About us

We build software that gives large hire businesses the power to scale with confidence.

For over four decades, Klipboard has worked alongside rental and distribution businesses around the world — building solutions that help them stay in control as they grow. From multi-depot tool hire groups to international plant rental operations, we understand the complex workflows, compliance requirements and pressures that come with scaling a high-volume hire business.

We don't believe in one-size-fits-all software. Our platforms are purpose-built to reflect how rental businesses actually work. With built-in support for maintenance, stock tracking, logistics, financial control, and real-time visibility across every depot, contract and asset.

Today, thousands of rental teams across the UK, Europe, South Africa and North America use Klipboard's connected ecosystem to quote faster, move gear with confidence, reduce servicing delays, and get paid sooner. And with every deployment, we tailor the solution to fit the operational shape of the business, not the other way around.

If your hire business is growing at scale or in complexity, we're here to help you take the next step with the right foundation in place.

www.klipboard.com

We understand the rental industry. It's fast-moving, high-pressure and there's zero margin for error.

Growing, and operating at scale brings growing complexity

More depots. More teams. More data. Operating at scale means there are more moving parts. Without joined-up systems, it's hard to stay ahead, and it's easy for things to fall through the cracks.

Workshop and asset pressure is constant

Large fleets and inventories mean constant servicing, inspections, repairs and tracking. When servicing workflows aren't connected to job status, asset history or hire dates, delays multiply and revenue suffers.

Your customers expect more than ever

From complex contracts to short lead times and strict SLAs, your customers want faster service, clearer communication and full transparency. Meeting those expectations at scale requires better systems, not more admin.

Profitability depends on every decision

In large rental businesses, small inefficiencies add up fast. Poor asset utilisation, manual quoting or slow billing can erode margins across hundreds of jobs and go unnoticed without the right reporting in place.

Disconnected systems create chaos

When your sales order, maintenance, logistics and finance tools don't talk to each other, your team ends up duplicating work and wasting time. Fragmented data means poor decisions and missed opportunities.

