OnRent

Go

Control operations.
Connect teams.
Grow faster.

About us

At Klipboard, we believe modern rental software should be simple, intuitive, and built for the needs of your business.

OnRent Go is our cloud-native, browser-based platform, designed for equipment rental companies that want to grow.

It gives you powerful software without the complexity of generic solutions typically aimed at large or enterprise organisations.

It's also accessible from anywhere, and it digitises previously manual, paper-based activities such as quoting, order taking, equipment tracking, and invoicing into one central, easy-to-use system.

So whether you're in the store or site office, at a job site, in the yard, or working from home, your operations stay connected and under control.

www.klipboard.com

We understand the rental industry. It's fast-moving, high-pressure and there's zero margin for error.

Growing pains shouldn't slow you down
As rental orders and assets grow, existing systems start to crack. OnRent Go scales with your business, no tangled workflows, no upgrade or installation headaches, just a system that adapts as you do. OnRent Go is so simple to use to get your teams going instantly.

You've got no time to untangle admin
As you grow you're juggling too many tasks with too few hours. OnRent Go simplifies contracts, billing, servicing, and returns, so you spend more time serving customers and less time buried in paperwork.

Manual service tracking wastes time
Using paper or basic spreadsheets to record service dates and certifications is risky. With OnRent Go's digital scheduling and reminders, you keep equipment compliant and avoid costly downtime.

You need accurate availability, always
When you're tracking availability on spreadsheets and manual systems equipment gets miscounted, is out for repair, or incorrectly logged, availability becomes guesswork. OnRent Go gives you real-time visibility, so you know what's truly available and can book jobs confidently.

You just want to get paid, sooner
Lost paperwork, billing delays and rekeying quotes slow your cash flow. OnRent Go streamlines invoicing, with integrated payments and integration with accounting software, so you spend less time chasing money and more time growing.

Introducing OnRent Go®

by Klipboard.

A smarter way to grow your rental business.

OnRent Go is the cloud rental management solution built for smaller hire companies that want to grow, without the weight of complex systems. It brings your quotes, orders, equipment, servicing, invoicing, and customer records into one easy-to-use platform.

From checking availability and sending quotes to capturing signatures, booking maintenance, and raising invoices, OnRent Go gives you the tools to run a smarter, more connected operation from anywhere. And because it's cloud-based, there's nothing to install, patch, or maintain.

If you're still relying on paper, spreadsheets or outdated tools, OnRent Go helps you take the next step with simple, powerful software that grows with your business.

Key Features at a glance:

- Create rental or sales quotes in seconds
- See live availability with suggested accessories
- Schedule servicing and track inspections
- Manage equipment with visual category browsing
- Capture digital signatures and photos
- Bill customers on the go, individually or in batches
- Maintain customer activity calendars and reminders
- View live dashboards and key business data
- **And much more...**

Joined up rental workflows: from counter to invoice

OnRent Go gives you everything you need to manage the rental journey from start to finish. Whether you're quoting customers or creating contracts, tracking availability, handling servicing or sending invoices, you'll find every step connected, without switching systems or rekeying information.

Built for all equipment rental businesses, it simplifies the day-to-day and helps you focus on delivering great service, not chasing paperwork or dealing with difficult outdated systems.

It works across your organisation to:

1. Speed up quoting and contract entry

Give your rental and sales teams the tools to create quotes and convert them to contracts in seconds.

2. Get real-time visibility of equipment and inventory status

Understand what out on rent, what's in the workshop being serviced, and what's ready to go - without having to pick up the phone or email people.

3. Plan and track deliveries and collections easily

Create multiple movements from rental orders for deliveries & pickups on different dates, assign drivers and view their workload on calendars, then get sign off on handover and send copies of documents instantly.

4. Manage your workshop to keep equipment available

Triage on return, with built in inspections and track the service or repair costs and downtime of each asset - all in one place.

5. Invoice customers faster, with more accuracy

Raise accurate invoices, fast, directly from rental orders, repairs or works orders logged in the OnRent Go platform - no rekeying of data required. Invoice in batches, bulk email your invoices, post them to your finance system - job done.

**6. Track performance and make data-backed decisions**

Get actionable insights into your businesses performance, including assets, people and jobs, to see where there's room for growth. Full audit trails drive accountability.

