, or logging a repair job, your team always has the tools they need to work efficiently. And with full offline capability, OnRent Mobile keeps your jobs moving even when your signal lets you down.

Work offline or in real-time

Whether you're on-site with poor signal or connected in the yard, OnRent Mobile lets your team capture updates, log jobs and complete forms. Offline mode syncs automatically when back online, so nothing gets missed.

Send push notifications to customers and staff

Keep customers, drivers, engineers and warehouse teams informed in real time. Trigger instant push notifications when jobs and deliveries are assigned, updated or completed, reducing miscommunication and improving response times.

Automatically send documents to customers

Speed up admin and improve service by automatically sending signed delivery notes, job sheets and completion forms to your customers the moment a job is done, straight from the app.

Out-the-box integration with Google Maps

Make it easier for your mobile teams to find job locations fast. With built-in Google Maps, operators can navigate to sites and view location data directly within the app.

Manage and process timesheets via the app

Log hours worked directly in the field, without chasing paperwork. Timesheets captured in OnRent Mobile can be reviewed and authorised in seconds so they're ready for payroll, billing and reporting.

View operator and resource schedules

Give your team full visibility of who's doing what, where and when. OnRent Mobile lets field staff see assigned jobs, upcoming shifts and task details so they can stay on track without constant check-ins.

OnRent Go: Integrate with your existing tech stack:

OnRent Go works alongside the systems you already use, including accounting, logistics, eCommerce and communications third-party software. Seamlessly connect your hire workflows with the rest of your business using ready-made integrations and open API support.

For accounting, payroll, HR, ERP, payments and more. Whether you're a start-up or a global enterprise.

Web mapping that offers satellite imagery, street maps, 360° street-view, real-time traffic conditions, and route planning.

Take card payments instantly with built-in integration to Klipboard Money.

For small businesses and self-employed workers to manage their accounting processes.

Online accounting for businesses to manage invoicing, bank reconciliation, bookkeeping and more.

OnRent Go: Clipboard Rental solutions feature matrix

Whatever your hire business requirements Clipboard has the solution for you. Designed to be scalable, they will grow as you grow, giving your rental business the fit needed for now and for the future.

OnRent Go: Getting started.

At Klipboard, our experienced rental specialists are here to support you from day one. We take the time to understand your business, then guide you through setup, training and beyond, so your system works exactly the way you need it to.

Consultation and demonstration

First, we will find out what you are looking for in a hire software solution and talk through your key objectives. We'll consider your individual business requirements and identify the benefits you will enjoy from using Klipboard solutions and look at the ROI, ensuring you get the most out of your system.

Implementation, project management and training

Our specialist team will be on hand all the way through your project. We'll provide you with practical lessons and training and agree on your objectives and milestones to ensure deadlines are met, ready for live. With decades of real-life hire exposure, you can rest assured that you're in good hands.

Support from industry experts

Our account managers are here to help you get the most out of your Klipboard solution, with tips and advice on new features and updates. Our dedicated helpdesk team are always on hand by phone or email to assist, and our customer portal gives you access to help files, training videos and much more.

