About us

We build software that helps hire businesses move faster, work smarter, and stay in control.

At Klipboard, we've been building purpose-built software for rental, distribution and automotive businesses for over 40 years. From high-pressure event hire to complex multi-depot operations, we understand the everyday realities rental businesses face and we design our solutions around them.

We know events rental isn't just about equipment and orders. It's about reacting quickly, managing crews, and keeping every part of the operation in sync. That's why our platforms give hire teams full control over their equipment, people, customers and finances, in one connected system.

Today, thousands of rental businesses trust Klipboard products to manage everything from quotes to collections, servicing to stock control, logistics to invoicing.

Whether you're managing a growing AV hire business, providing equipment to the broadcast industry or delivering international live productions, we're here to help you scale with confidence, without losing control of the detail.

www.klipboard.com

We understand the event rental industry. It's fast-moving, high-pressure and there's zero margin for error.

Change is the norm, not the exception

Last-minute spec changes. Reallocated kit. Sub-hire gaps. Event rental teams face constant disruption and need systems that can respond instantly. Flexibility, mobile tools and real-time updates aren't nice to have - they're essential.

High-pressure jobs, zero margin for error

Every job is time-sensitive, high stakes, and tightly scheduled. A single missed item, late delivery or miscommunication can damage your reputation and derail an entire event. We understand event hire demands absolute control — even when plans shift at the last minute.

Reputation is everything

Your clients expect precision, professionalism and zero surprises. One incorrect delivery or a missing cable can break trust. You're not just renting out kit, you're delivering experiences.

Gear, crew and timing must align

You're not just sending out equipment. You're coordinating crew, transport, prep zones and venues, and often across multiple locations. Success means having complete visibility of every moving part, from what's packed to who's delivering it and when it arrives.

Disconnected systems create chaos

Many event rental teams rely on spreadsheets, paper dockets, and tools that don't talk to each other. That leads to double-bookings, lost kit, and missed handovers. Without a unified platform, even the best teams struggle to keep control when jobs pile up.

Introducing OnRent Events

by Klipboard.

Purpose-built rental management software for the AV, lighting, broadcast and events production industries.

OnRent Events is the all-in-one rental management platform built for the speed, scale and complexity of live events. Whether you're sending dry hire kits across multiple venues or managing full-scale productions with crew and logistics, OnRent Events keeps your team connected and your jobs on track.

Designed for AV, lighting, broadcast, staging and event production rental companies, it gives you total control over availability, scheduling, service, transport, billing and more – all in one connected platform.
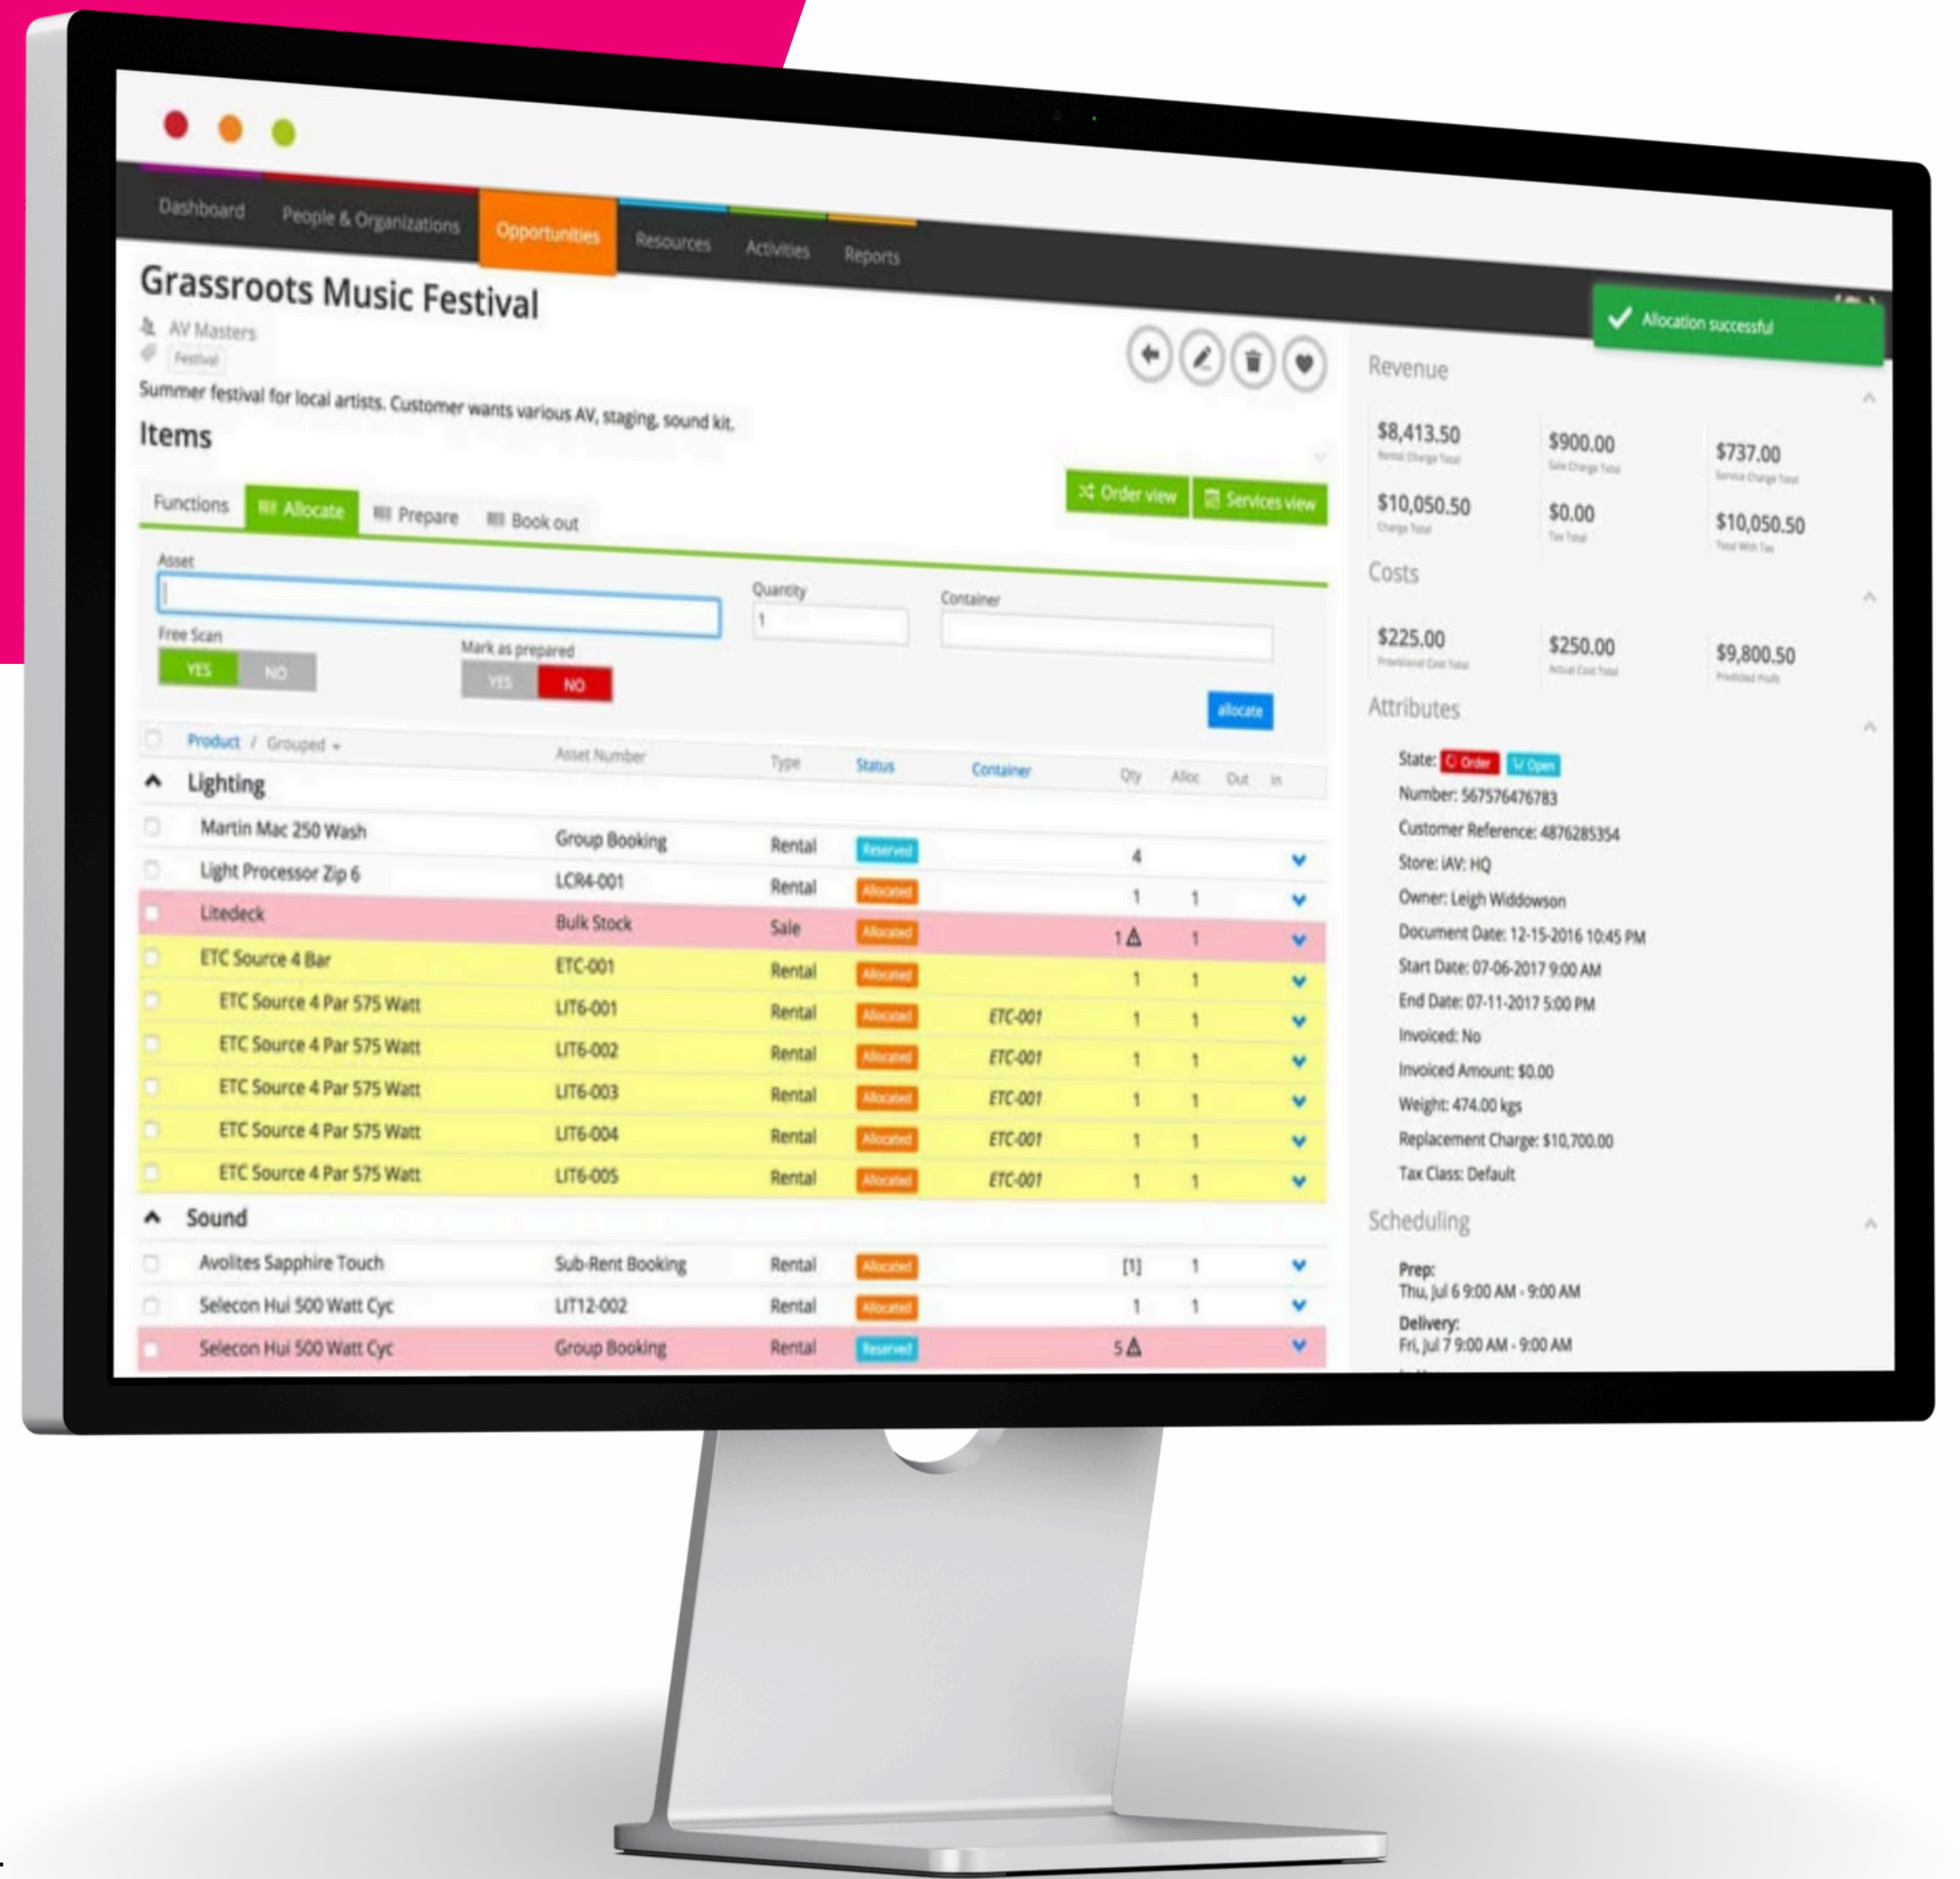