Create professional quotes, orders & contracts in seconds

OnRent Go helps you get contracts and assets out quickly with confidence. Create detailed rental or sales orders from a single screen, check availability in real time, and include suggested accessories or consumables to maximise revenue whilst improving safety and customer service.

Documents are branded, professional and ready to send by email. And with document approvals for any document alongside transport document signature capture, your team can get customer sign-off and complete jobs from anywhere.

Features that streamline your sales team's order processing workflows:

Create rental contracts and sales orders in seconds

Capture proof of transport confirmation with digital signatures and photos

View live availability with suggested accessories

Manage order & contract changes with full audit trails

**Send branded quotes and contract approvals for digital sign off by email**

Link orders to customers, contacts and sites

![OnRent Go logo]

Manage your equipment with **confidence, speed and accuracy**

Manage your rental and sales equipment with live status updates and full visibility from a single screen. Whether it's available, picked, ready to rent, in service or repair, OnRent Go keeps your asset availability accurate and easy to access.

Easily group items, add documentation or images, and browse your product catalogue visually, so you can find and manage stock without wasting time.

Features that power smarter resource management:

|	
Track real-time availability and shortages	Categorise equipment visually and flexibly
Manage serialised, bulk and sales stock	Upload images, spec sheets and documents
Quickly search and filter items by type or status	Book equipment into service directly

Ensure your equipment and assets are safe and ready at all times **with integrated work order management**

OnRent Go helps you stay on top of servicing and maintenance without relying on paper or guesswork. Create schedules, book repairs, and track due services or inspections, all with clear visibility and simple reminders.

You can upload or create test certificates and log service history against each item, so you're always ready and never renting out unprepared equipment.

Features that optimise your equipment availability:

Schedule and customise maintenance plans by hour, distance or days

Book equipment into service directly from reminders

Track and store test certificates and create your own in app checklists

Spot asset issues and high-risk customers with historical job insight.
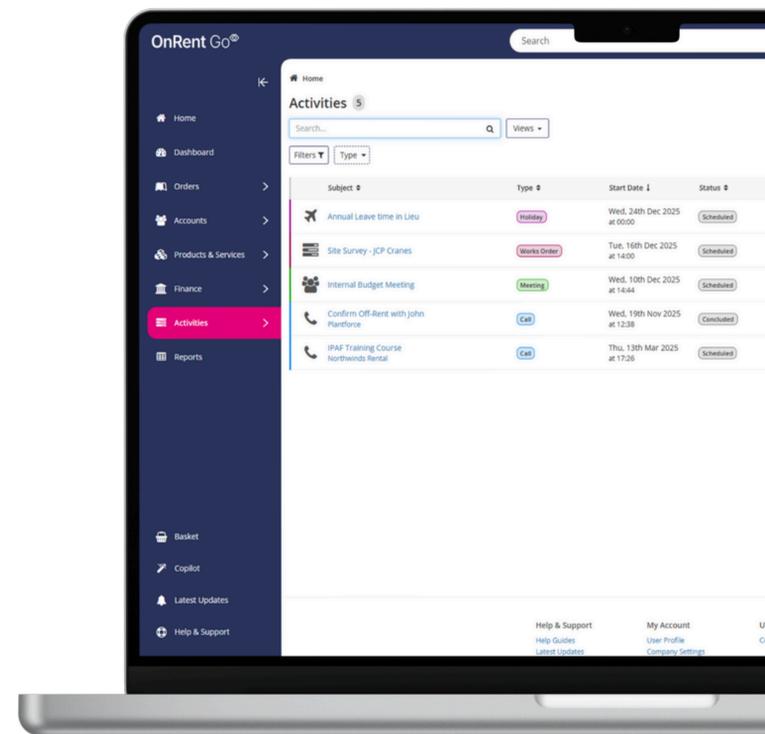

Receive alerts for upcoming servicing

Visualise overbooked equipment and offer alternatives to customers

Every customer detail at your fingertips

With OnRent Go, managing customer relationships is simple. Track orders, activities, contacts and invoices from one central screen, with reminders to follow up on tasks or meetings.

From new enquiries to long-term accounts, everything's logged and searchable, so you can deliver better service and stay organised as your customer base grows.

Reminders for customer insurance expiry dates, identification capture and detailed customer notes mean you reduce risk and improve customer service.

Features that power smarter customer relationship management:

View customer history, orders, documents and invoices.

Use the calendar and timeline to track tasks and meetings.