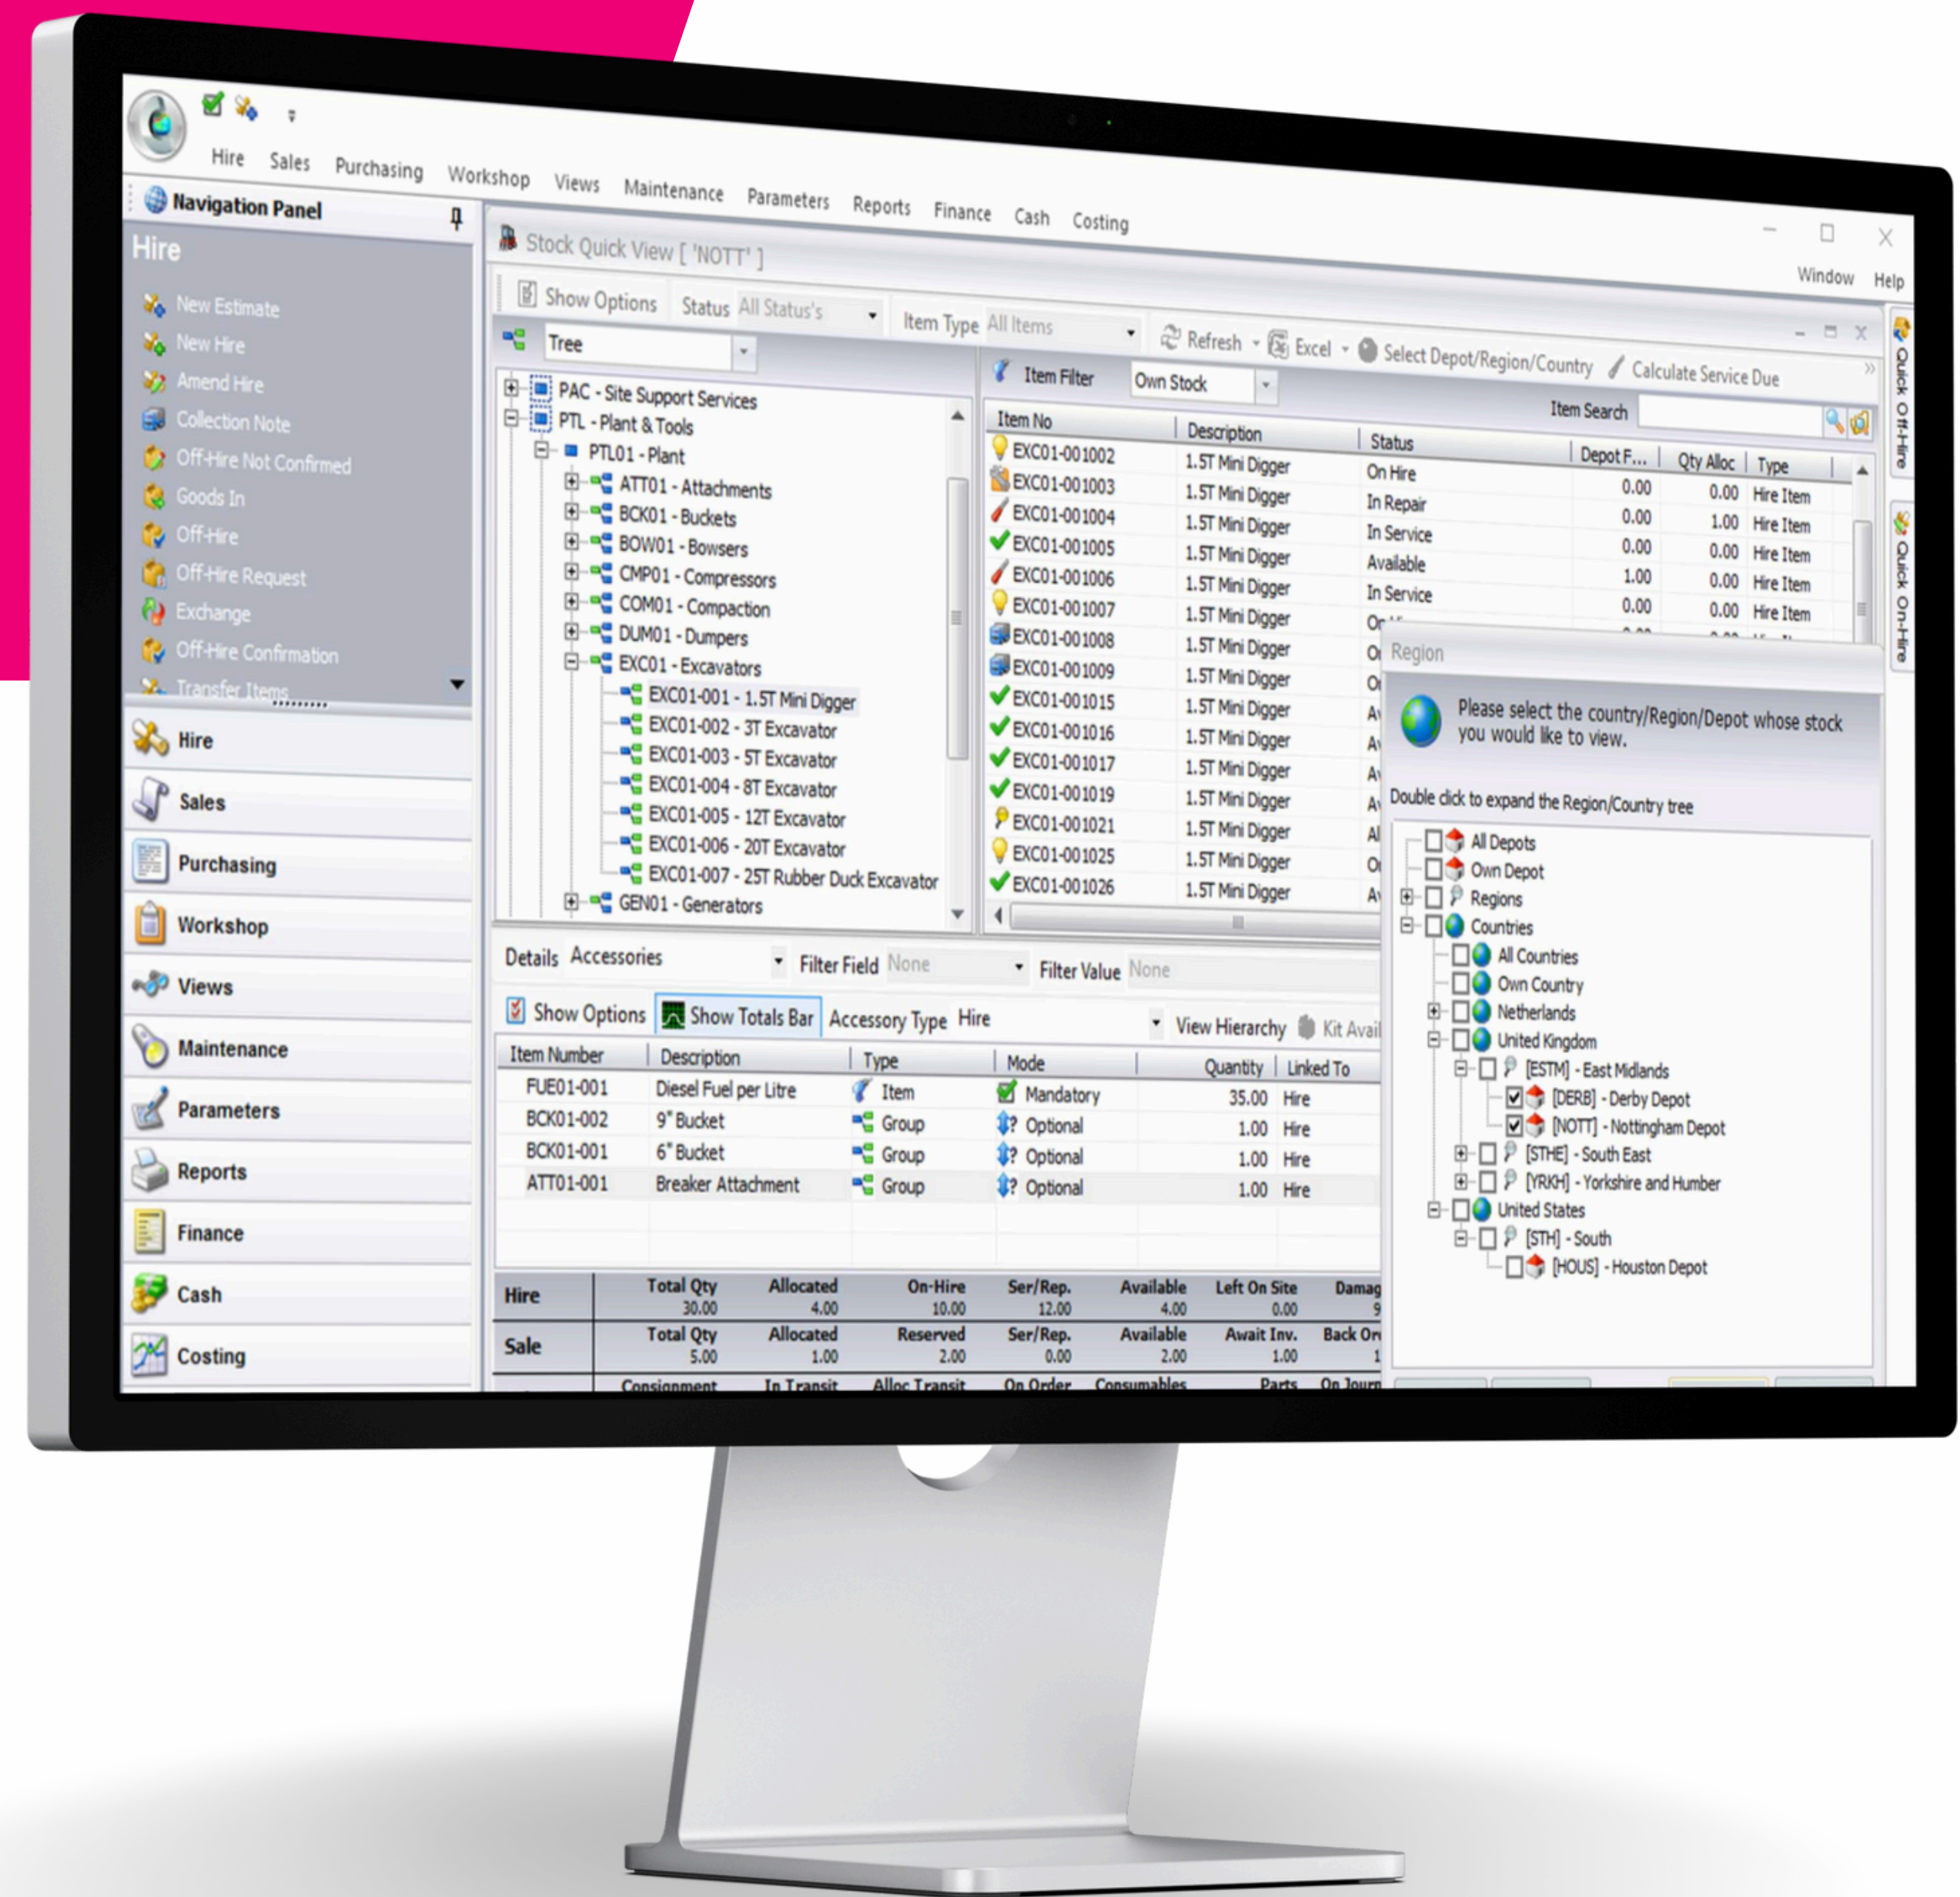

Introducing OnRent One[®]

by Klipboard.

The platform that powers complex rental operations.

OnRent One is the enterprise-grade rental management solution for large, multi-depot hire businesses operating at scale. Whether you're managing plant, tools, access equipment or specialist machinery, it gives you complete control over quoting, inventory, maintenance, logistics, finance and reporting, in one connected platform.

Designed to handle high-volume transactions and complex workflows, it helps your teams move faster, reduce admin, and make smarter decisions. From advanced pricing rules and servicing schedules to integrated transport planning and business intelligence, OnRent One helps your team work smarter across every department.

You can customise user roles, configure workflows, localise documents, and automate approvals — so every part of your business runs the way you need it to. And because it's part of the wider Klipboard ERP ecosystem, it's built to scale with your business as it grows.

Key Features at a glance:

- ✓ Quote and process sales orders at scale
- ✓ View global equipment availability in real-time
- ✓ Manage servicing, inspections and breakdowns
- ✓ Schedule logistics with confidence
- ✓ Control billing and finance processes
- ✓ Track utilisation and depot performance
- ✓ Offer online ordering with WebPro
- ✓ Integrate with your wider tech stack
- ✓ **And much more...**

One platform. Every process. Built for large scale rental operations.

When you're managing hundreds of contracts, thousands of assets, and multiple teams across different locations, disconnected, siloed systems cause more harm than good. OnRent One brings the entire hire lifecycle into one central, scalable platform - so you can quote, assign, maintain, invoice and report, all without rekeying or cross-checking systems.

1. Empower sales teams to quote and convert with confidence

Handle complex pricing structures, discounts, and approval chains, then convert quotes into rental or sales orders in one click, with no duplication.

3. Help your transport planners move faster, with fewer delays

Assign vehicles, drivers and deliveries using drag-and-drop tools that factor in location, job type, vehicle weight and route planning.

5. Keep field teams connected, no matter where they are

Give drivers, yard staff and engineers the power to update jobs, log issues, scan equipment and capture signatures all via an integrated mobile app.

7. Give decision-makers real-time insight on what's working

Monitor ROI, utilisation, depot performance and hire profitability with smart dashboards, exception alerts and automated reports.