From your hire desk to your warehouse to the show site, OnRent Events gives you the visibility to deliver confidently under pressure.

Key Features at a Glance:

- Rental, purchase and sales order processing
- Finance and business reporting
- Hire and sales equipment management
- Testing and inspection schedulling
- Customer, contact and prospect management
- Asset tracking
- Third-party integrations
- Job planner and activity calendar (iCal)
- Labour and transportation allocation
- Mobile app and e-signatures
- **And much more!**

Managing your entire events rental cycle, from quote to collection, **in one platform that controls it all.**

Klipboard OnRent Events is built to manage every part of your order-to-invoice hire process, from first contact to reconciliation with your accounting software, without missing a beat. Whether it's a single dry hire or a full-scale festival setup with crew, staging and power, OnRent Events gives you total visibility and control across your gear, people, transport, venues and timelines.

1. Create quotes and confirm orders

Quickly build accurate, branded quotes with custom pricing, packages, deposits and crew charges – and convert to orders in seconds.

2. Inventory availability & equipment control

Track what's in, what's out, what's cross-hired and what needs servicing – all in real time, and trackable down to serial number level.

3. Crew, transport & venue scheduling

Assign people, allocate vehicles, book venues and create detailed job schedules with maps, iCal feeds and mobile access.

4. Integrated, intuitive invoicing

Create clean, accurate invoices tied to each job. Apply partial charges, deposits or late fees, then sync with Xero, QuickBooks Online, Sage Business Cloud or MYOB.
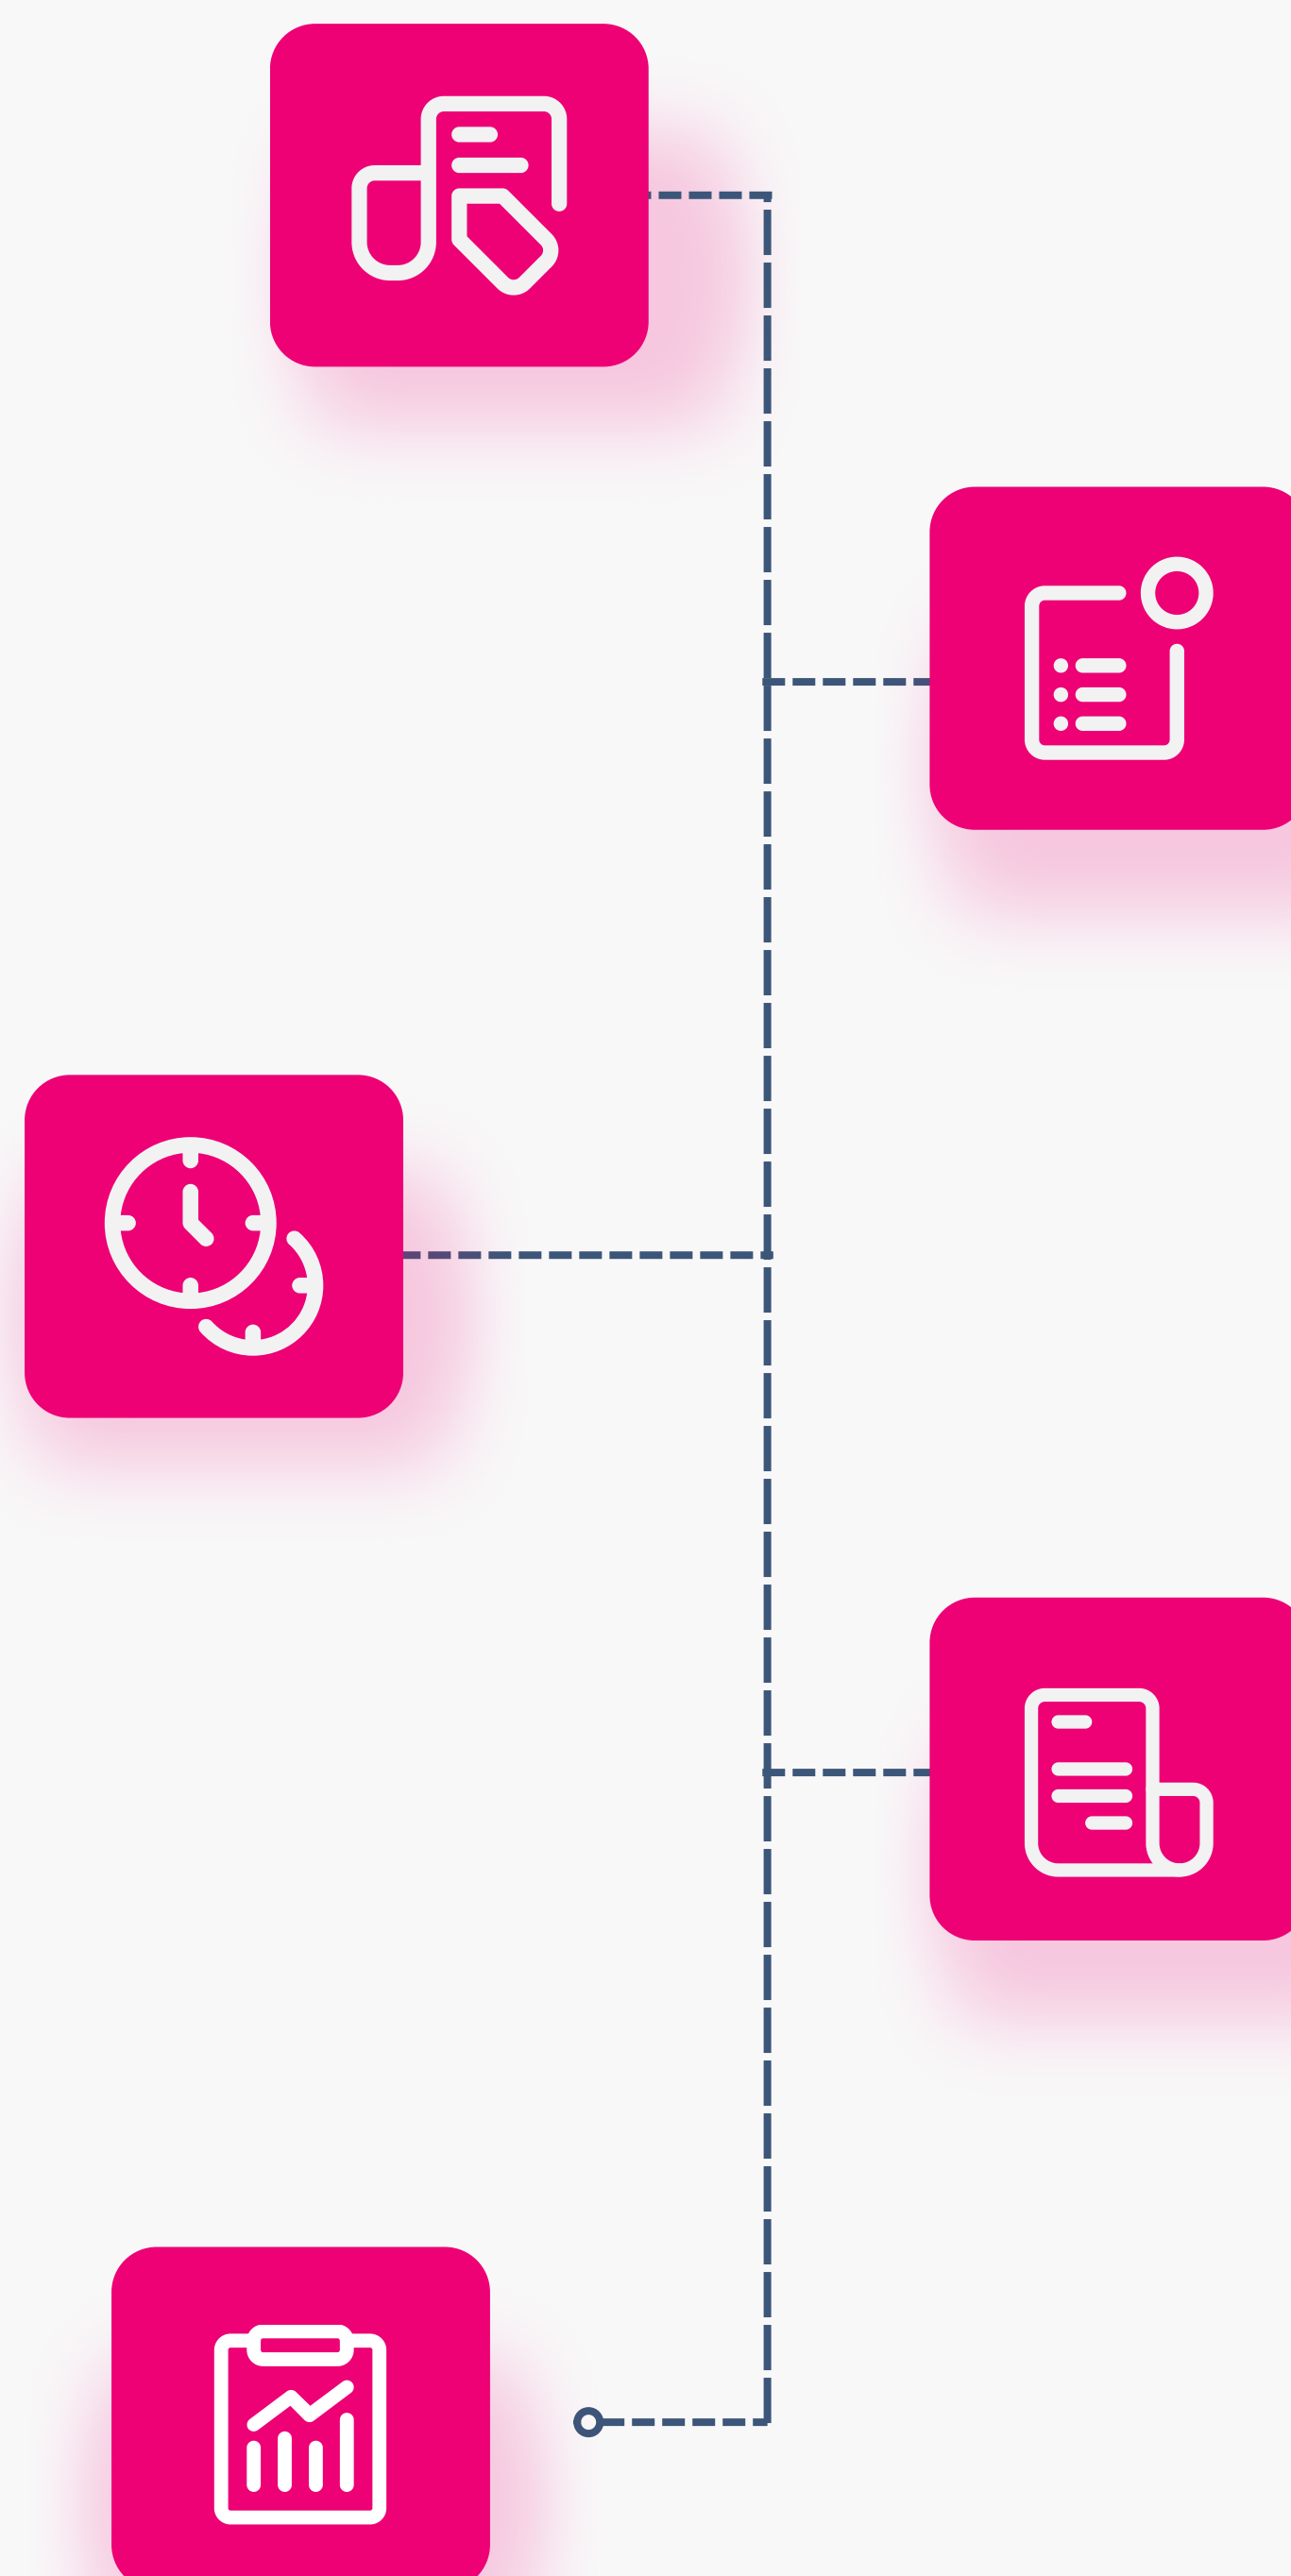

5. Dynamic, custom reporting

When giving instructions or writing emails, don't leave out any important details or assume that they understand what you mean or want them to do.

Handle quotes and sales orders with ease.

From dry hires to full production jobs, OnRent Events helps you create fast, accurate, professional quotes that contain every detail the job demands.

You can bundle equipment, apply deposits, schedule crew time, calculate and include venue and delivery costs in seconds, and much more. Once approved, the software allows you to convert quotes into live rental orders in just a few clicks.