Ongoing product development

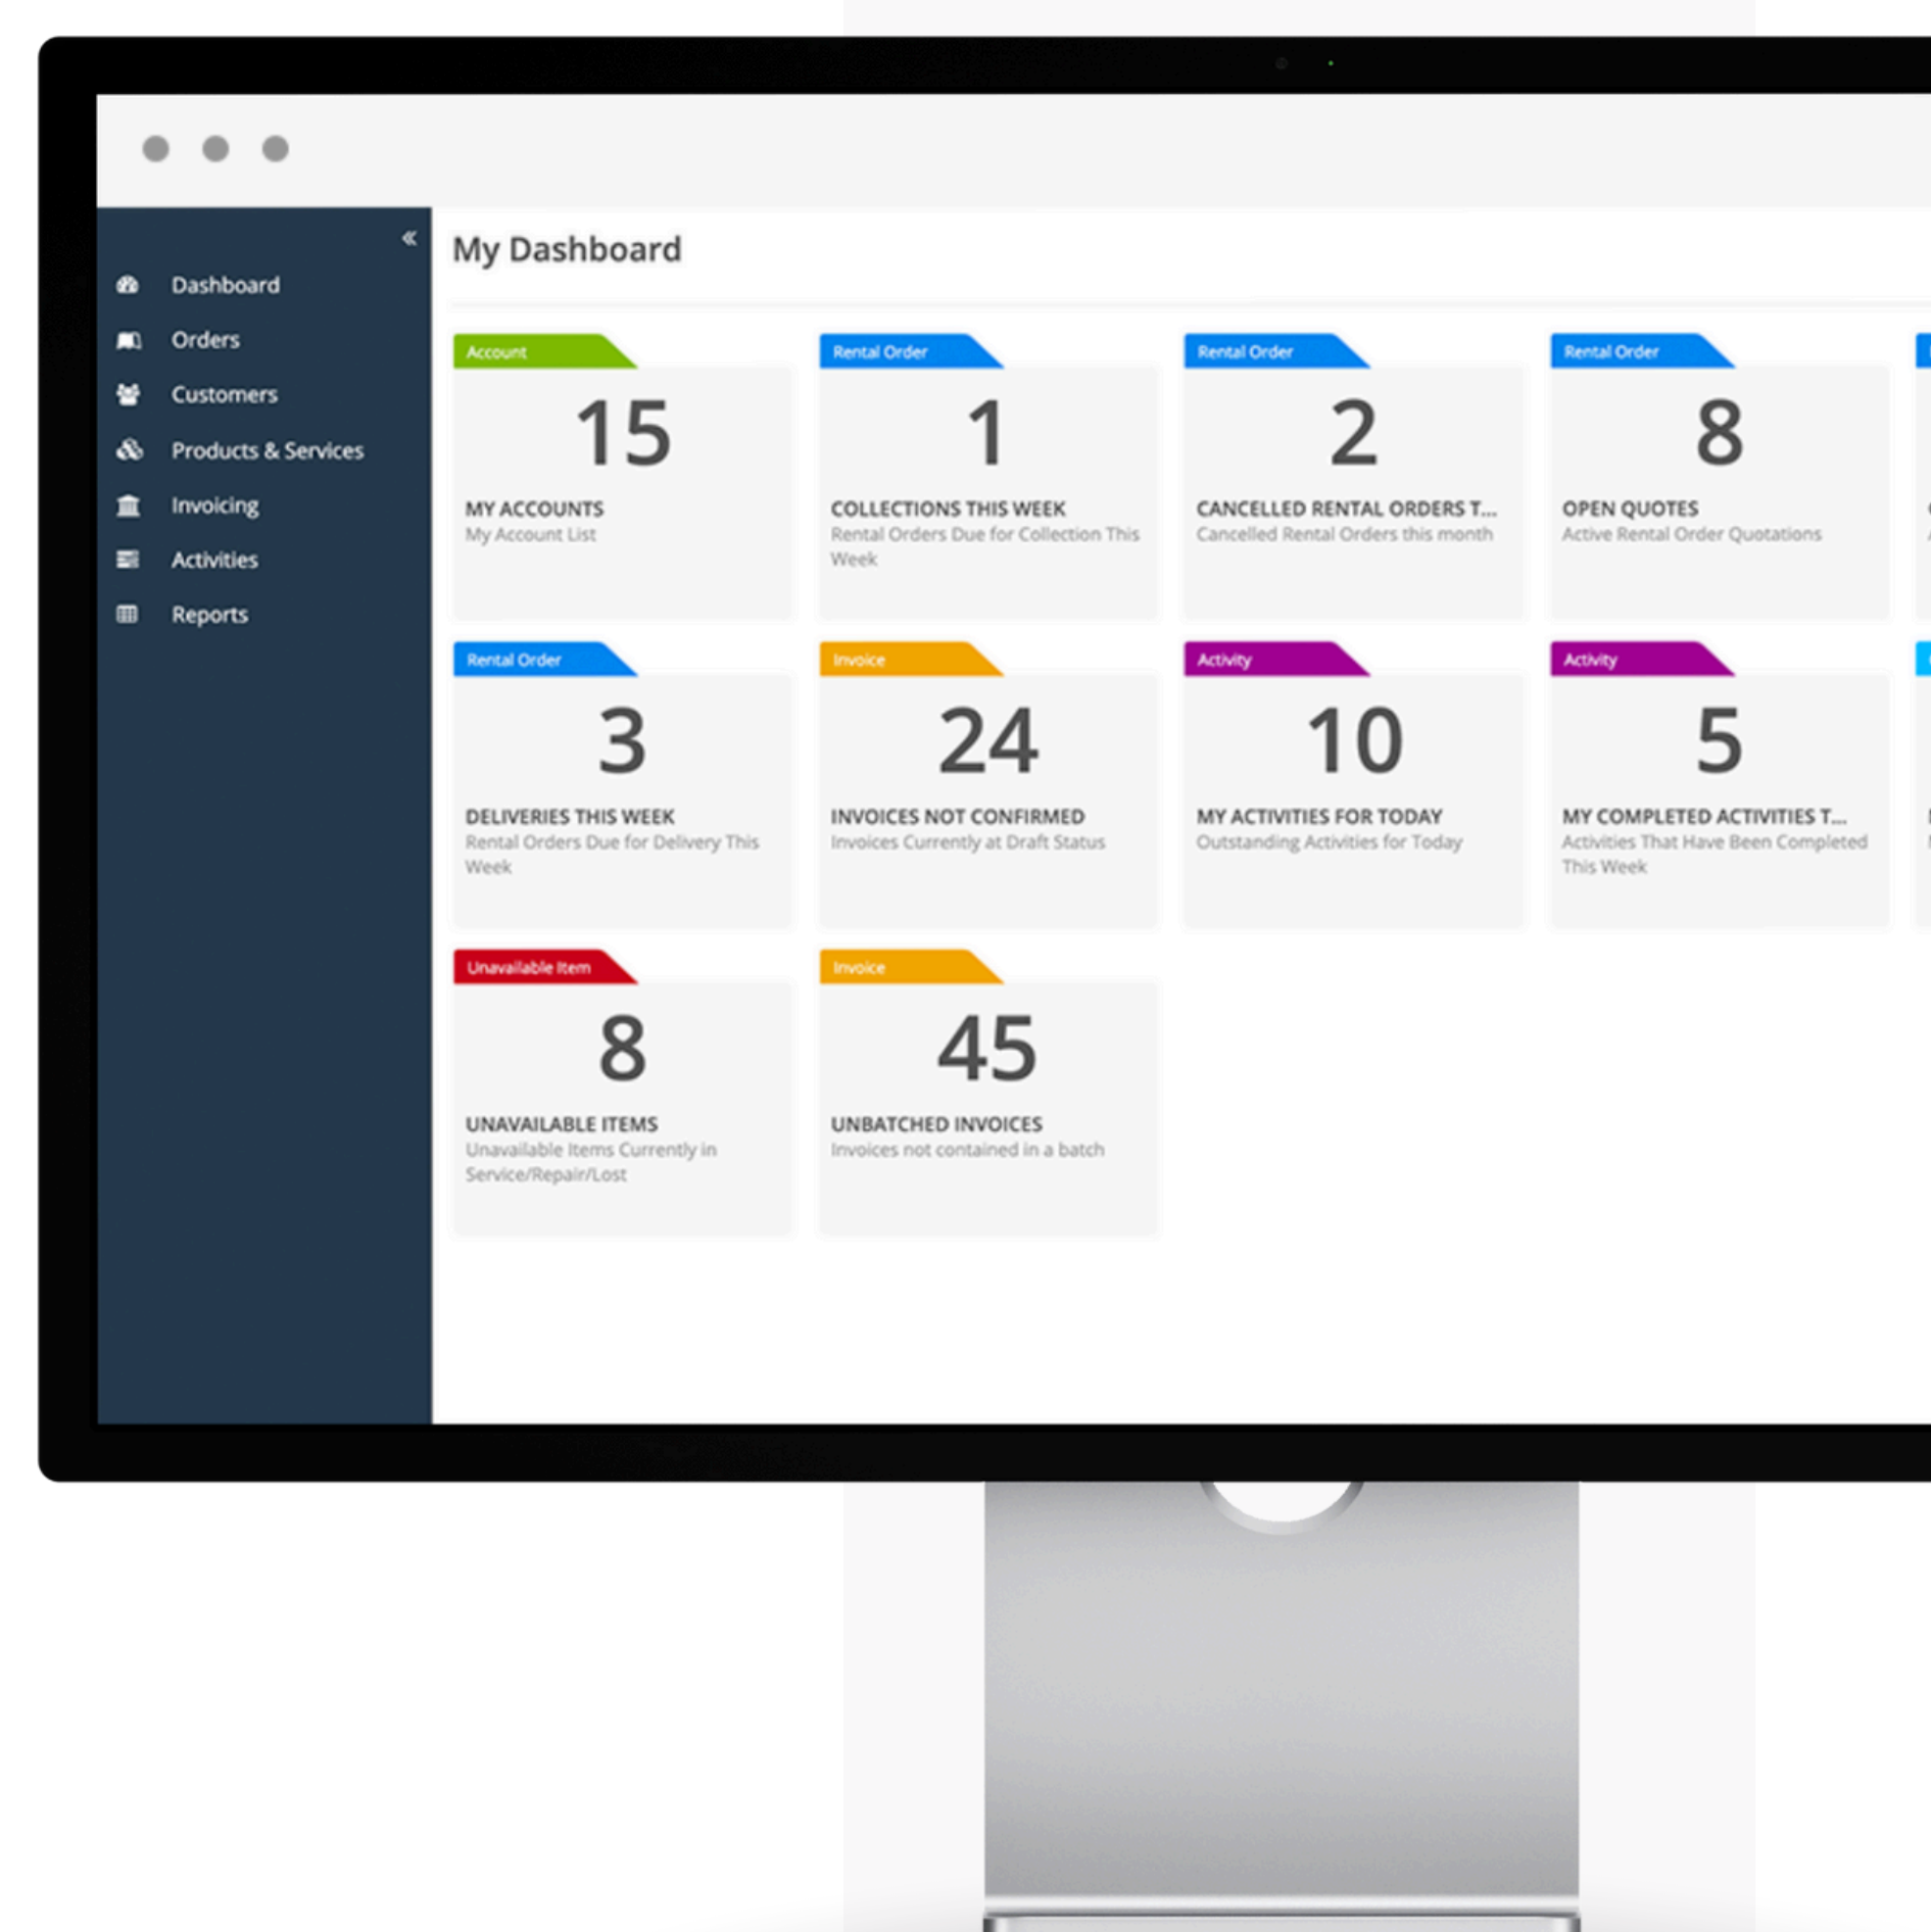

We have an expert team dedicated to developing innovative new solutions using cutting edge technologies. As a result, we're constantly improving and adding new features to our software that enable you to embrace new functionality and technology as you need it. That way, you stay ahead of your competitors.

Don't just take our word for it...

We chose OnRent Go as it's very simple to use, almost like the iPhone of the hire systems world! We needed something straightforward and simple but could be tweaked to suit our needs. OnRent Go has massively helped our business as all of the administrative work is now done by one person, enabling the team to deal with the growing customer base with ease."

PW Hire

Sustainability at Klipboard.