Create reminders for follow-ups or daily admin.

Store contact details and track communication and outreach.

Segment customers, prospects and contacts into lists.

See a full 360° view of each customer account.

Connected finance and real-time reporting, **without the admin burden**

OnRent Go simplifies invoicing and finance, making it easy to bill accurately and get paid faster. Whether you're creating ad-hoc invoices, batch invoices, or generating quick credit notes, it all happens in one connected system - standalone or fully integrated with your accounting platform.

Built-in dashboards and custom views give you real-time visibility of how your business is performing, from revenue and utilisation to unpaid invoices. And with rental-specific dashboards and daily email updates, you'll always know what's happening, without digging through spreadsheets.

Features for optimised financial management and business reporting:

Flexible invoicing, including drafts, batches and quick credits

Live dashboards and custom views with drill-down, direct links to finance system invoices

Clear, branded invoice layouts with key information meaning less disputes

Specific reports on asset ROI, utilisation and financials

Accounting integrations with Xero, QuickBooks, Sage and Exact

Track deposits, payments, refunds and customer balances with ease

OnRent is fully browser native: a fast, flexible and future-proof way of running your business, at-all-times

Whether we realise it or not, we all use the cloud to manage vital parts of our everyday lives. Online banking, sending emails and browsing social media are all examples of this. OnRent Go is fully hosted, with no need to have your own infrastructure - devices with a modern browser that can access the internet are all you need.

The last few years have proven we need to be equipped with agile, secure and future-proof systems, and OnRent Go provides just that. As well as other benefits...

As well as providing increased security it will allow you to focus on strengthening your rental operations, providing a better customer experience and increasing your ROI - from any device, anytime, anywhere.

Access your system anytime, anywhere

Whether you're at home, in the yard or out on-site, OnRent Go keeps you connected. View availability, check contracts, respond to customer enquiries and access quotes from any device, wherever you are - no delays, no downtime.

Cut overheads, delays and admin waste

OnRent Go is fully hosted for you, which eliminates manual updates, removes infrastructure costs and streamlines every part of your rental operation. No more time fixing environmental issues and more time spent delivering value to your customers.

Get the latest features automatically

New tools, improvements and security updates are rolled out automatically, without downtime or disruption. No manual installs, no version mismatches, just instant access to the latest functionality for every user, across every device.

Scale fast without outgrowing your system

As your business grows, the platform grows with you. Add users, depots or integrations without IT bottlenecks or hardware limits. Whether you're opening new branches or expanding into new regions, OnRent Go is ready.

Protect your data, no matter where you are

Data stays safe even if devices are lost, stolen or damaged. Secure cloud storage and user access controls mean you stay in control, with backups and built-in disaster recovery as standard.

Run smarter without replacing infrastructure

Unlock the full power of OnRent Go without major IT investment or detailed approvals. The platform delivers enterprise-grade performance, scalability and reliability, without the cost, maintenance or constraints of legacy hardware and operating systems.
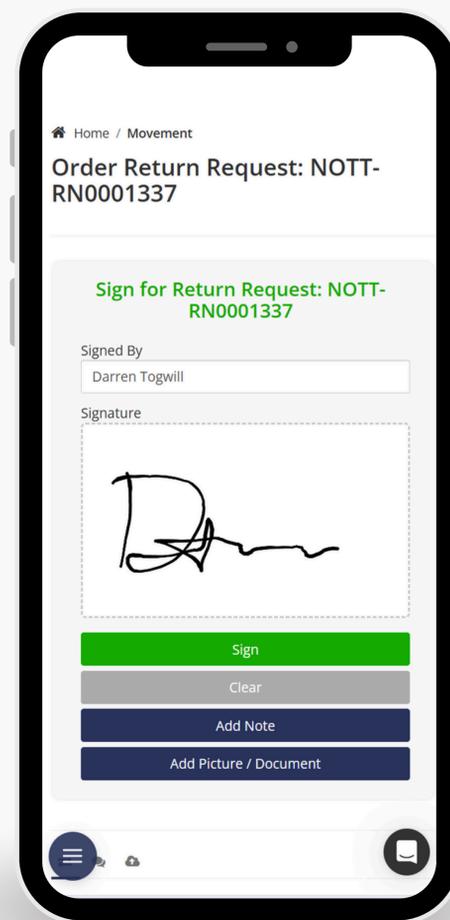

Any Device, Anywhere, Any Time

With OnRent Go, your team can manage every function without being tied to a desk.