Whether it's a single-day shoot or a three-week stage tour, your hire desk can handle custom pricing, track revisions, and issue branded documents without re-entering a single detail.
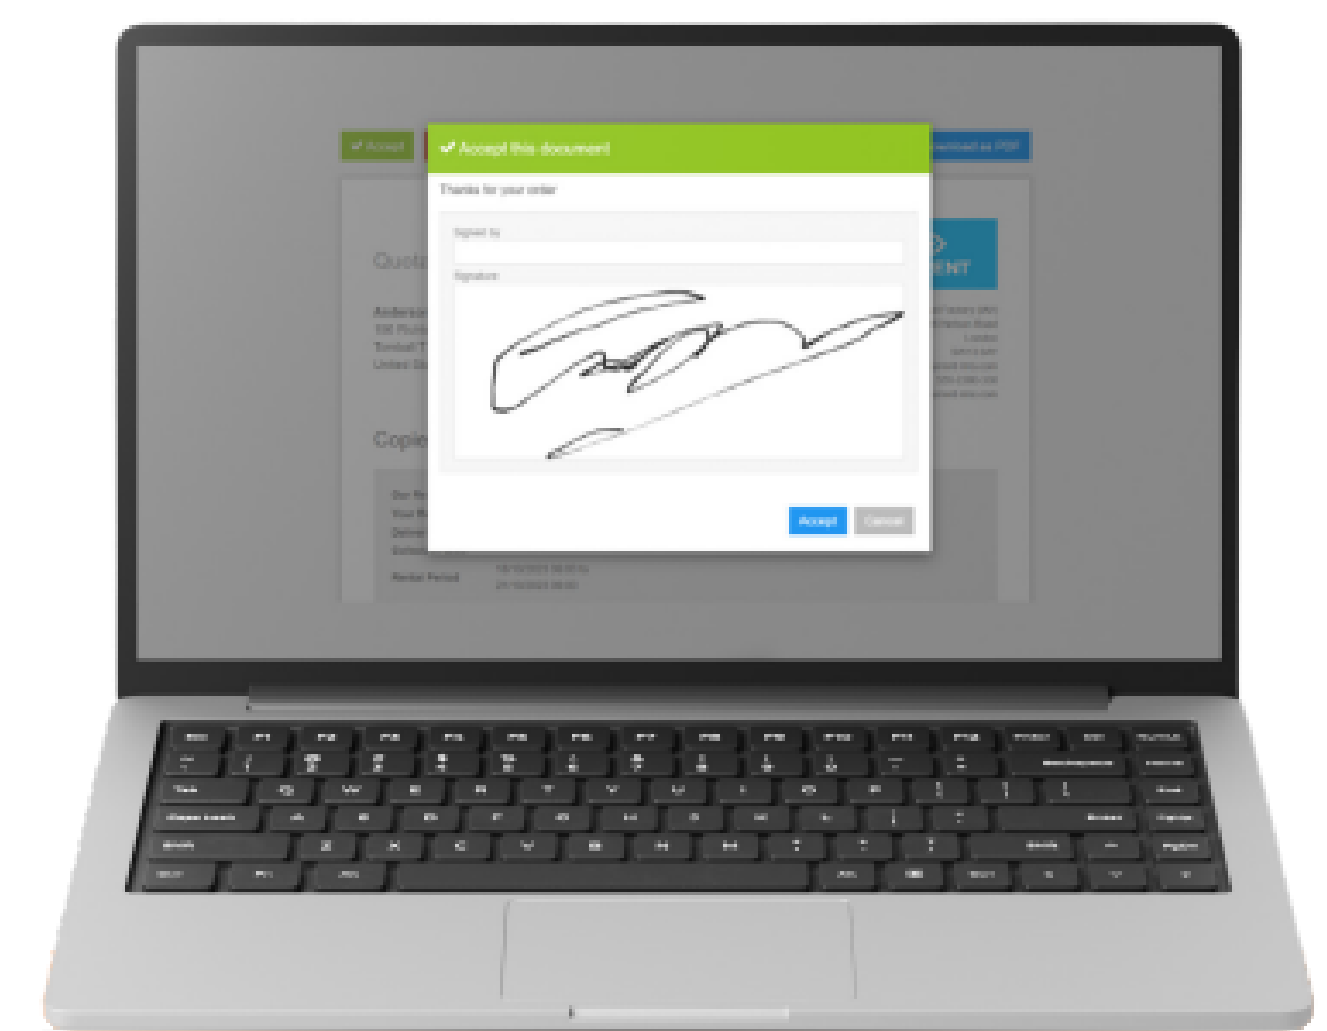

## Features that simplify your quote and order workflow

Build quotes fast and send custom-branded documents.

Convert quotes to jobs in seconds without rekeying details.

Bundle products and services into reusable prep kits.

Assign and record customer deposits or part payments against any job.

Apply flexible pricing, discounts and crew charges.

Link quotes and orders to specific customers in your database.

Track quote status and manage version history.

Email quotes and orders directly from the OnRent Events UI.

Software that gives you full control of your equipment inventory.

When every event is running to tight deadlines, you need total visibility of your kit. From cables and crates to entire AV rigs, OnRent Events gives you real-time tracking of stock location, availability and movement, across depots, vans, venues or sub-hires.

With full support for serialised assets, barcode scanning, global check-in and prep zones, you can always see what's ready to go, what needs servicing, and what's already booked for your next job.

Features purpose built to help you manage inventory easier, faster and with more control.

See availability at a glance

Filter stock by depot, kit type, bundle or job date, with real-time status updates.

Track assets by serial number

View complete history of your equipment, including usage, location and service records.

Speed up load-in/load-out

Barcode scanning and mobile tools to reduce errors and speed up load in/out.

Prep product kits with confidence

Group items into bundles (e.g. lighting packs) and auto-allocate based on availability.

View the service status of gear

See if gear is unavailable, and trigger maintenance jobs before kit goes back out.

Manage cross-hire inventory

Track external kit alongside your own and avoid last-minute surprises.

Apply availability buffers

Avoid booking of unavailable items by reserving equipment re/post event for prep.

Insights across multiple depots

View inventory at other locations and transfer stock easily to meet demand.

Allocate related items & accessories

Link cables, cases, mounts and consumables to core products.

Manage crew, transport, venues & rooms in a single platform with **Resource Planner.**

Coordinating your labour force, freelancers, vehicles, venue bookings and equipment is a daily challenge in event rental.

OnRent Events connects these moving parts in it's simple, easy to use, yet powerful, Resource Planner.

