

AI for Distribution: Your Distribution business. Finally connected.

Faster answers. Less searching.
Smoother day-to-day operations.

The Reality

Most distribution businesses are not short of information, they are short of time.

Teams spend too much of the day:

- + Checking stock across branches.
- + Reviewing pricing and margins.
- + Chasing order updates.
- + Building reports.
- + Switching between systems.

Individually, these tasks seem manageable. But repeated throughout the day, they slow decisions, affect service levels and create operational drag.

A More Practical Approach

Klipboard AI is embedded directly into ERP One and ERP Go.

Instead of navigating screens or building reports, teams can ask questions in plain language and receive answers instantly – using the live operational data already inside their ERP system.

No separate dashboards, no disconnected AI tools, just faster insight inside the workflows your team already uses.

Trust & Security

Trust	Security
Operates within your Klipboard environment.	Aligned with established product security and access frameworks.
Role-based permissions respected.	Users only see information they are already authorised to access.
Audit and governance maintained.	Existing governance structures remain in place.
Embedded capability.	Built into ERP One and ERP Go, not a third-party add-on.

How Klipboard AI Supports Distribution Teams

+ Find Answers Faster

Get instant visibility across stock, customers, orders, pricing and operational performance.

+ Protect Margins

Surface pricing inconsistencies, discount trends and margin pressure earlier.

+ Improve Operational Visibility

Identify stalled orders, slow-moving stock and operational exceptions before they become bigger issues.

+ Reduce Manual Reporting

Spend less time building spreadsheets and more time acting on live operational information.

+ Support Better Decisions Across Teams

Give managers and operational teams clearer access to joined-up information across the business.

Ask Questions. Get Answers. Take Action.

- + "What stock is available at this branch?"
- + "Which customers generated the highest margin this month?"
- + "What orders are delayed today?"

Klipboard AI returns relevant answers instantly using live operational data – aligned to existing roles, permissions and controls.

Move Faster Without Losing Control

Distribution is becoming more demanding:

- + More products.
- + Tighter margins.
- + More branches.
- + Higher customer expectations.

Klipboard AI is designed to help teams move faster, reduce friction and make more confident operational decisions throughout the working day.

Built for Everyday Distribution Operations

Klipboard AI works inside the systems your business already relies on.

It helps teams:

- + Respond faster.
- + Reduce manual effort.
- + Improve visibility.
- + Stay in control across increasingly complex operations.

Our promise

Klipboard AI will always be:

- + Practical.
- + Trustworthy.
- + Focused on helping distribution teams work more efficiently.
- + Introduced carefully as capabilities evolve.