At Klipboard, sustainability isn't just a commitment - it's our way of doing business. And, we're driving it forward by partnering with industry leaders, innovating through technology, and embedding eco-conscious solutions into everything we do.

Our big green goal:

We've pledged to cut our Scope 1 & 2 Greenhouse Gas (GHG) emissions by 25% by 2030. It's ambitious, but then again, so are we!

Progress towards our target:

	Scope 1 emissions (tonnes CO2e)	Scope 2 emissions (tonnes CO2e)	Combined emissions (tonnes CO2e)	Carbon intensity (tonnes CO2e/£m revenue)	Carbon intensity (tonnes CO2e/employee)
 Financial Year 2023 (baseline)	35	602	637	4.16	0.47
 Financial Year 2024	50	552	602	3.56	0.41

The data above shows a 5.5% reduction in absolute Scope 1 & Scope 2 emissions over a 12 month period with a 14.4% reduction in Carbon intensity (tonnes CO2e/£m revenue) over the same period.

Note:

- * Scope 1 emissions refers to all direct emissions from owned or controlled sources, including onsite generation of electricity & heating.
- * Scope 2 emissions refers to indirect emissions from the generation of purchased electricity, heating & cooling.

By 2026, all of our major UK offices will be powered by 100% renewable energy.

We now generate solar power on-site at our offices in Johannesburg, Nottingham, and Stellenbosch.

We're retrofitting offices with sustainable lighting, heating & cooling, with local suppliers wherever possible.

We're investing in, and supporting forest restoration in the Western Cape.

At Klipboard, doing the right thing isn't just a choice - it's who we are. Sustainability, fairness, and transparency shape everything we do, from minimising our environmental impact to supporting our people and communities. It's not just good business; it's our commitment to the future.