2. Give your hire desk visibility of availability and prep status

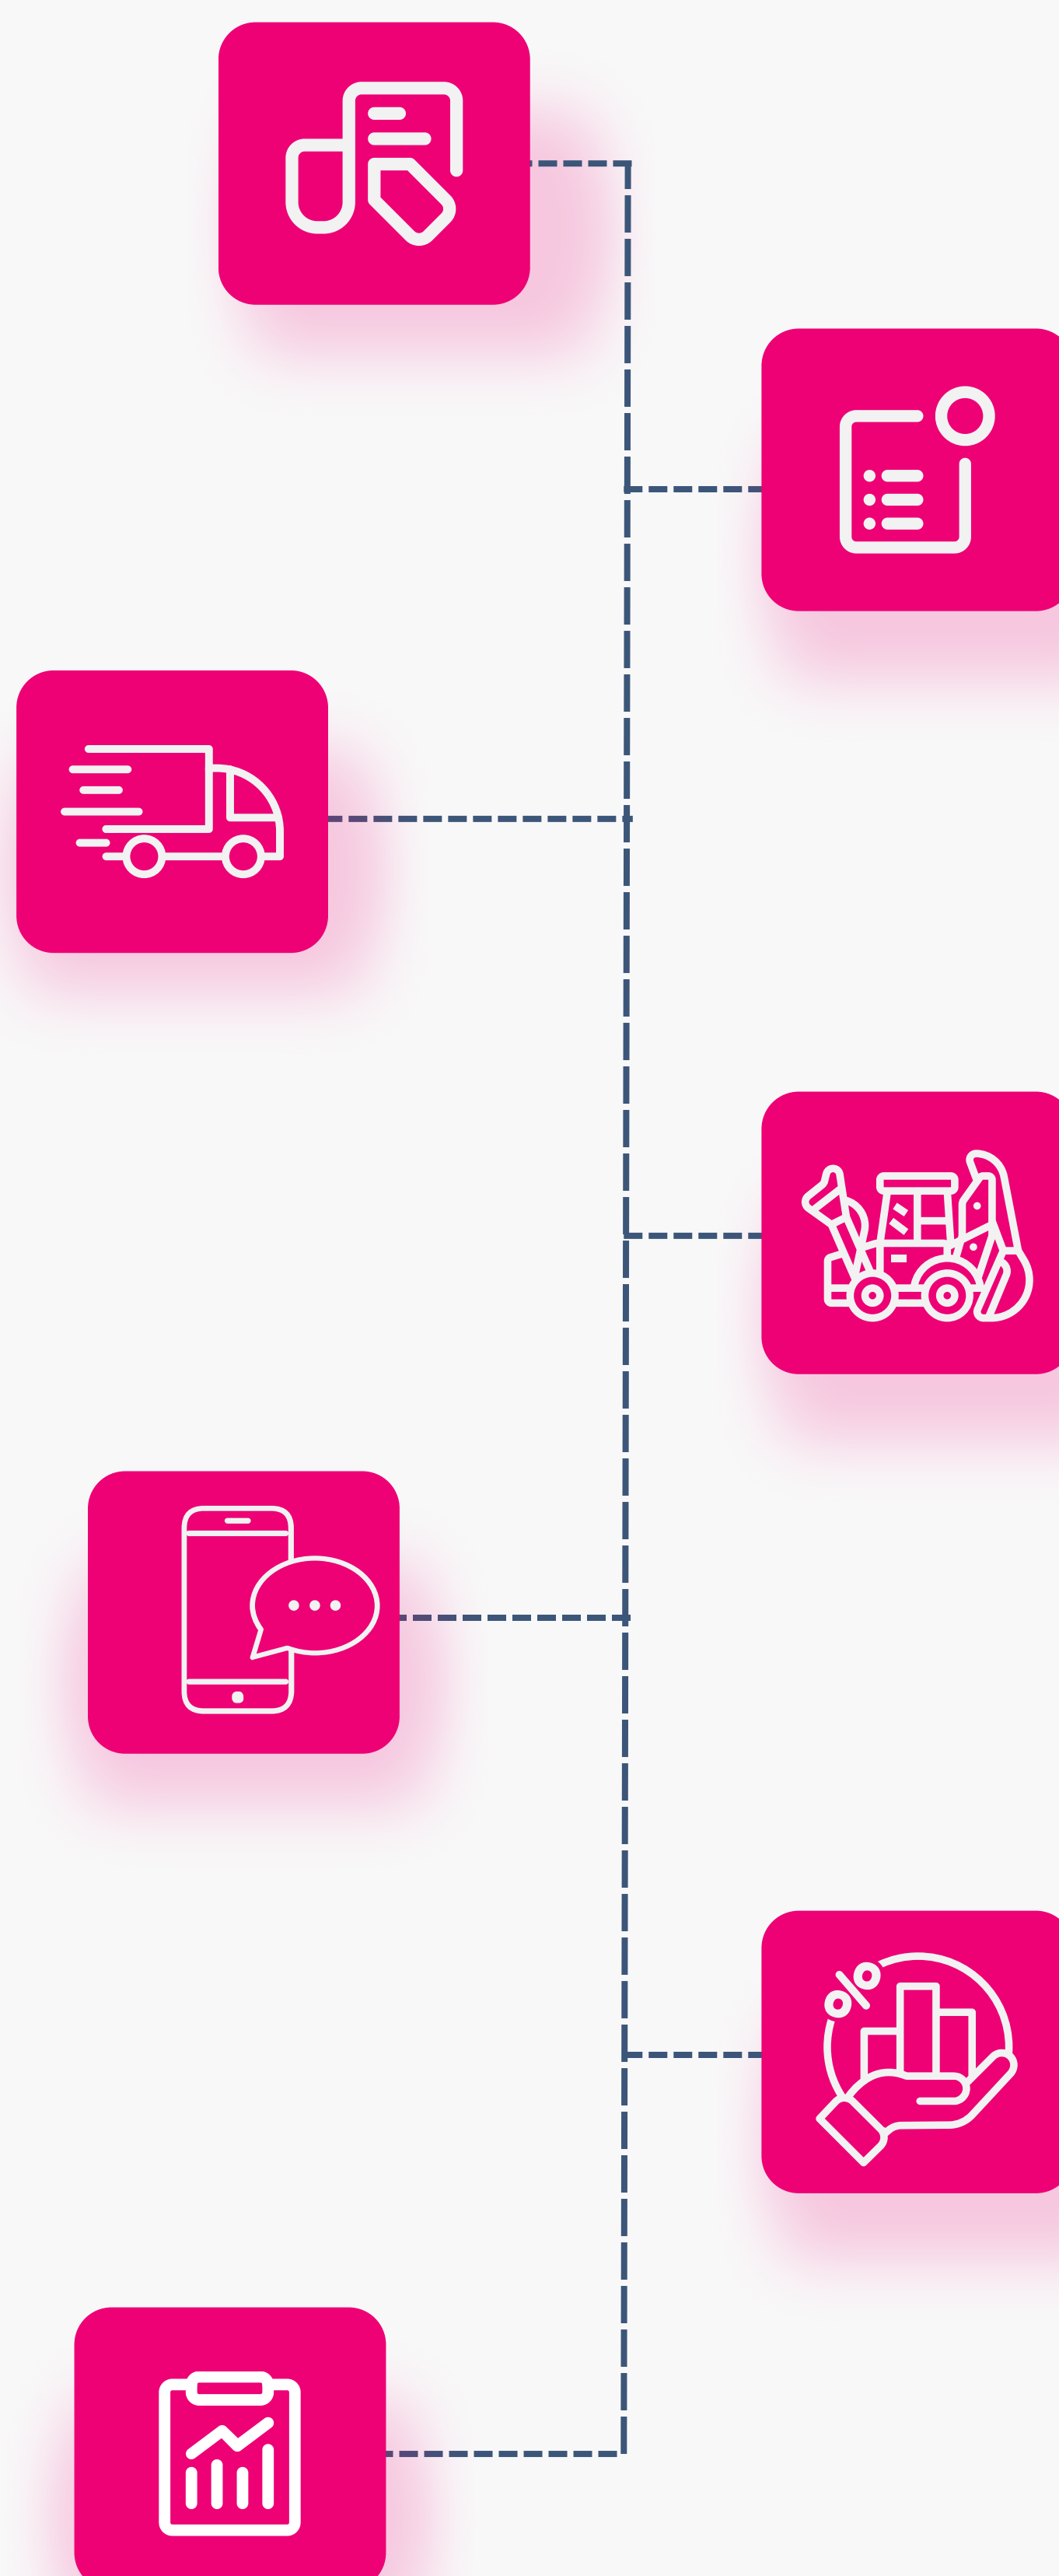

See exactly what's available, where it is, and when it's due back, across depots, with kit-building, prep windows and serial-level tracking.

4. Equip your service teams to keep assets hire-ready

Automate inspections, log breakdowns, allocate labour and parts, and track job costings with full asset history and reporting across your organisation.

6. Help your finance team invoice at scale, accurately

Manage deposits, damage charges, staged billing or batch invoices with in-depth reporting and full integration to your finance platform.

Solutions for every step of the rental cycle.

Discover Klipboard's layered applications and additional modules that can further improve your rental business.

Cloud hosting

Manage your rental business on any device, anytime, anywhere by hosting in the cloud.

WebPortal

Allow your customers to self-serve with 24/7 access to their hire and rental information.

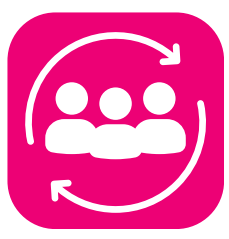

Digital twin

Create unique QR codes for assets so customers can access manuals, certificates and other docs.

Klipboard Money

integrate payments directly into OnRent One - to speed up payments and reduce manual admin.

Klipboard CRM

Use actionable insights to improve how you sell, service and manage customer relationships.

Asset tracker

Display the location of all assets, contracts and users in one, easy to use, Google maps view.

Klipboard API

Build seamless integrations with the systems that your business is already used to using.

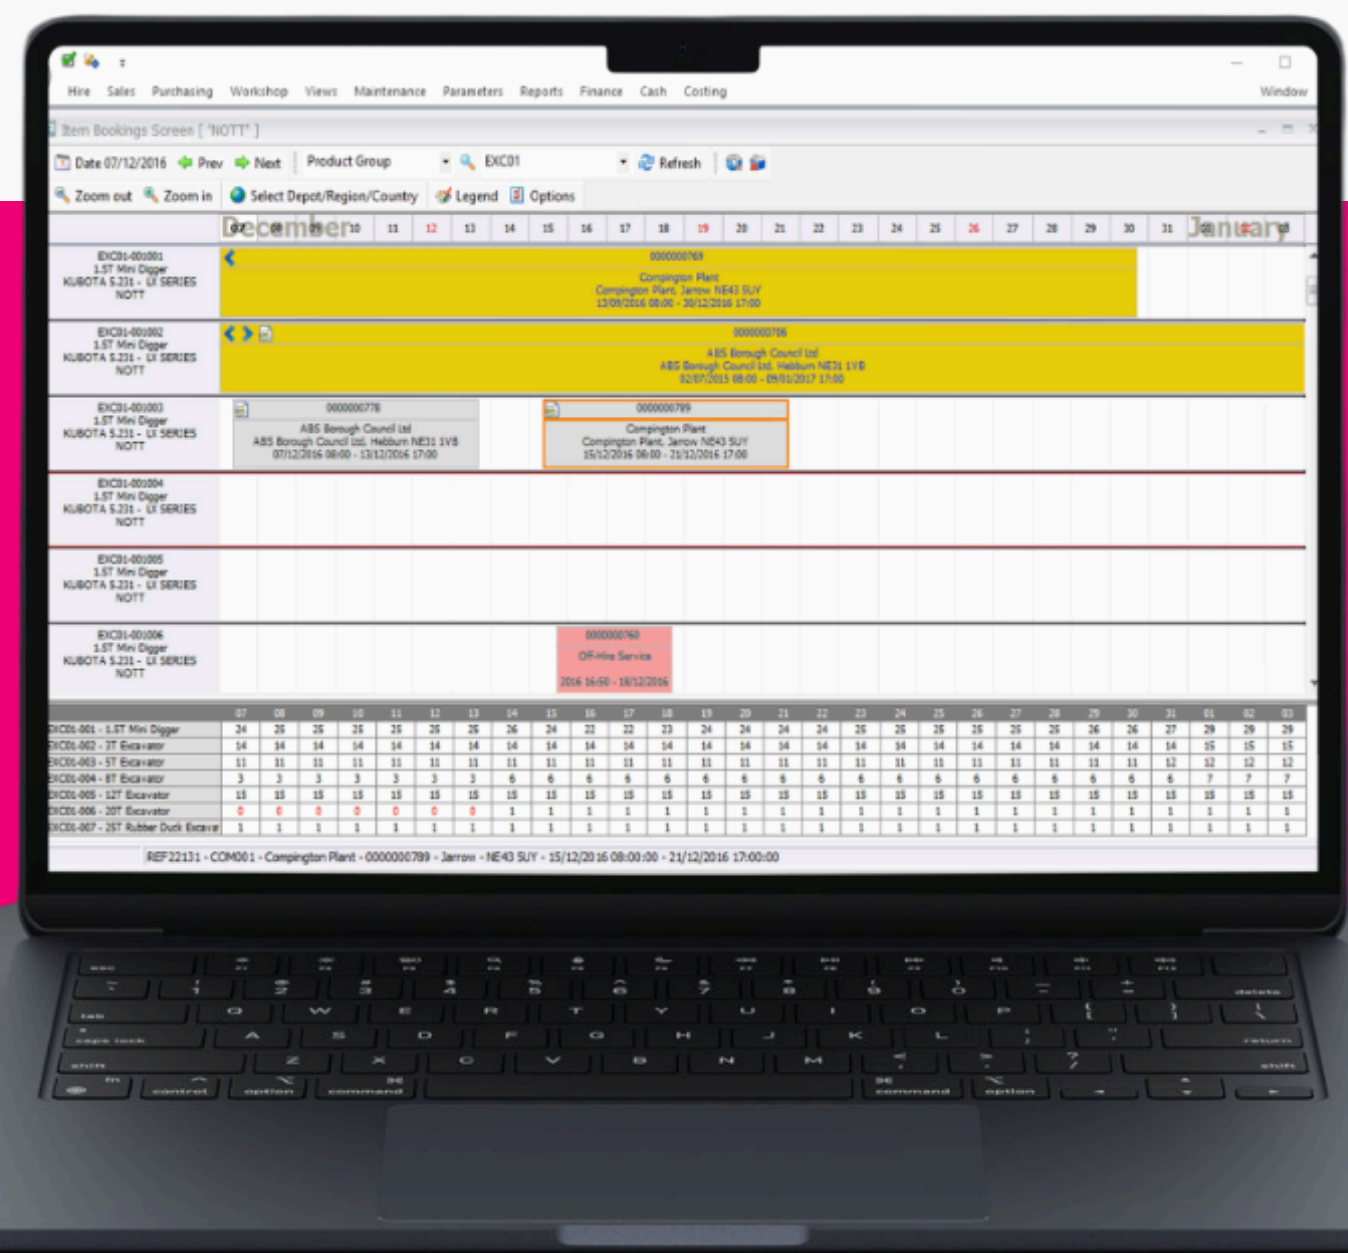

Route optimisation

Be one step ahead at all times by planning your scheduled site services in advance.

Telematics linking

Link telematics data, track machine location, and automate charging and maintenance from usage insights.