It gives you intuitive drag and drop tools so you can see, and manage, which resources are booked onto which jobs in seconds.
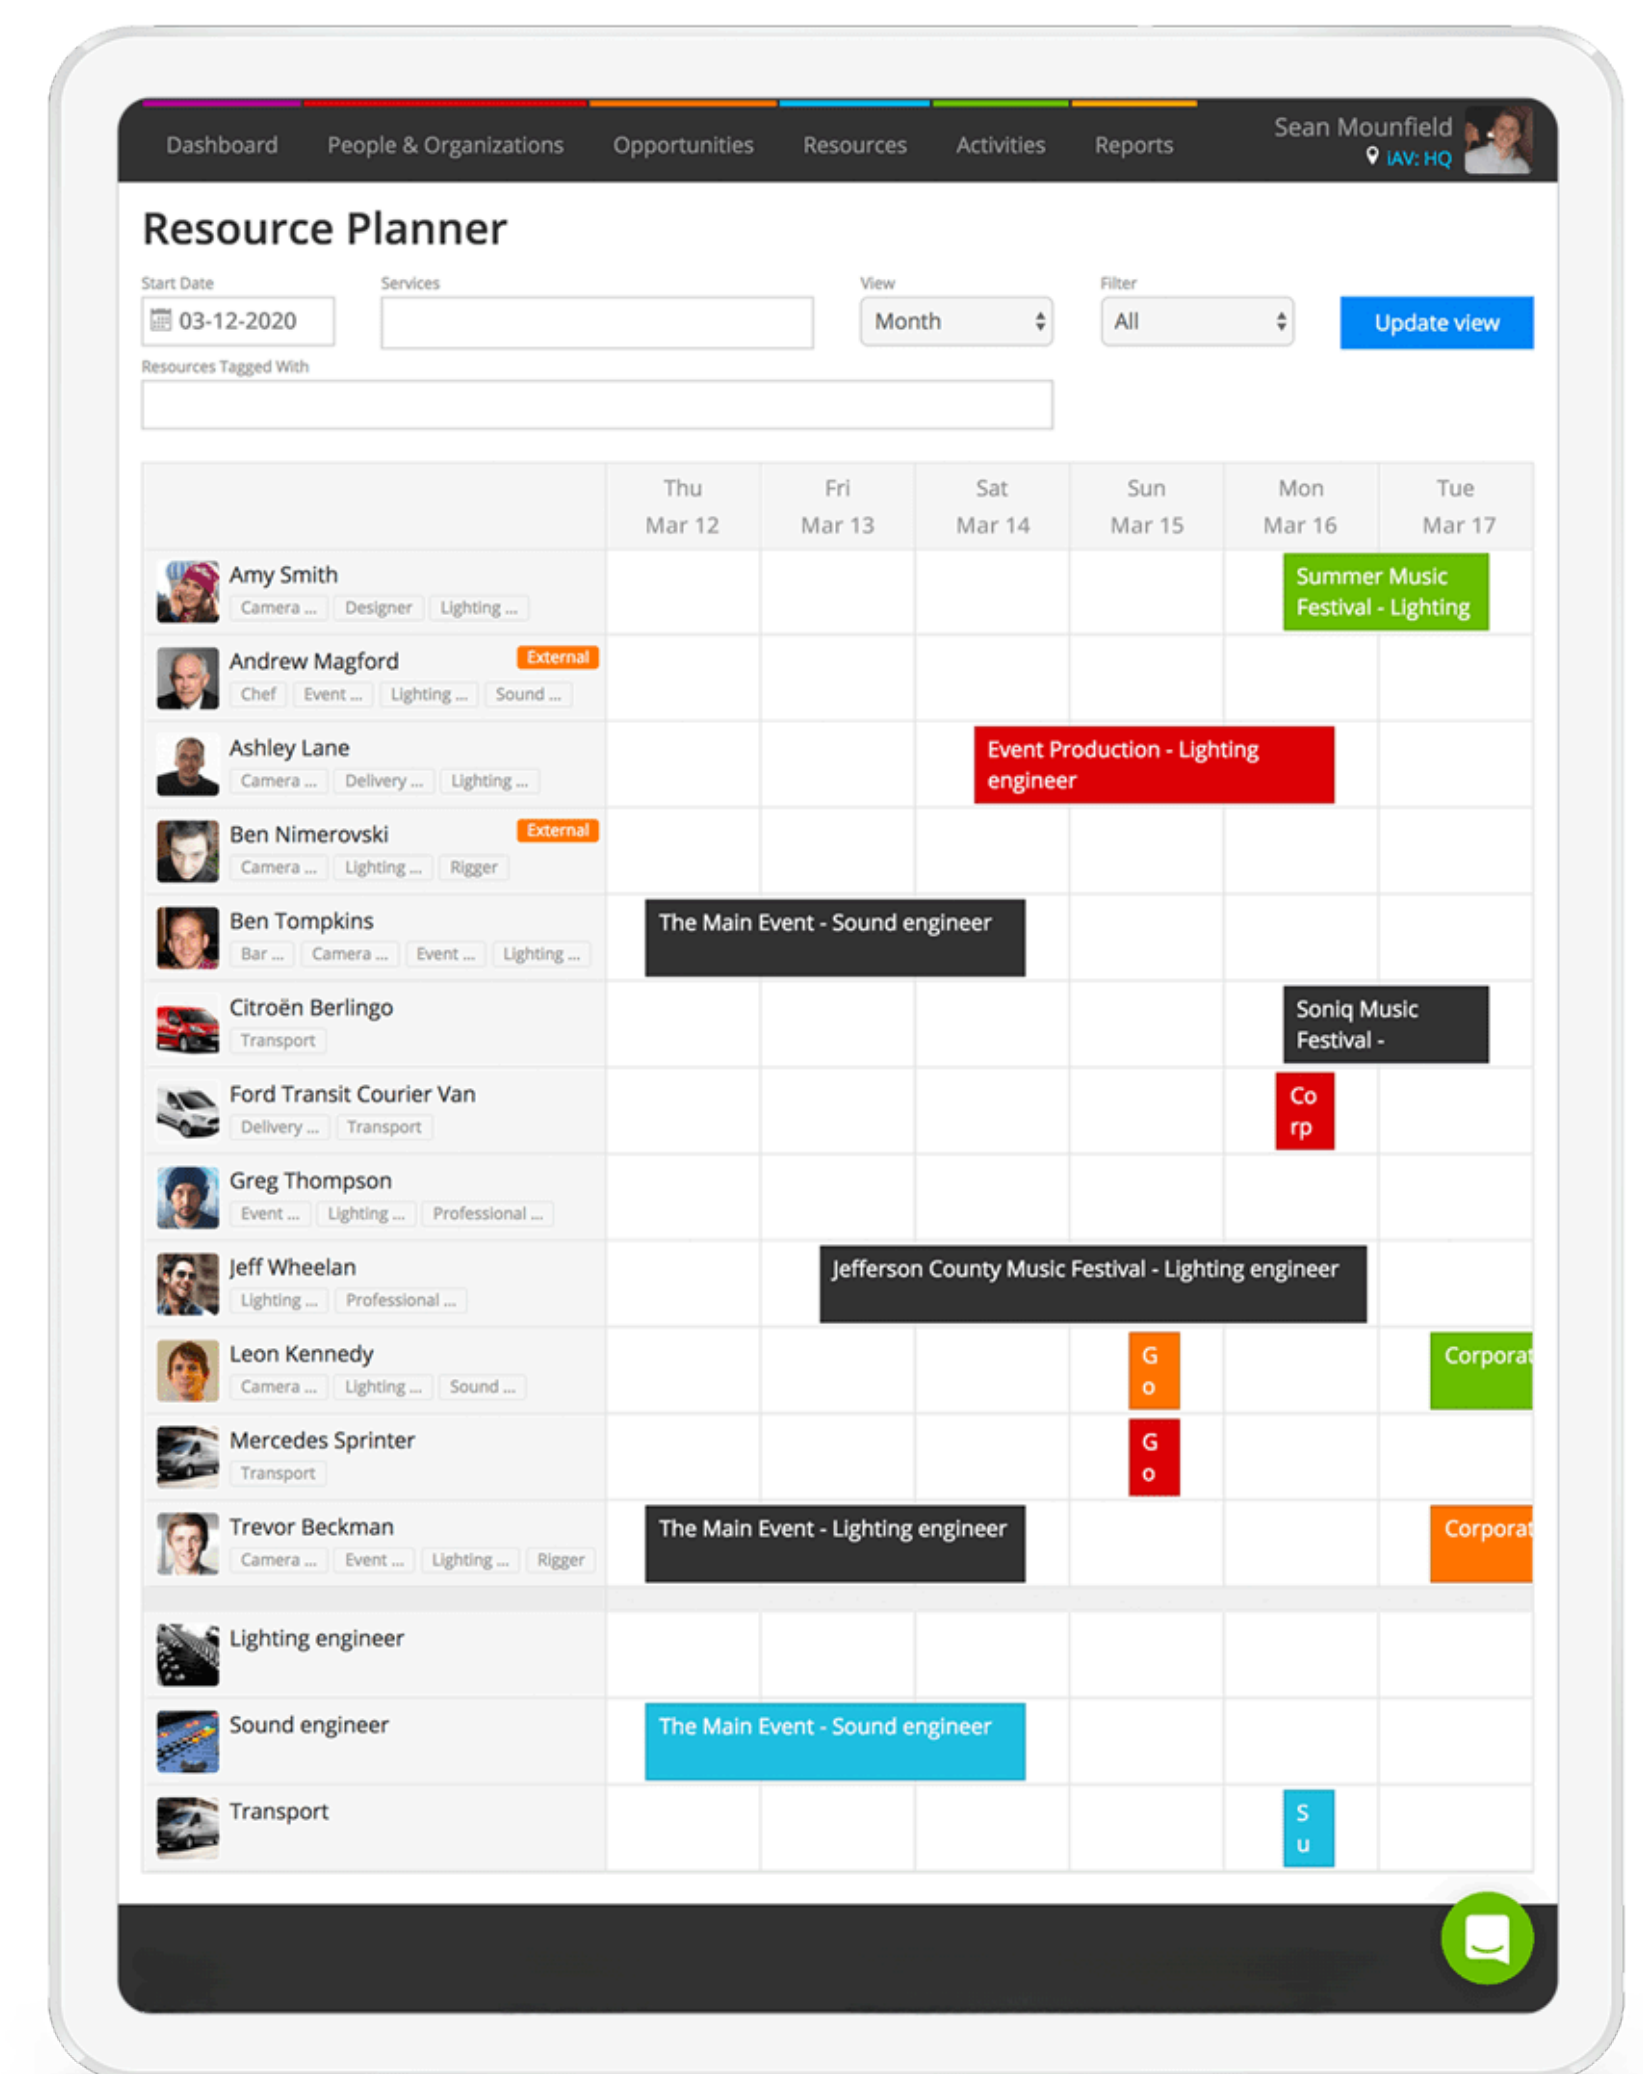

Features that simplify your resource management

Schedule crew, drivers and other resources by day or hour.

Sync schedules via iCal for live system feeds to your site teams.
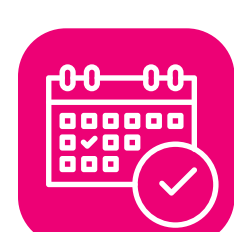

Assign vehicles and delivery slots to specific jobs.

Track crew and equipment locations easily via your mobile devices.
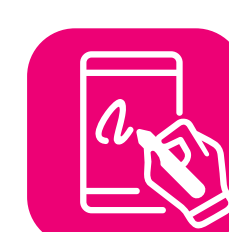

Book venues and capture location details for each job.

Add job notes, tech sheets and task-specific instructions.

View job schedules in both calendar or list formats.

Give job updates via mobile app and capture proof of delivery/eSignatures.

Complete control of **invoicing, reconciliation and reporting.**

OnRent Events makes staying on top of financial admin and business intelligence easy - no rekeying, no chasing paperwork.

Raise part payments, late charges or damage fees directly from each job, integrate with your favoured accounting platform for streamlined reconciliation and access actionable business intelligence insights directly within the platform.