OnRent Go is fully responsive, which means it automatically scales to the device you're using without having to zoom in and out of the interface.

From allocating equipment, to capturing photos, e-signatures, uploading images or videos to rental contracts and completing digital forms - everything happens in real time, from any location.

Whatever you're doing, wherever you are, your team always has the tools they need to work efficiently.

Work on any device wherever you are

Whether you're on-site or in the yard, OnRent Go lets your team capture updates, log jobs and complete forms. As long as you have an internet connection, you can use any functionality within OnRent Go. One web-app, securely hosted, accessible from anywhere.

The daily digest keeps your users informed

Enable the Daily Digest functionality for a user and each day they get an email giving a list of tasks to carry out. Need to chase quotes? No problem. Are you a store manager that needs to monitor depot activities? That's right in your inbox every morning with tasks just a click away.

Document automation at your fingertips

Speed up admin and improve service by automatically sending stored attached files against products to your customers when you email them any document. This configurable workflow saves hours of time.

Google Places gives you pinpoint accuracy

Make it easier for your teams to find job locations fast. With built-in Google Places & maps integration, operators can navigate to sites and view location data directly within the app including the exact location a customer signed off transportation.

Capture checklists and rental inspections

Compliance is vital to our customers and different industries have different requirements. Our checklists functionality allows you to create your own forms with photos per check at pre-delivery, rental return and repair points with full audit trails available.

Assign jobs to resources with ease

Give your team full visibility of who's doing what, where and when. OnRent Go lets field staff see assigned jobs, upcoming work and task details so they can stay on track without constant check-ins. Dispatchers have improved control over the workforce planning.

OnRent Go: Integrate with your existing tech stack

OnRent Go works alongside the systems you already use, including accounting, logistics, eCommerce and communicates with third-party software. Seamlessly connect your rental workflows with the rest of your business using ready-made integrations.

Sage

For accounting, payroll, HR, ERP, payments and more. Whether you're a start-up or a global enterprise.

Address lookup using Google Places when adding addresses throughout OnRent Go

OnRent Go:
Getting started.

Getting started is simple and self-service by design. Explore OnRent Go with a **30-day free trial**, guided by in-app support and easy data migration tools, with expert help available whenever you need it. As you grow, our industry specialists, dedicated helpdesk and ongoing product development ensure you continue to get the most from your Klipboard solution.

Start with a 30-day free trial

Explore Klipboard with a free 30-day trial, designed to be fully self-service. Learn how the system works at your own pace with clear in-app guidance, while expert help is always available if you need extra support, even during your trial.

Migrate your data simply

Getting your data into OnRent Go is straightforward and easy to manage independently by bringing everything together in one place from the systems you already use. Customer records, assets, pricing and more can be migrated into a single platform, with tools designed for easy self-service and expert support available if required.

Get support when needed from industry experts

Our team are here to help you get the most out of your Klipboard solution, with tips and advice on new features and updates. Our dedicated helpdesk team are always on hand by phone or email to assist, and our customer portal gives you access to help files, training videos and much more.