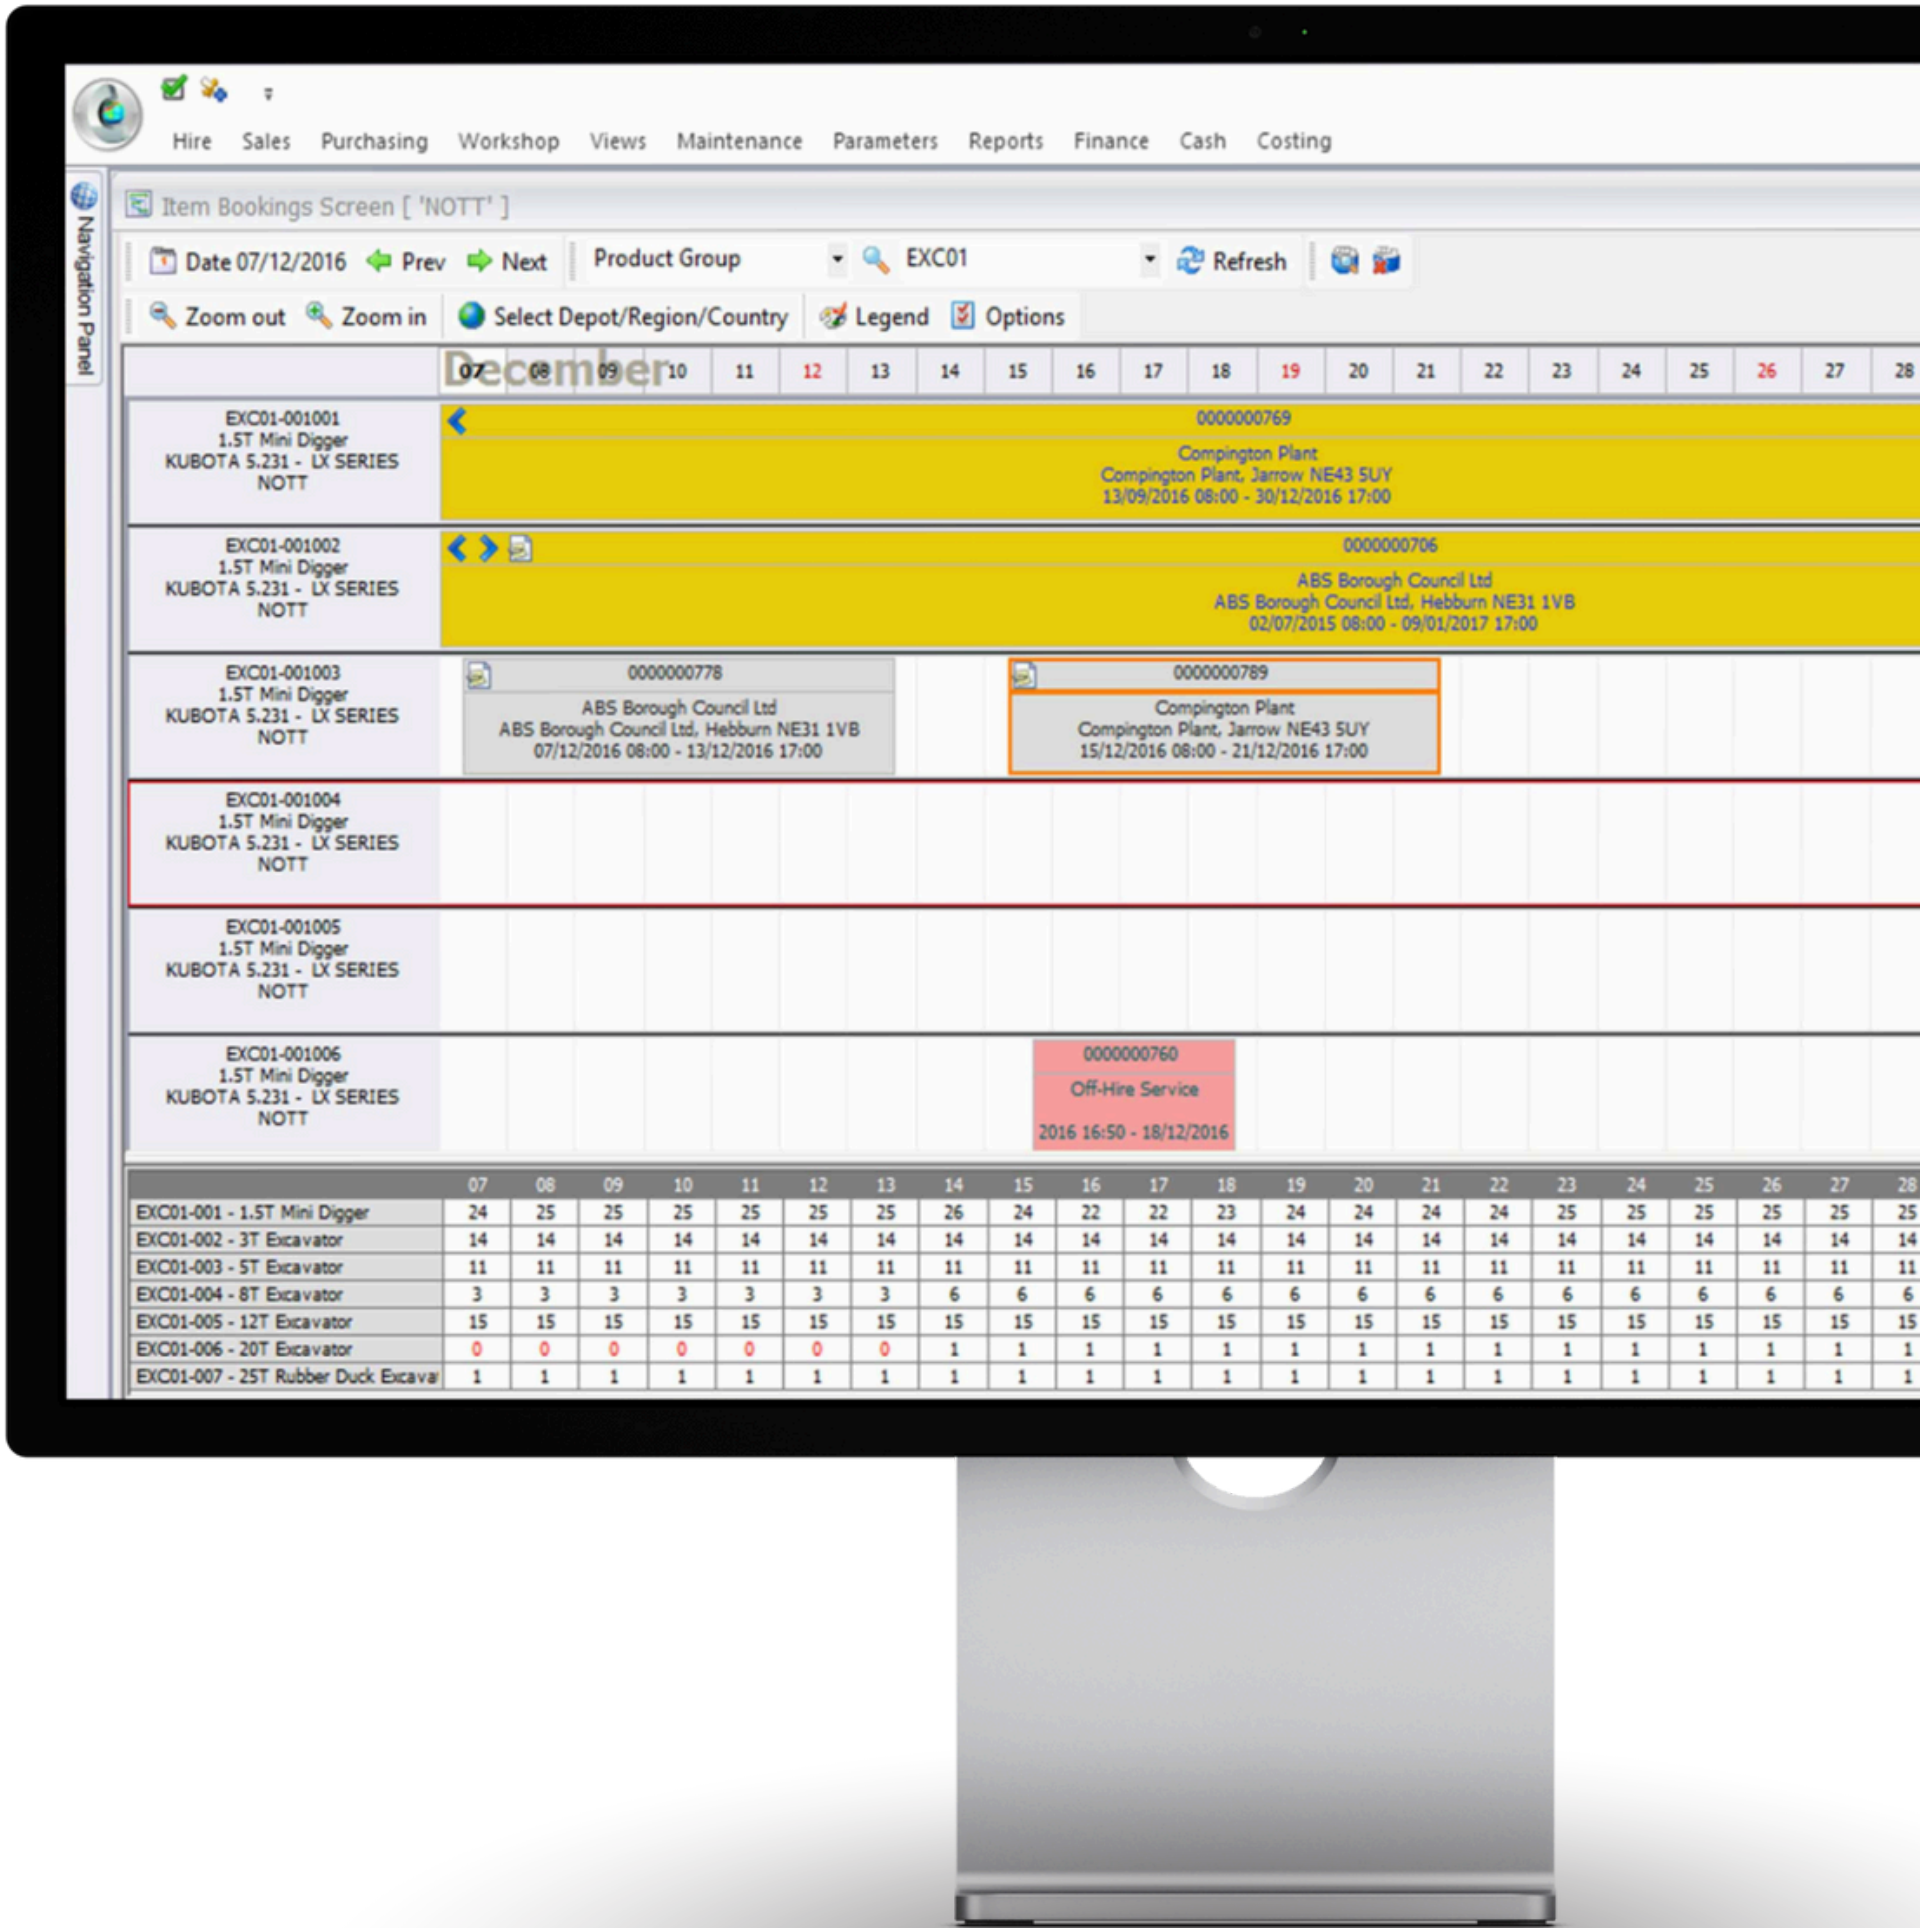

Process complex orders with confidence, speed and accuracy

In a high-volume rental business, order entry needs to be fast, flexible, and error-free - no matter how complex the job.

OnRent One equips your hire desk and sales teams with powerful tools to create, manage and convert orders efficiently across multiple locations, depots and contract types.

Whether it's a large plant hire contract with multi-phase billing or a small one-day sale, every quote, rental order and sales line stays connected so your teams don't waste time rekeying data or checking stock manually. You can set pricing bands, prompt for related items, track quote performance, and automate key approvals - all in one place.