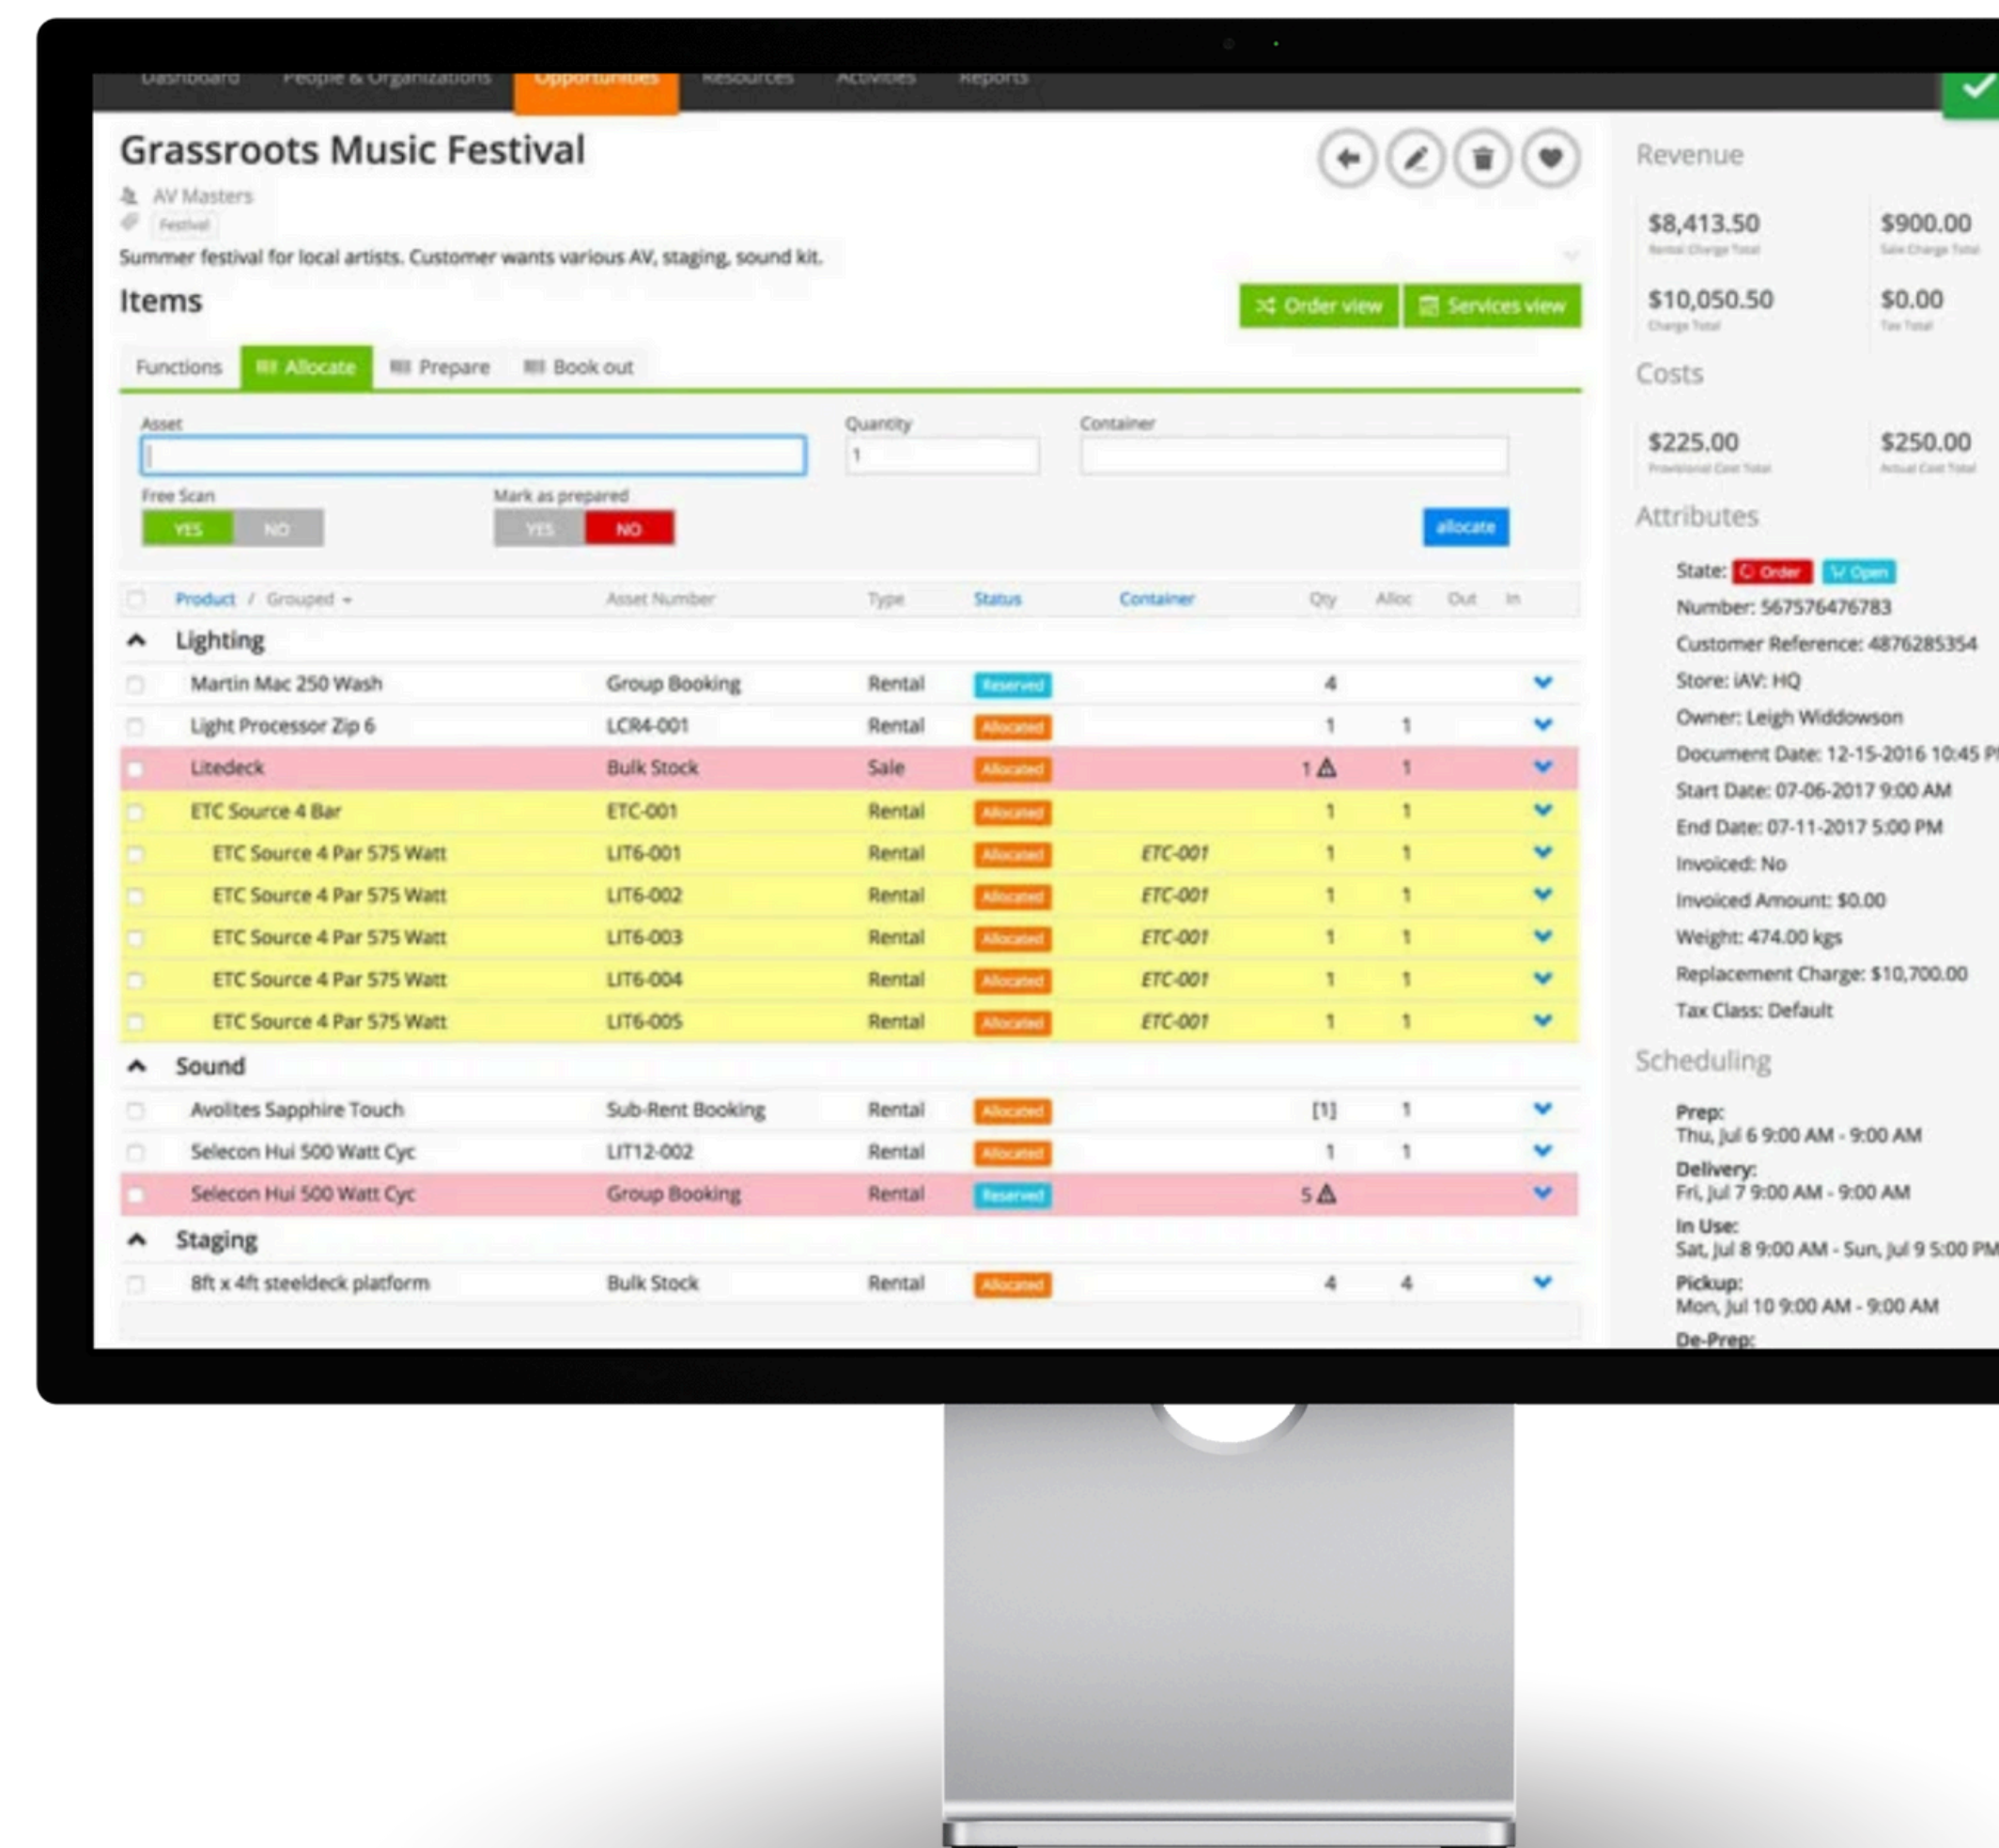

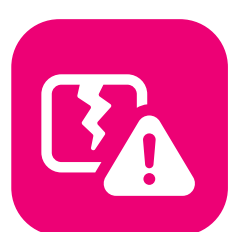

Features that simplify billing and reporting.

Raise rental, service or part invoices for each job.

Integrate natively with Xero, QuickBooks Online and Sage Business Cloud or MYOB.

Apply deposits, discounts, or extra charges easily
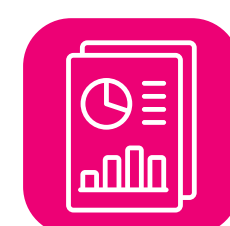

Pull profitability and utilisation reports by asset or job.

Generate damage/loss invoices for faster cost recouperation.

Track revenue by client, venue or kit type.

Track invoice status and customer balances.

Create custom dashboards and schedule reports.

OnRent Events: Integrate with your existing tech stack:

OnRent Events works alongside the systems you already use, including accounting, logistics, eCommerce and communications third-party software. Seamlessly connect your hire workflows with the rest of your business using ready-made integrations and open API support.

xero

Online accounting for businesses to manage invoicing, bank reconciliation, bookkeeping and more.

qb

For small businesses and self-employed workers to manage their accounting processes.

Klipboard Money◈

Take card payments instantly with built-in integration to Klipboard Money.

mailchimp

Send beautiful emails, connect your e-commerce store, advertise, and build your brand.

Sign

Request digital signatures on documents from OnRent Events using Adobe Sign.

woo

Push your full catalogue of products from OnRent Events to a Wordpress website using our WooCommerce integration.

Sage

Link with Sage Business Cloud to manage accounting, HR, ERP, payments and more. Whether you're a start-up or a global enterprise.

PATGUARD | CLOUD

Sync results from common PAT testers to OnRent Events by using PATGuard's cloud-based testing solution.

arrivy