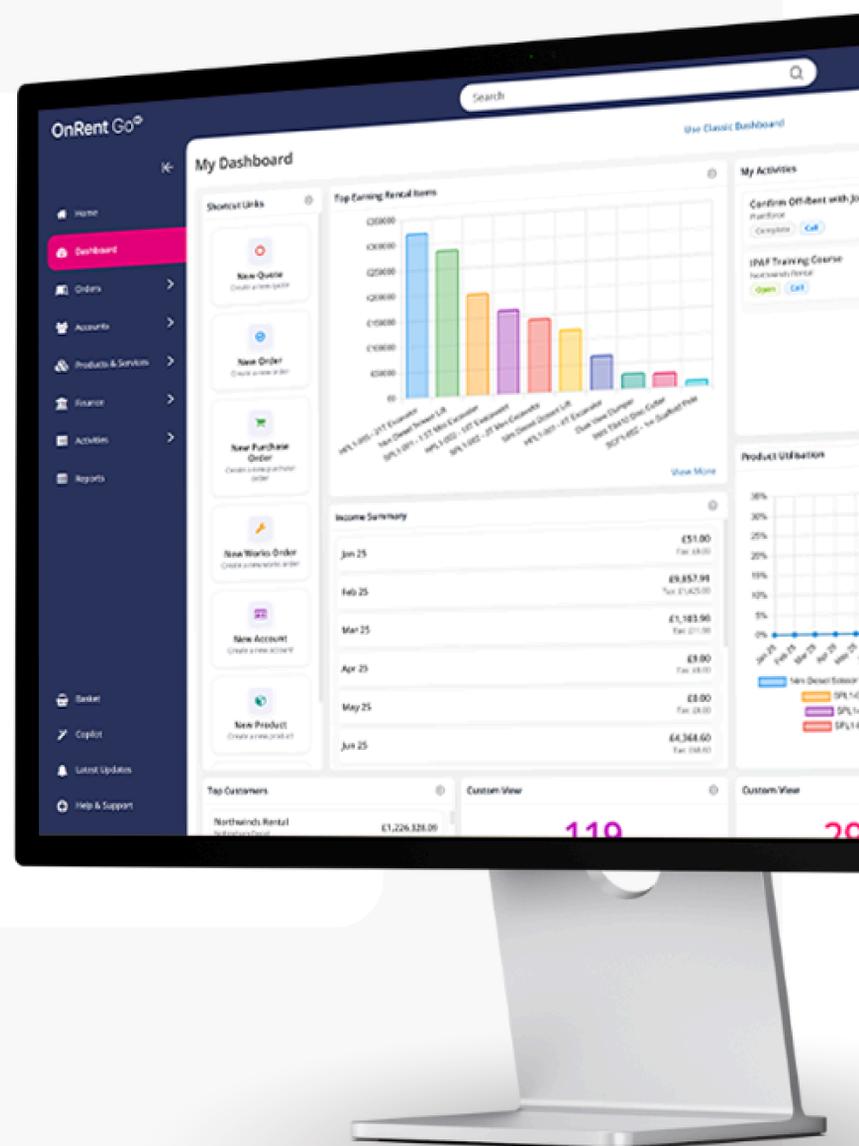

Receive ongoing product development

We have an expert team dedicated to developing innovative new solutions using cutting edge technologies. As a result, we're constantly improving and adding new features to our software that enable you to embrace new functionality and technology as you need it. That way, you stay ahead of your competitors.

Don't just take our word for it...

★★★★★

We chose OnRent Go as it's very simple to use, almost like the iPhone of the hire systems world! We needed something straightforward and simple but could be tweaked to suit our needs. OnRent Go has massively helped our business as all of the administrative work is now done by one person, enabling the team to deal with the growing customer base with ease."

Kat Milligan, Office Manager at PW Hire

Sustainability at Klipboard.

At Klipboard, sustainability isn't just a commitment - it's our way of doing business. And, we're driving it forward by partnering with industry leaders, innovating through technology, and embedding eco-conscious solutions into everything we do.

Our big green goal:

We've pledged to cut our Scope 1 & 2 Greenhouse Gas (GHG) emissions by 25% by 2030. It's ambitious, but then again, so are we!

Progress towards our target:

	Scope 1 emissions (tonnes CO2e)	Scope 2 emissions (tonnes CO2e)	Combined emissions (tonnes CO2e)	Carbon intensity (tonnes CO2e/£m revenue)	Carbon intensity (tonnes CO2e/employee)
Financial Year 2023 (baseline)	35	602	637	4.16	0.47
Financial Year 2024	50	552	602	3.56	0.41

The data above shows a 5.5% reduction in absolute Scope 1 & Scope 2 emissions over a 12 month period with a 14.4% reduction in Carbon intensity (tonnes CO2e/£m revenue) over the same period.

Note:

* Scope 1 emissions refers to all direct emissions from owned or controlled sources, including onsite generation of electricity & heating.

* Scope 2 emissions refers to indirect emissions from the generation of purchased electricity, heating & cooling.

By 2026, all of our major UK offices will be powered by 100% renewable energy.

We now generate solar power on-site at our offices in Johannesburg, Nottingham, and Stellenbosch.

We're retrofitting offices with sustainable lighting, heating & cooling, with local suppliers wherever possible.

We're investing in, and supporting forest restoration in the Western Cape.

"

At Klipboard, doing the right thing isn't just a choice - it's who we are. Sustainability, fairness, and transparency shape everything we do, from minimising our environmental impact to supporting our people and communities. It's not just good business; it's our commitment to the future.