Features that streamline your sales team's order and contract workflows

Quote and convert to hire or sales orders instantly

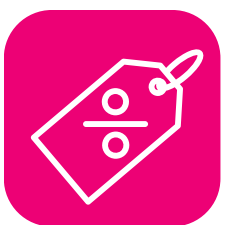

Track quote success rates and log reasons for lost jobs

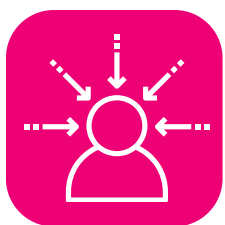

Prompt accessory and consumable suggestions during order entry

Include damage waivers, deposits and staged billing lines

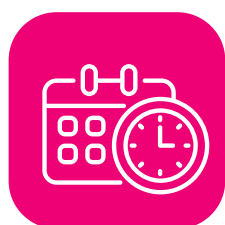

Apply customer-specific pricing and contract rules with ease

Use approval workflows for pricing or margin thresholds

Auto-calculate delivery, collection and service charges

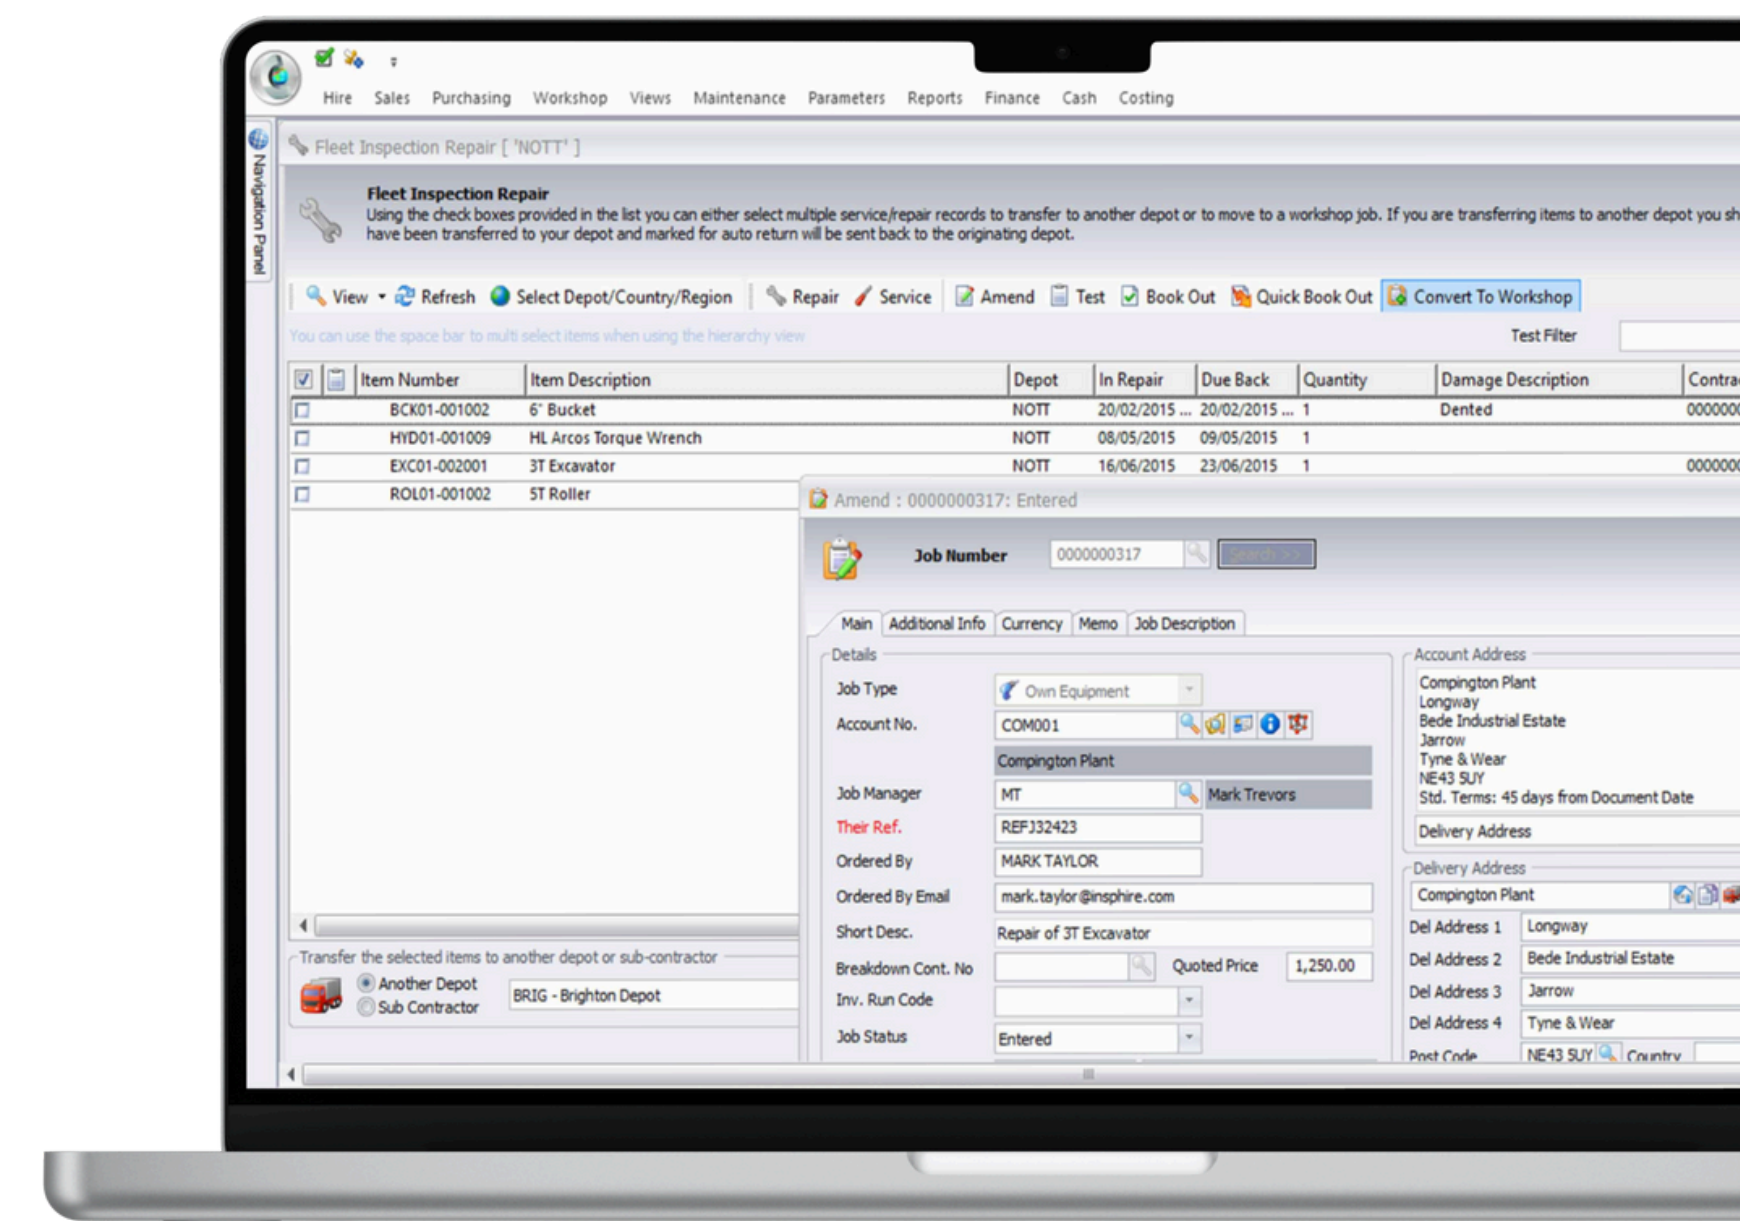

Set hire periods, extensions and off-hire dates automatically

Software that gives you full control of your equipment inventory and maintenance

Managing a large rental fleet means more than just tracking usage. It's about keeping every item in peak condition and on schedule. With OnRent One, your workshop and engineering teams can plan servicing, capture repairs, log faults, and allocate costs, without chasing paperwork or losing visibility between jobs.

Track every inspection, breakdown, or maintenance task against the correct asset, with full labour and parts attribution. Use mobile tools to log jobs in real time, attach photos, and generate documentation automatically. And with live service status and history available to the hire desk, you reduce double-bookings and protect availability.

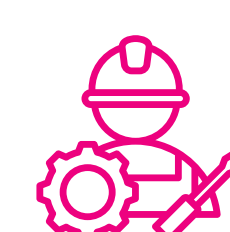

Features that power smarter maintenance and servicing

Create, assign and track inspections, repairs and breakdown jobs

Log job details, costs and notes against individual assets

Capture labour, part and subcontractor costs per job

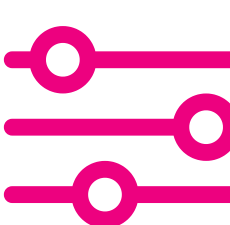

Generate damage letters with photos and branded templates

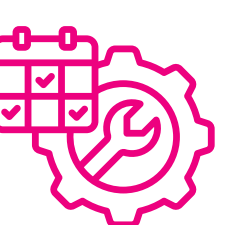

Attach fault reports and service logs from mobile devices

Trigger jobs automatically based on usage or calendar rules

Filter and schedule work by depot, team or equipment type

Maintain service history and certificates for full compliance

Sync service status with hire desk to avoid mis-bookings

Let your customers self-serve, without compromising control **with embedded eCommerce**

In a modern rental business, customers expect to be able to browse rates, request quotes, place orders, and manage their account online 24/7, without needing to call the hire desk.

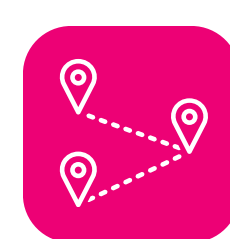

With OnRent One's WebPro portal, you can offer clients an easy, professional way to self-serve on your website that's linked to the stock and pricing data in your central business management platform - OnRent One.