Connect your office staff, delivery staff, and customers using Arrivy's real-time communication and tracking platform.
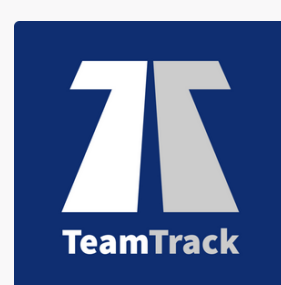

TeamTrack

Get seamless management of team schedules, subcontractor and freelancer availability, and skills with Team Track two-way sync.

HubSpot

Sync data between OnRent Events and HubSpot without manual data entry or messy, time-consuming imports.

myob

Post invoices straight from OnRent Events to MYOB and keep your organizations in sync.

BETA API

Integrate third party applications with OnRent Events.

OnRent Events:
Getting started.

At Klipboard, our experienced rental specialists are here to support you from day one. We take the time to understand your business, then guide you through setup, training and beyond, so your system works exactly the way you need it to.

Consultation and demonstration

First, we will find out what you are looking for in a hire software solution and talk through your key objectives. We'll consider your individual business requirements and identify the benefits you will enjoy from using Klipboard solutions and look at the ROI, ensuring you get the most out of your system.
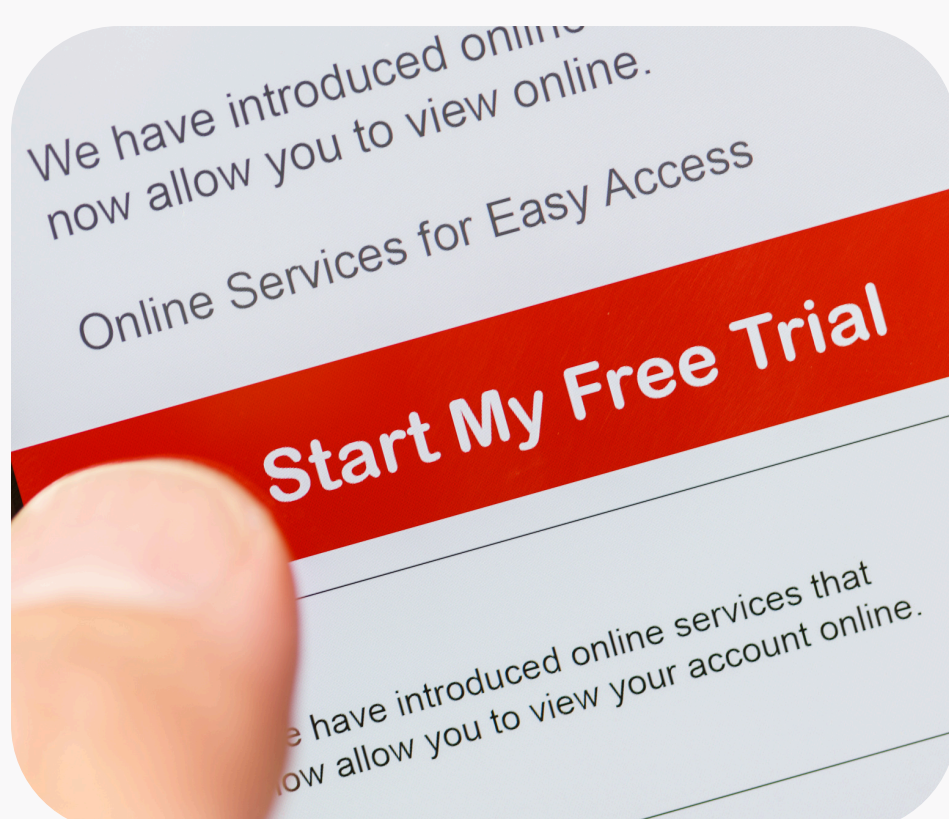

Get going, with a 30-day free trial

Our experienced team will support you every step of the way — from onboarding and training to your 30-day free trial. You'll also have unlimited access to helpful guides, videos and support resources. With decades of hands-on rental experience, you'll be in expert hands from day one.

Support from industry experts

Our dedicated support team are here to help you get the most out of OnRent Events. Helpdesk experts are available by phone or online through your system to assist when you need it. Automatic updates take place in the background with latest update information to keep you posted on all new features.