Features that power eCommerce and customer self-service

Let customers browse products, pricing and real-time availability online

Support multi-site accounts with user-level access controls

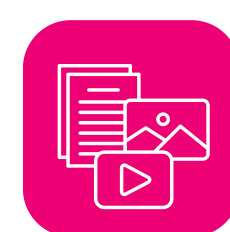

Enable online quote requests, order placements and off-hire submissions

Capture e-signatures and confirm terms digitally

Display personalised rates and account-specific contract terms

Display product images, specs and associated accessories

Provide 24/7 access to hire history and documents

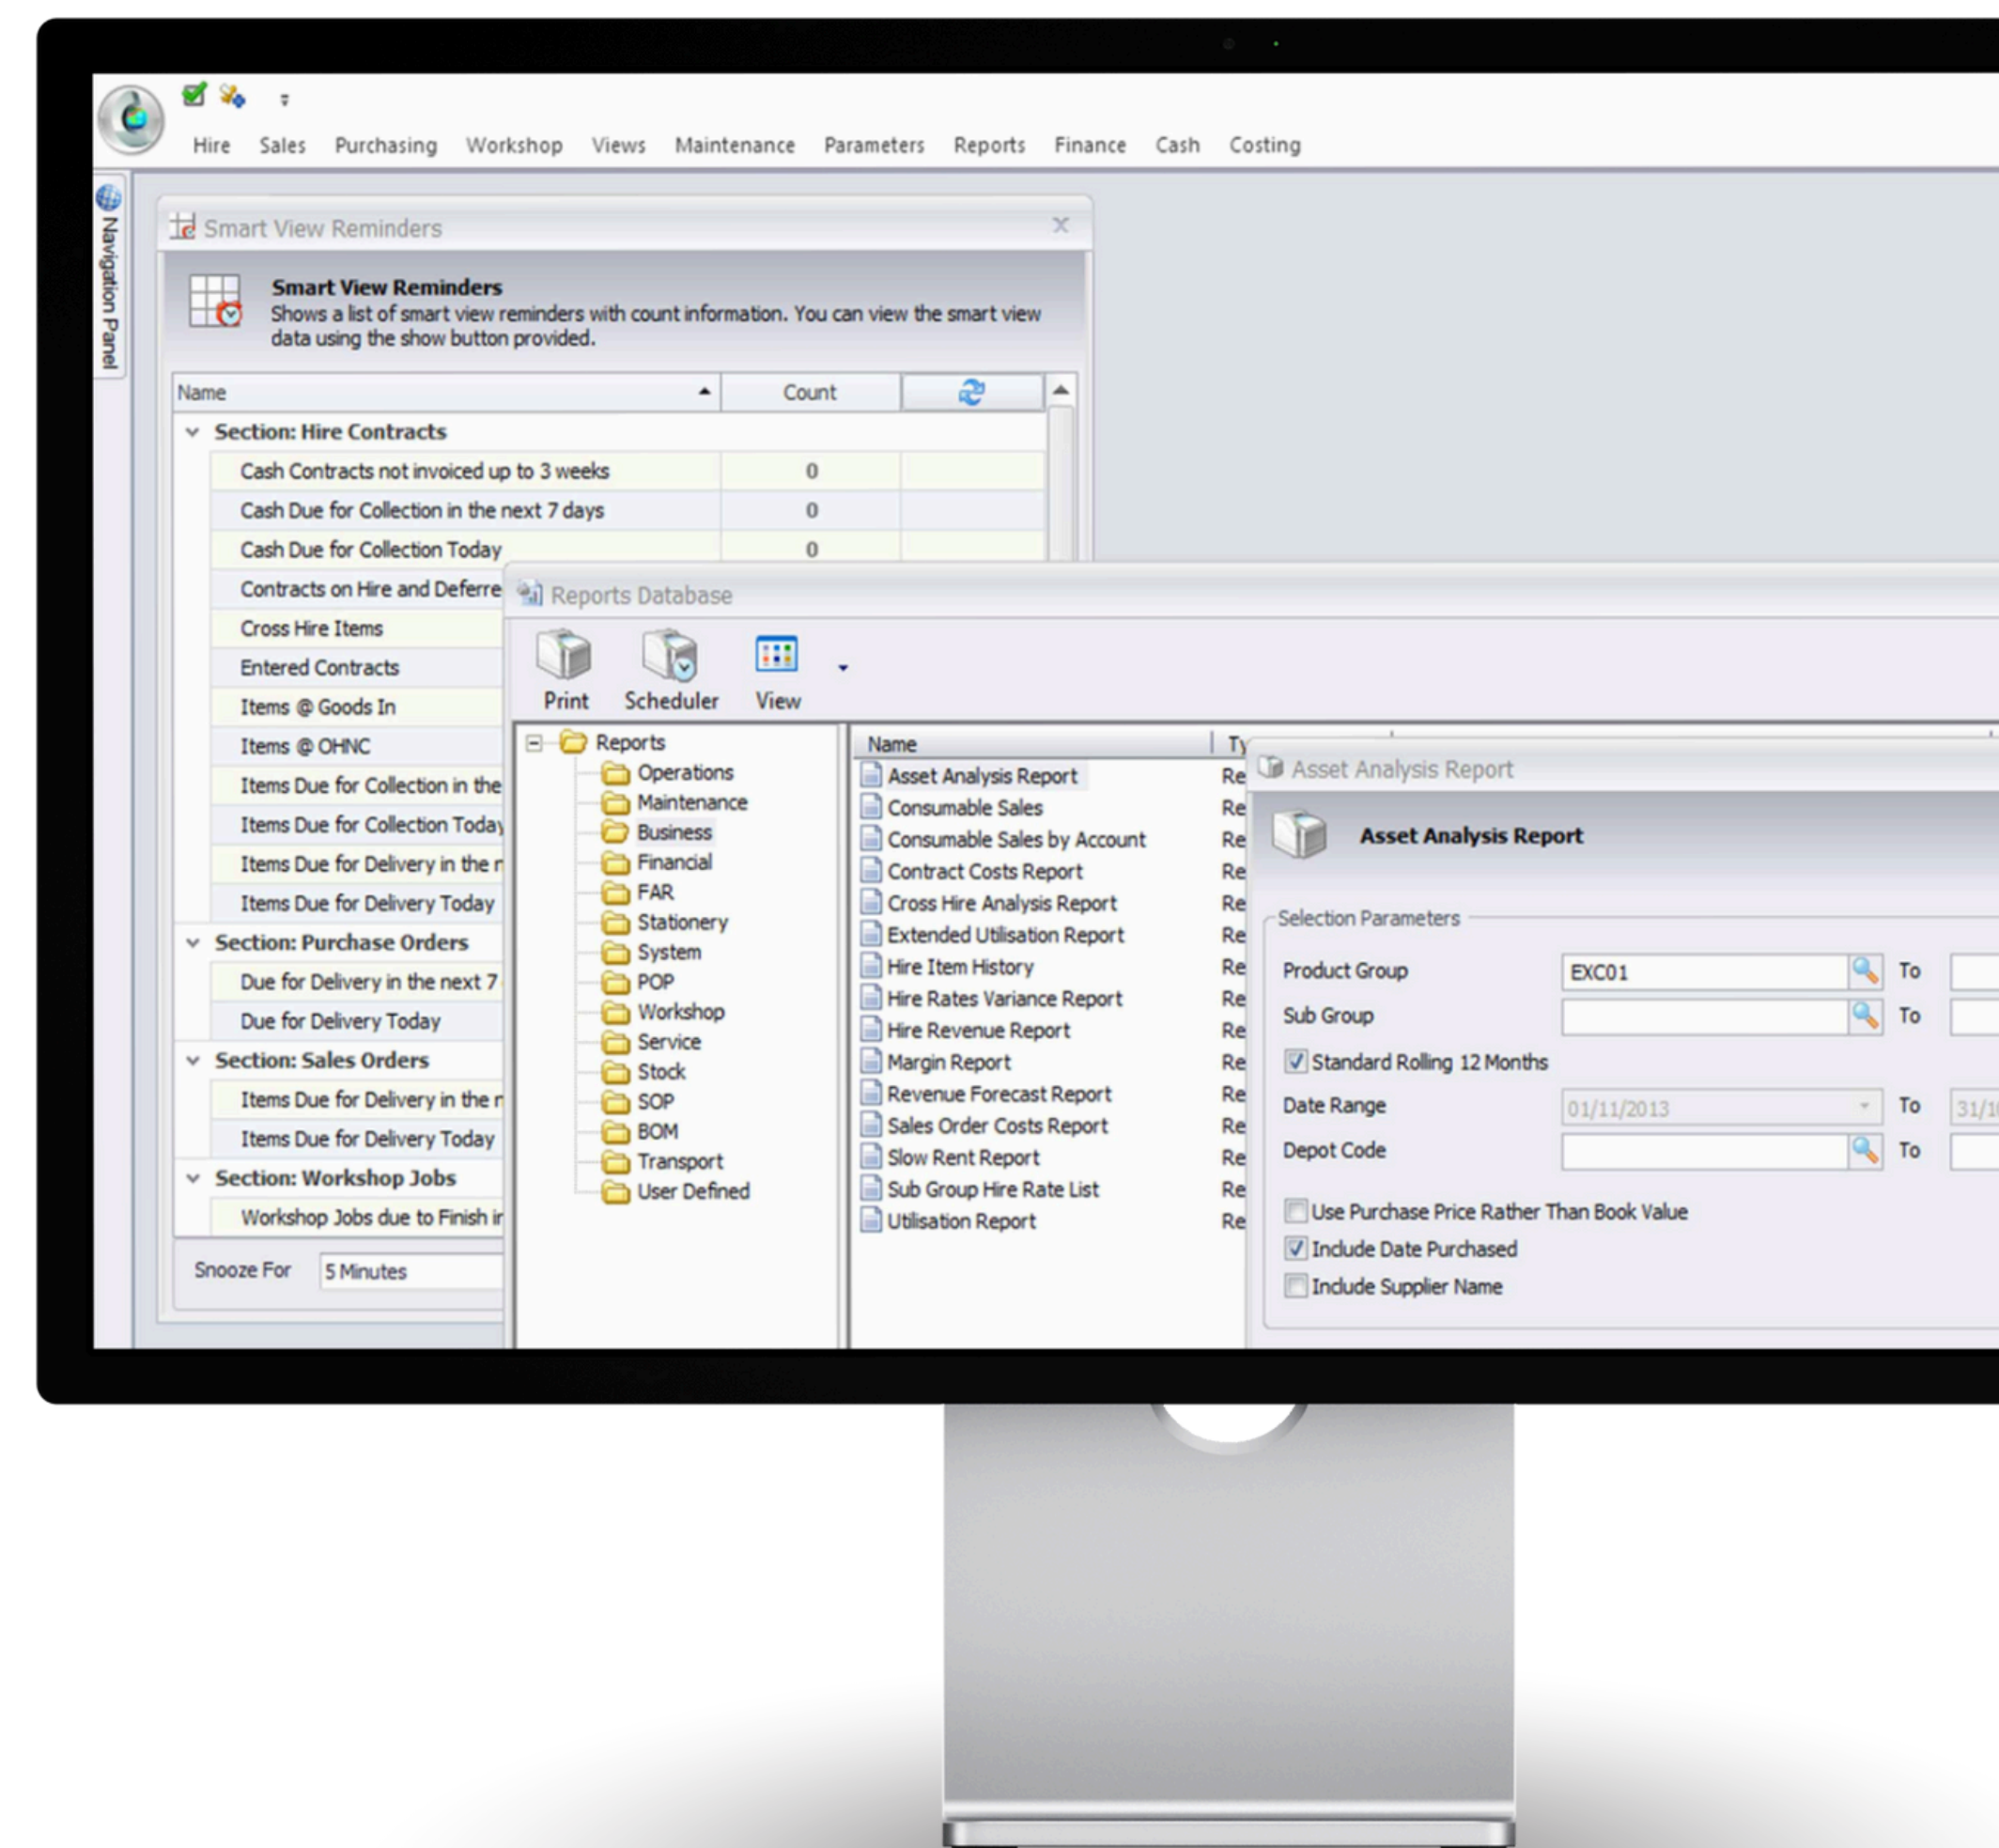

Customers can track deliveries, collections and orders in real time

Handle high-volume billing and track performance with precision

In a high-volume rental business, small billing errors can create big problems. OnRent One gives your finance and operations teams the tools to invoice accurately, reconcile quickly and report clearly- without rekeying, delays or chasing paper trails.

Whether you're managing staged billing, deposits, or service charges, every transaction is tied to its contract, asset and job. You can batch invoices, track balances, automate reporting, and integrate everything directly with your finance system, giving you real-time visibility over profitability, ROI and depot performance.

Features that deliver accurate financials and powerful insights

Raise rental, service or part invoices for each job across your organisation

Apply deposits, staged billing and late fees

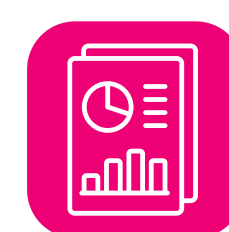

Batch invoices to save time on high-volume jobs

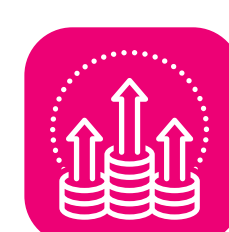

Track invoice status and customer account balances

Integrate natively with Xero, QuickBooks, Sage, Phocus and more

Generate depot or asset-level profitability reports

Create BI dashboards with KPIs, auto-alerts and trends

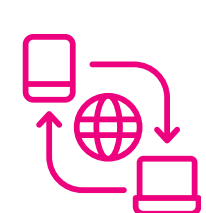

Track asset utilisation and ROI in real time

Discover a fast, flexible and future-proof way of protecting your business, **at-all-times**

Whether we realise it or not, we all use the cloud to manage vital parts of our everyday lives. Online banking, sending emails and browsing social media are all examples of this. But why should you use the cloud for your business?

Simple, server attacks are on the rise and Klipboard can help you prevent it. The last few years have proven we need to be equipped with agile, secure and future-proof systems, and the cloud provides just that. As well as other benefits...

Protect your business from server attacks and transition your Klipboard system to the cloud today. As well as providing increased security it will allow you to focus on strengthening your rental operations, providing a better customer experience and increasing your ROI - from any device, anytime, anywhere.

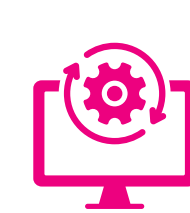

Access your system anytime, anywhere

Whether you're at home, in the yard or out on-site, OnRent One keeps you connected. View availability, check job status, respond to customer enquiries and access quotes from any device, wherever you are — no delays, no downtime.

Cut overheads, delays and admin waste

Cloud hosting eliminates manual updates, reduces infrastructure costs and streamlines every part of your rental operation. Spend less time fixing and more time spent delivering value to your customers.

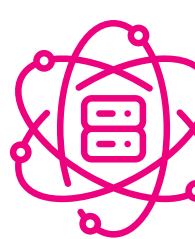

Get the latest features automatically

New tools, improvements and security updates are rolled out automatically, without downtime or disruption. No manual installs, no version mismatches, just instant access to the latest functionality for every user, across every device.

Scale fast without outgrowing your system

As your business grows, the platform grows with you. Add users, depots or integrations without IT bottlenecks or hardware limits. Whether you're opening new branches or expanding into new regions, OnRent One stays ready.

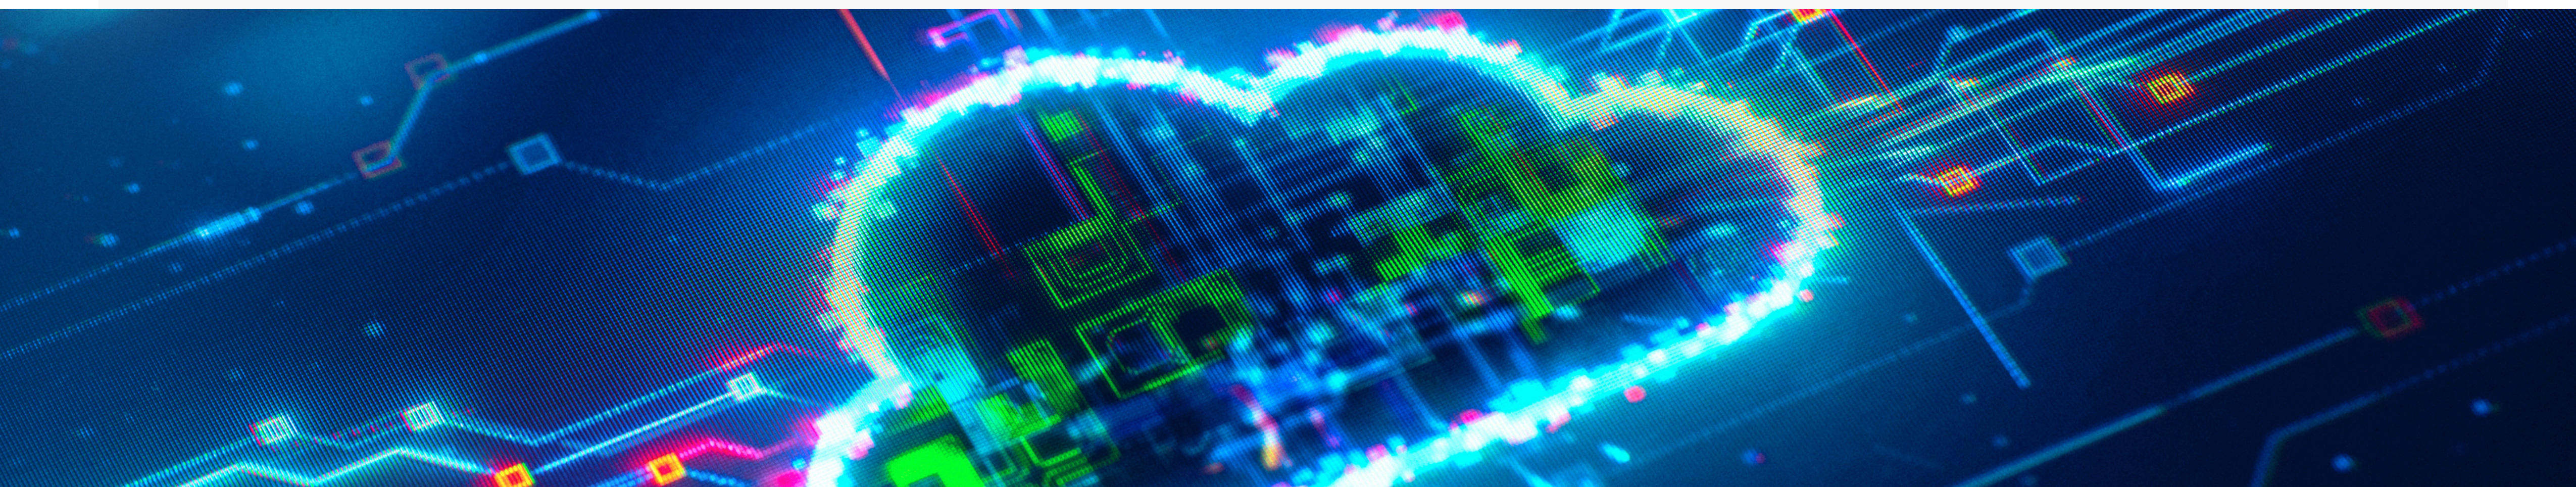

Protect your data, no matter where you are

Data stays safe even if devices are lost, stolen or damaged. Secure cloud storage and user access controls mean you stay in control, with remote wipe capability and built-in disaster recovery as standard.

Run smarter without replacing infrastructure

Unlock the full power of OnRent One without major IT investment. The cloud delivers enterprise-grade performance, scalability and reliability — without the cost, maintenance or constraints of legacy hardware.

OnRent One: Integrate with your existing tech stack:

OnRent One works alongside the systems you already use, including accounting, logistics, eCommerce and communications third-party software. Seamlessly connect your hire workflows with the rest of your business using ready-made integrations and open API support.

Fully-integrated business management systems for trade, wholesale, manufacturing, field services and distribution businesses.

For accounting, payroll, HR, ERP, payments and more. Whether you're a start-up or a global enterprise.

Vehicle tracking systems that give you a complete overview of your fleet at all times.

Send beautiful emails, connect your e-commerce store, advertise, and build your brand.

Confirm that your machines are well maintained without having to travel around work sites inspecting machines.

Web mapping that offers satellite imagery, street maps, 360° street-view, real-time traffic conditions, and route planning.

For small businesses and self-employed workers to manage their accounting processes.

Online accounting for businesses to manage invoicing, bank reconciliation, bookkeeping and more.

Manage and produce all of your PAT test reports and certificates.

Powerful data analytics and financial planning tool, accessible anywhere, anytime. Pulls information from multiple systems that matter to you and your business and displays in one consolidated view.

Ensure you are always directed to the required drop-off point by narrowing down the location to a 3x3m squared geolocation.

SAP Crystal Reports: Create, design, and deliver formatted and dynamic business reports and invoices to simplify and accelerate decision-making.

Take card payments instantly with built-in integration to Klipboard Money.

OnRent One: Clipboard Rental solutions feature matrix

Whatever your hire business requirements Clipboard has the solution for you. Designed to be scalable, they will grow as you grow, giving your rental business the fit needed for now and for the future.

OnRent One: Getting started.

At Klipboard, our experienced rental specialists are here to support you from day one. We take the time to understand your business, then guide you through setup, training and beyond, so your system works exactly the way you need it to.

Consultation and demonstration

First, we will find out what you are looking for in a hire software solution and talk through your key objectives. We'll consider your individual business requirements and identify the benefits you will enjoy from using Klipboard solutions and look at the ROI, ensuring you get the most out of your system.

Implementation, project management and training

Our specialist team will be on hand all the way through your project. We'll provide you with practical lessons and training and agree on your objectives and milestones to ensure deadlines are met, ready for live. With decades of real-life hire exposure, you can rest assured that you're in good hands.

Support from industry experts

Our account managers are here to help you get the most out of your Klipboard solution, with tips and advice on new features and updates. Our dedicated helpdesk team are always on hand by phone or email to assist, and our customer portal gives you access to help files, training videos and much more.