Ongoing product development

We have an expert team dedicated to developing innovative new solutions using cutting edge technologies. As a result, we're constantly improving and adding new features to our software that enable you to embrace new functionality and technology as you need it. That way, you stay ahead of your competitors.
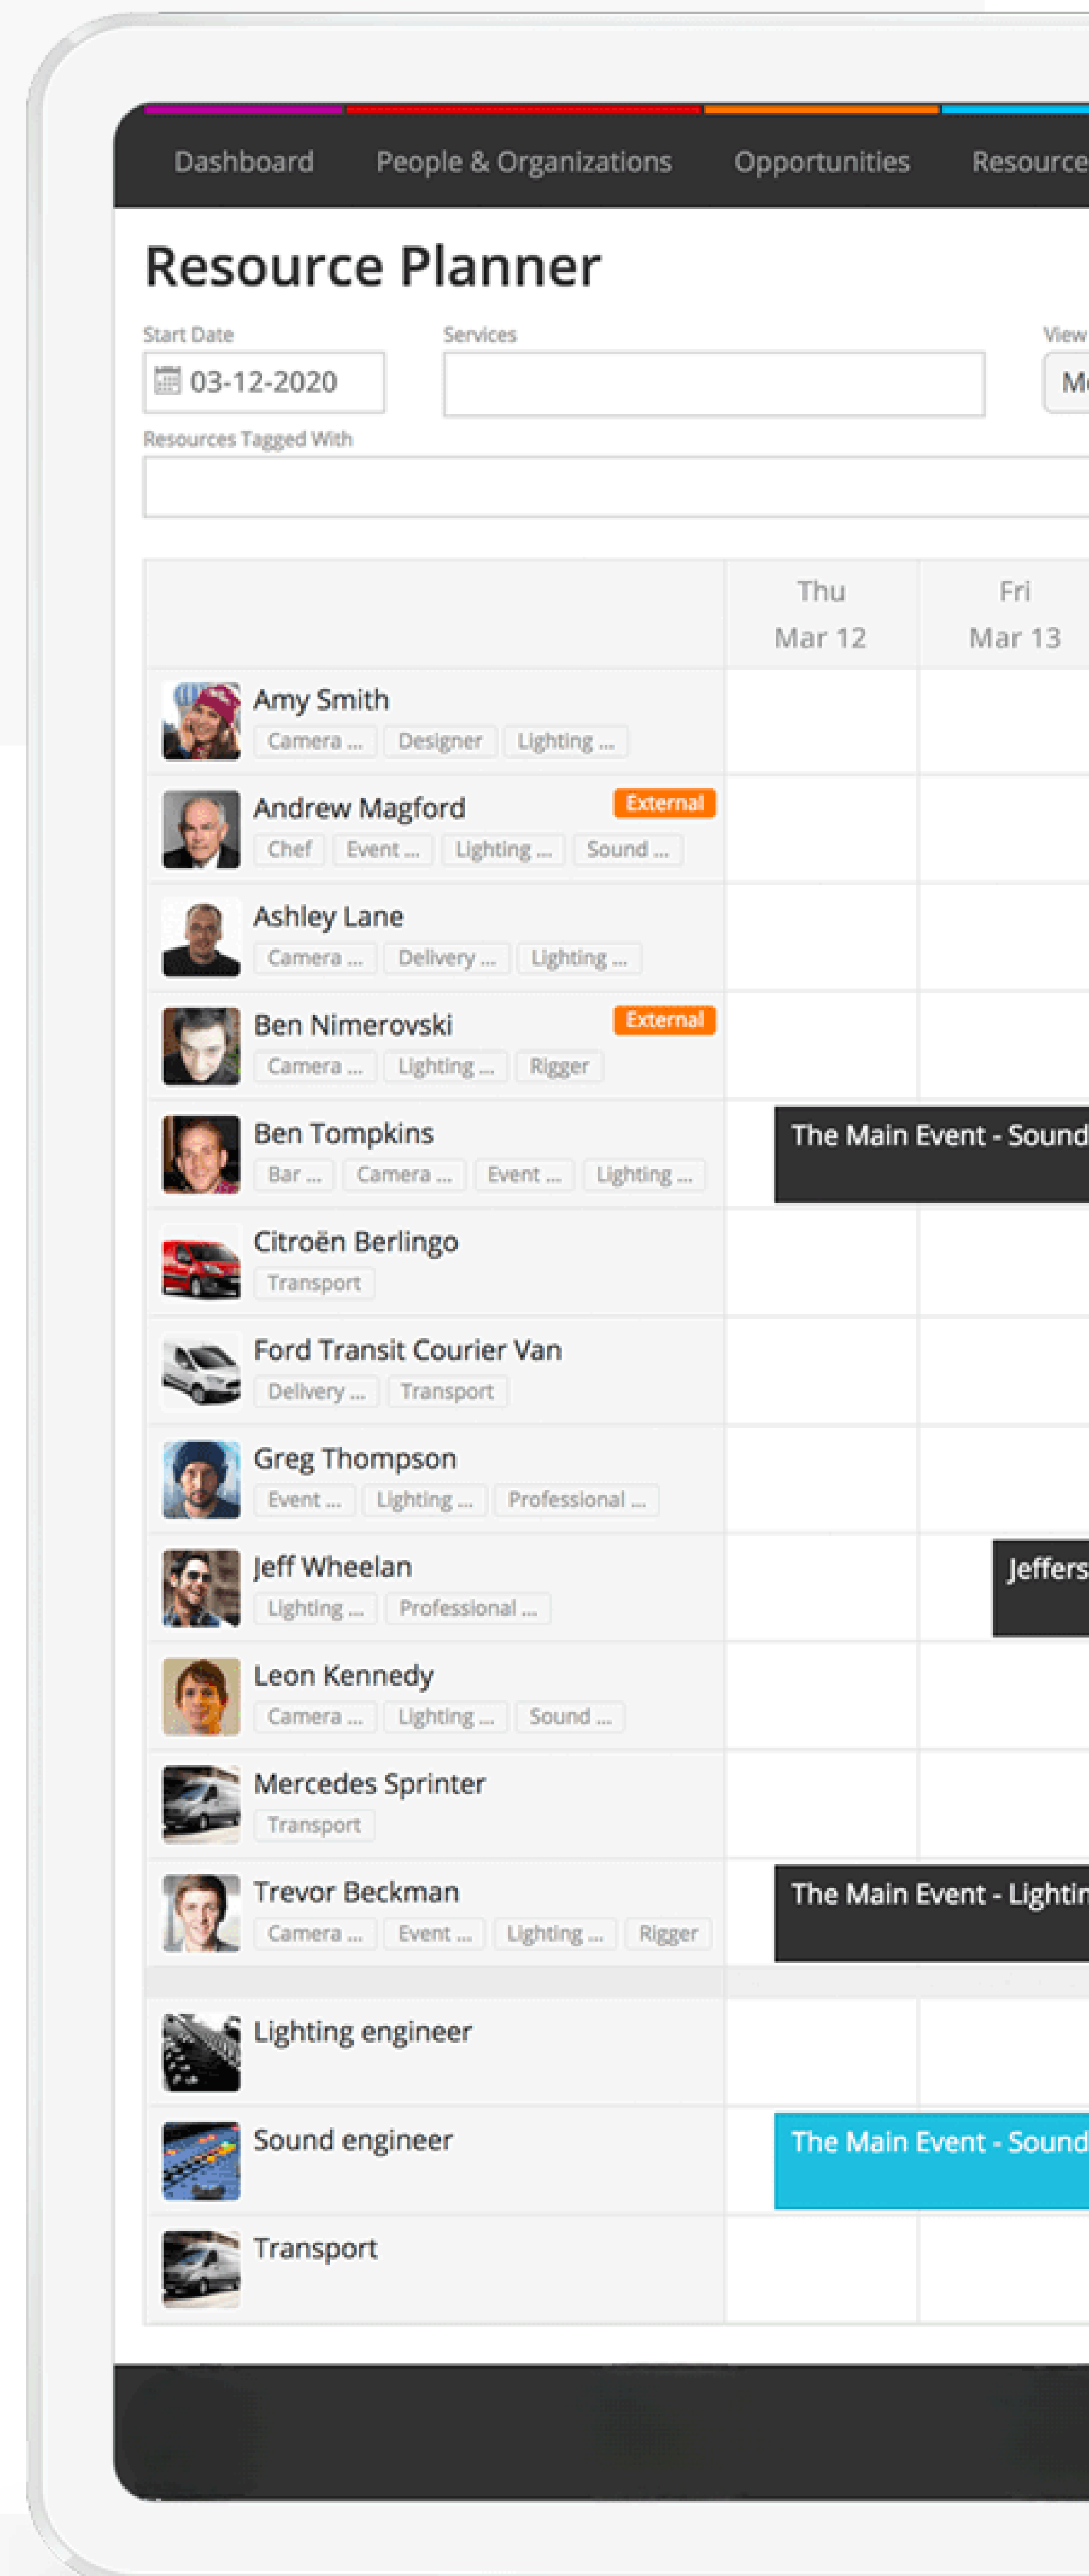

Don't just take our word for it...

★★★★★

OnRent Events helps us update the ever changing quotation process quickly and easily while notifying the team of any amendments to ensure a seamless event. The support from the team and frequent updates rolled out are other examples of added value.

Mathew Goldsmith, Director @ Stagepass Production Systems Pty Ltd

Sustainability
at Klipboard.

At Klipboard, sustainability isn't just a commitment - it's our way of doing business. And, we're driving it forward by partnering with industry leaders, innovating through technology, and embedding eco-conscious solutions into everything we do.

Our big green goal:

We've pledged to cut our Scope 1 & 2 Greenhouse Gas (GHG) emissions by 25% by 2030. It's ambitious, but then again, so are we!

Progress towards our target:

	Scope 1 emissions (tonnes CO2e)	Scope 2 emissions (tonnes CO2e)	Combined emissions (tonnes CO2e)	Carbon intensity (tonnes CO2e/£m revenue)	Carbon intensity (tonnes CO2e/employee)
Financial Year 2023 (baseline)	35	602	637	4.16	0.47
Financial Year 2024	50	552	602	3.56	0.41

The data above shows a 5.5% reduction in absolute Scope 1 & Scope 2 emissions over a 12 month period with a 14.4% reduction in Carbon intensity (tonnes CO2e/£m revenue) over the same period.
Note:
* Scope 1 emissions refers to all direct emissions from owned or controlled sources, including onsite generation of electricity & heating.
* Scope 2 emissions refers to indirect emissions from the generation of purchased electricity, heating & cooling.

By 2026, all of our major UK offices will be powered by 100% renewable energy.

We now generate solar power on-site at our offices in Johannesburg, Nottingham, and Stellenbosch.

We're retrofitting offices with sustainable lighting, heating & cooling, with local suppliers wherever possible.

We're investing in, and supporting forest restoration in the Western Cape.

"

At Klipboard, doing the right thing isn't just a choice - it's who we are. Sustainability, fairness, and transparency shape everything we do, from minimising our environmental impact to supporting our people and communities. It's not just good business; it's our commitment to the future.