Ongoing product development

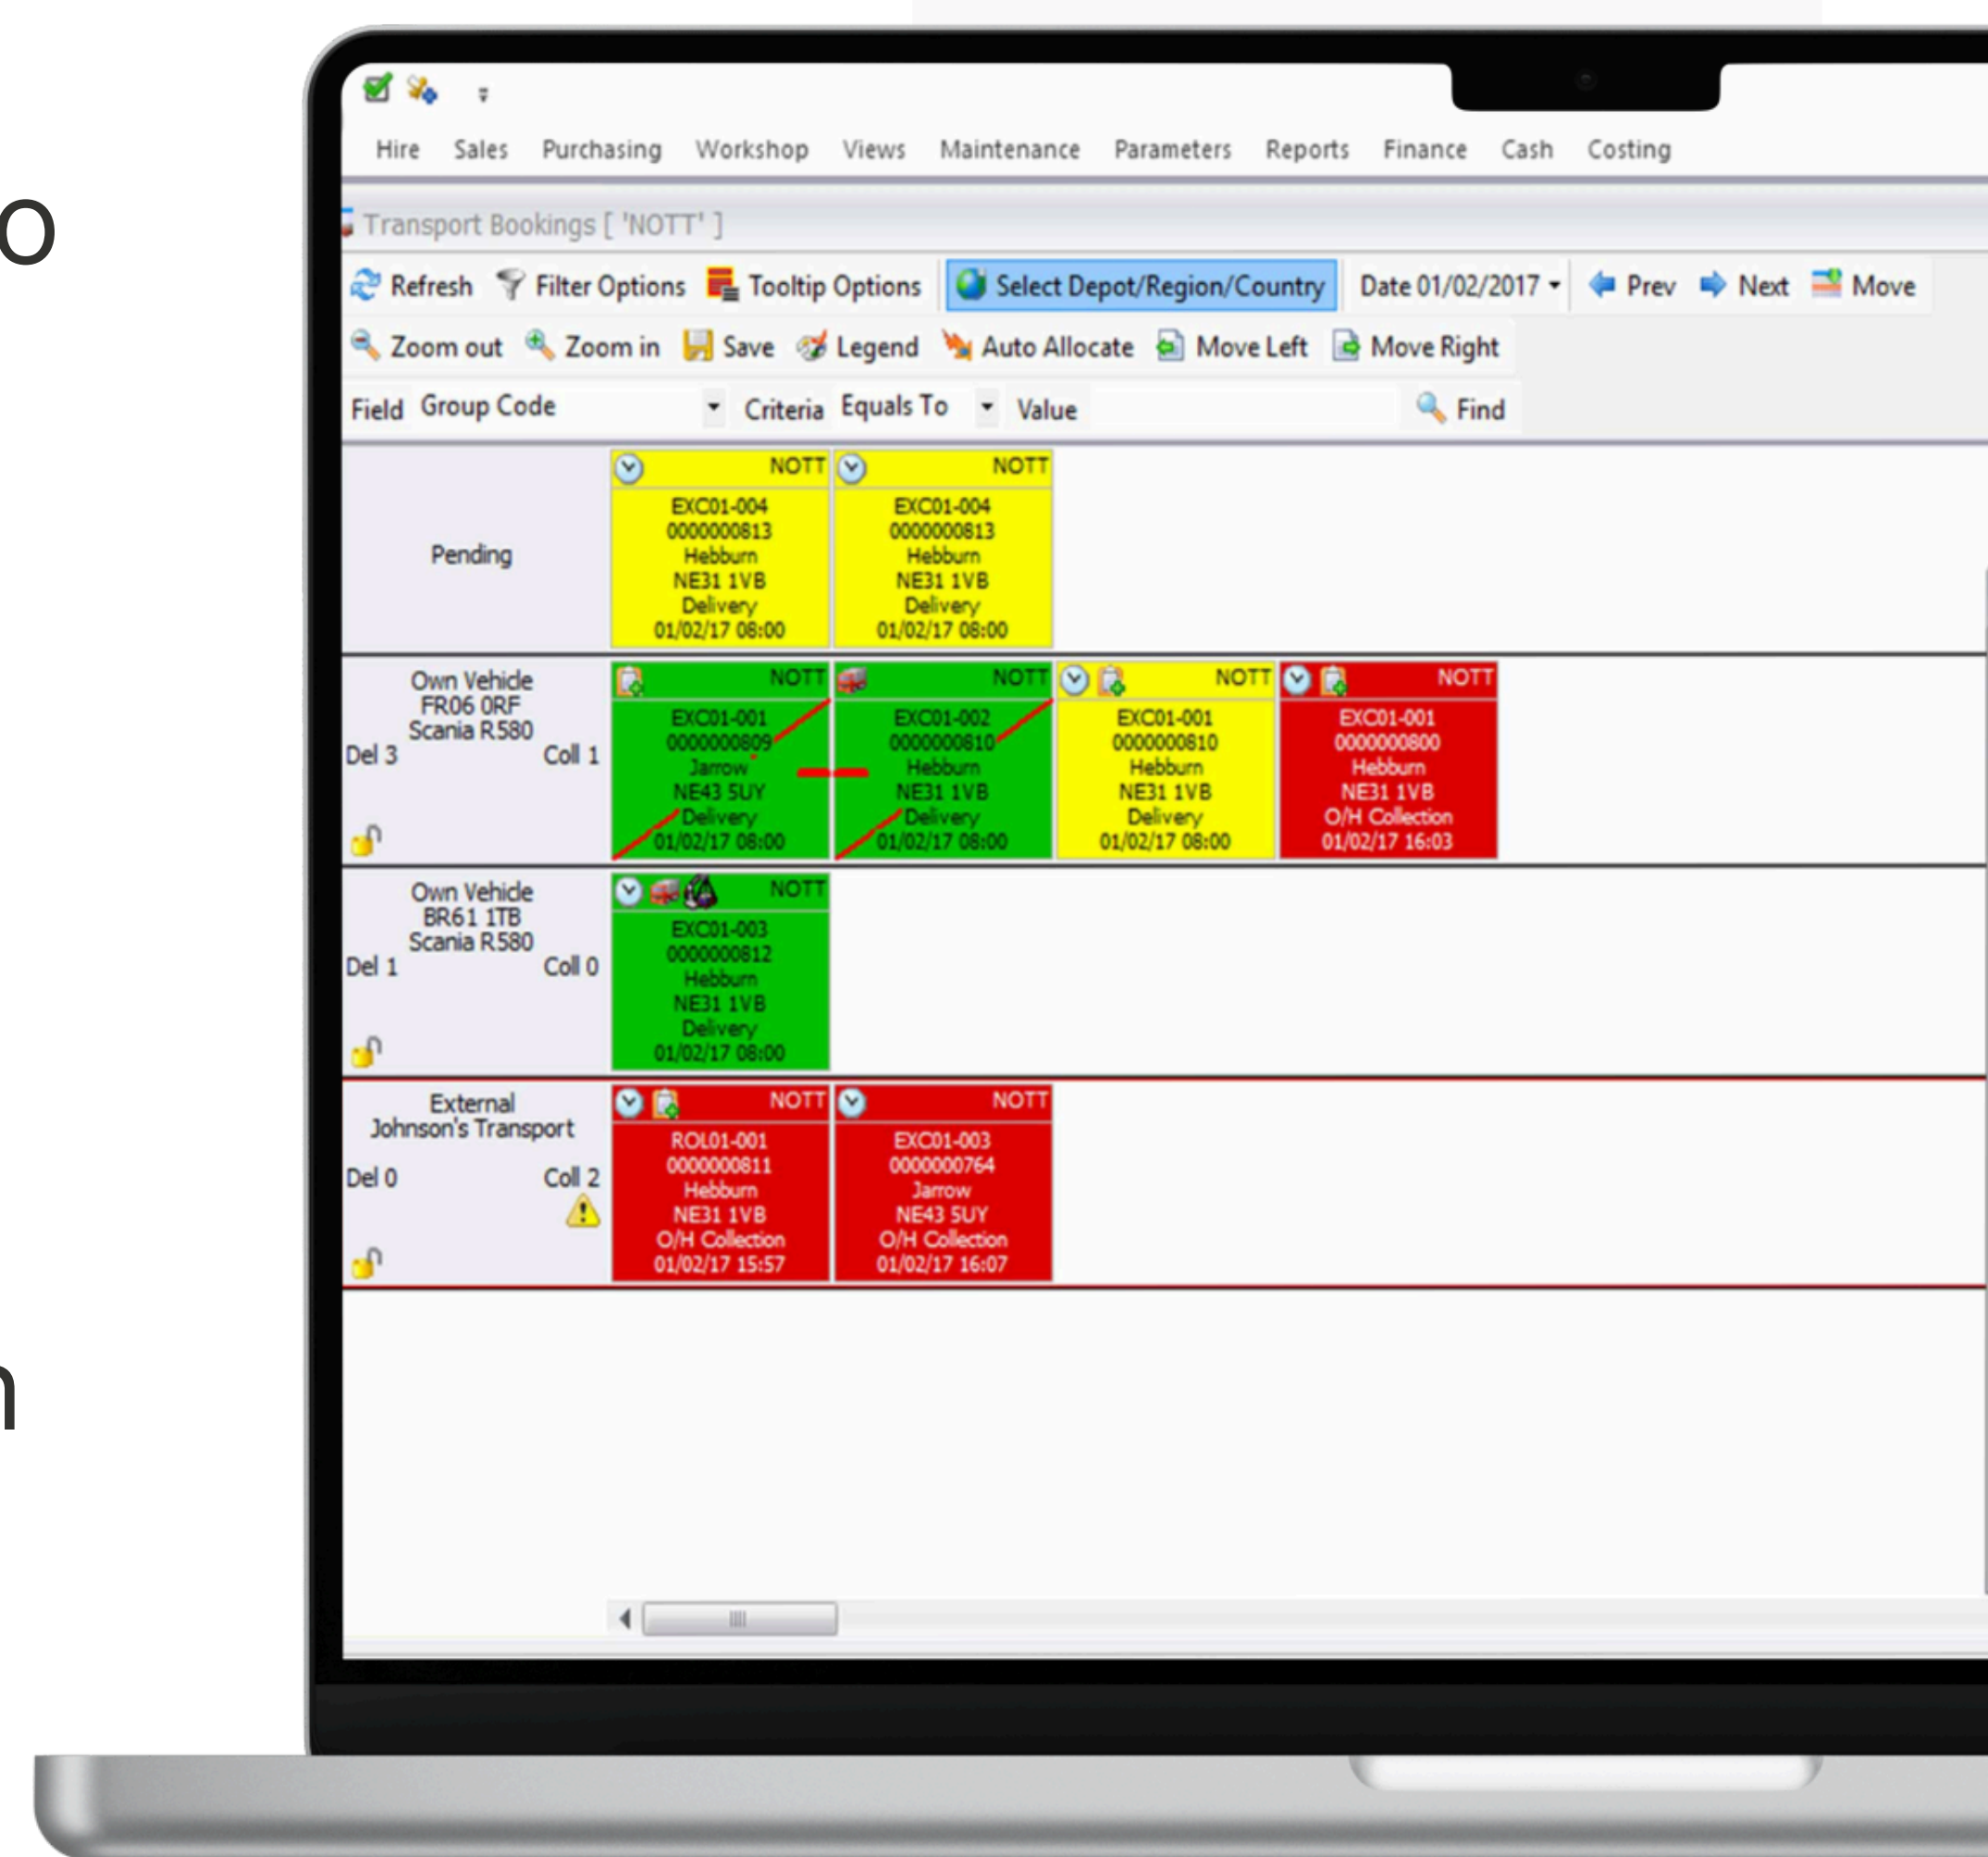

We have an expert team dedicated to developing innovative new solutions using cutting edge technologies. As a result, we're constantly improving and adding new features to our software that enable you to embrace new functionality and technology as you need it. That way, you stay ahead of your competitors.

Don't just take our word for it...

“When managing a team, it’s essential to be up-to-date at all times, especially when that team deals directly with our customers. With OnRent One, I love the transparency of the audit trail on each job and you can see who is dealing with what. This allows us to provide quick updates back to the customer.”

Ardent Hire Solutions

Sustainability at Klipboard.

At Klipboard, sustainability isn’t just a commitment - it’s our way of doing business. And, we’re driving it forward by partnering with industry leaders, innovating through technology, and embedding eco-conscious solutions into everything we do.

Our big green goal:

We’ve pledged to cut our Scope 1 & 2 Greenhouse Gas (GHG) emissions by 25% by 2030. It’s ambitious, but then again, so are we!

Progress towards our target:

	Scope 1 emissions (tonnes CO2e)	Scope 2 emissions (tonnes CO2e)	Combined emissions (tonnes CO2e)	Carbon intensity (tonnes CO2e/£m revenue)	Carbon intensity (tonnes CO2e/employee)
 Financial Year 2023 (baseline)	35	602	637	4.16	0.47
 Financial Year 2024	50	552	602	3.56	0.41

The data above shows a 5.5% reduction in absolute Scope 1 & Scope 2 emissions over a 12 month period with a 14.4% reduction in Carbon intensity (tonnes CO2e/£m revenue) over the same period.

Note:

- * Scope 1 emissions refers to all direct emissions from owned or controlled sources, including onsite generation of electricity & heating.
- * Scope 2 emissions refers to indirect emissions from the generation of purchased electricity, heating & cooling.

By 2026, all of our major UK offices will be powered by 100% renewable energy.

We now generate solar power on-site at our offices in Johannesburg, Nottingham, and Stellenbosch.

We’re retrofitting offices with sustainable lighting, heating & cooling, with local suppliers wherever possible.

We’re investing in, and supporting forest restoration in the Western Cape.

At Klipboard, doing the right thing isn't just a choice - it’s who we are. Sustainability, fairness, and transparency shape everything we do, from minimising our environmental impact to supporting our people and communities. It’s not just good business; it’s our commitment to the future.
